**ST. JOHN'S CATHOLIC (RFD, C. earwater)**  
 Rev. C. J. Kaup, pastor  
 Easter Sunday Masses 8:30 and 10:30 a.m.  
 History records a man of 1,900 years ago, who claimed to be God. History relates that he proved his claims by doing the humanly impossible—curing the sick, blind, deaf and dumb, and raising the dead to life.  
 History has written down indelibly that Jesus Christ rose from the dead on the third day after His crucifixion, just as He, Himself, had foretold, thus proving definitely His Godhead.  
 So certain is this historic fact that the greatest enemies of the new religion dared not deny the evidence for they knew that the hundreds who had seen the risen Christ would laugh them to scorn. So conclusive a proof of the divinity of Christ was the Resurrection that its preaching was the chief instrument in bringing thousands upon thousands into the church in the early days of millions upon millions during the centuries since.

History? What history? The greatest and most authenticated history ever written—the Gospels. The history that as proved itself thoroughly and permanently by coming unscathed through the attacks of the greatest minds of pagans and atheists throughout the centuries.  
 But yet another history confirms the facts. Flavius Josephus, the learned Jewish historian of the first century, who never embraced Christianity, writes thus: "He was the Christ. And when Pilate, at the suggestion of the principal men amongst us, had condemned him to the cross, those that loved him to the first did not forsake him for he appeared to them alive again the third day, as the divine prophets had foretold..."  
 And yet there are some today who deny by their teaching and preaching the historic fact of the Resurrection, though they doubt not at all the accomplishments of Xerxes, Alexander, and Caesar, whose histories are far less authenticated.  
 Of course, Jesus Christ rose from the dead! The Catholic knows this from faith and from fact. And on Easter Sunday the church celebrates that most glorious of all festivals, the Resurrection, by which Christ proved Himself God and restored to a fallen race the great privileges lost by sin.

Future Range Riders Organize —  
 The Sandhill Billies 4-H club met at the home of Raymond Garwood's on Saturday night, March 29, instead of March 22, as planned, due to the storm on that day. Roll call was answered by a suggestion of a name for our saddle club. The name which we chose for our saddle club is Future Range Riders, or FRR suggested by Gene Shermer.  
 Four new members were admitted to our club. LaVern, Harold, and Beverly Whitcomb, Faye Garwood was admitted as an honorary member, as she is 7-years-old.  
 Our leader handed out our project books for the coming year. We were assigned our first problem in our riding club manual, which we will study for next time. At our next meeting roll-call will be answered by the younger children with a part of a horse and by the older boys and girls with the breed of a horse and its origination.  
 Dale Garwood and Duane Shermer were appointed to give a demonstration on horses for next time. Bill Lierman and Gary Shermer were appointed by the president to serve on the recreation committee for next meeting, which will be held at the Ira Lierman home on Saturday night, April 19.  
 After the adjournment, Elaine Lierman and Dean Garwood, who served on the recreation committee for this time, led in some group games. Elsie Lierman, song leader, led group singing, accompanied on the organ by our leader, Viola Garwood.  
 A lunch was served afterwards by the mothers. —By Karen Garwood, news reporter.

## JOHN DEERE Truss-Frame Design means Rugged Strength with Extra Clearance!

Rugged strength and ample clearance—two plow essentials for fast, deep plowing behind today's more powerful tractors—are two outstanding advantages of John Deere Truss-Frame Plows.  
 John Deere Truss-Frame Plows stand the gaff because the shocks of hard work are distributed over the entire frame, instead of being concentrated on a single member. There are no curved beams... but instead straight frame bars, bottom standards, and cross-bracing... all heat-treated and rigidly held together by heavy steel truss brackets.  
 There's greater clearance because Truss-Frame Design opens up the entire plow frame... to permit deep, steady, fast plowing in trashy fields where plows of less clearance would choke up repeatedly. Ease of adjustment, operation, and servicing are added "plus" values. See us for complete details.
