Prairieland Talk . . .

8 Columns Not New to Oldtimers By ROMAINE SAUNDERS

LINCOLN-Instead of shrinkage that accom- . panies age, The Frontier has expanded to eight The afterglow of departed day gives way to encolumns to the page. That's what it was in its in-

one journeyman printer who did about everything. From the collection of watermelons, sweet corn, jars of honey and dollars that found the way into the "print shop" he pulled down \$12 a week for his knowledge of the "art preservative," and his efforts to keep a few Romaine

score pioneer patriots informed. Saunders of the latest shootings or a hanging out on Turkey creek, along with the editor's classic blasts at an envious contemporary.

See it now requires a force of several hands to handle the copy that comes from the weeping willows of the editorial sanctum.

Of course, O'Neill is a growing center of trade for an ever-expanding territory and Editor-Publisher Stewart is keeping pace, maybe setting the pace for the metropolis of the verdant and farflung prairieland.

. . . .

What this humble pilgrim knows about it could be expressed in one word, Nothing. But somehow we have our suspicions that not all that passes for worthwhile and constructive professional service is of any real worth. Soil conservation, erosion and "watershed" wisdom. Here they come with the title of doctor with a line of talk that draws a following, Today I asked a son of the soil who went through the days of the hot winds in the 1890's and made a success of farming, what he thought of the "doctors" who pose as erosion and conservation experts.

Said he didn't like to be critical but it appeared to him as a racket and if they came around a farm of his, proposing "conservation" methods, he would invite them to go jump into the lake.

The successful operators of farms and ranches are those who have learned from the expenience of a life-time how to operate profitably and have little consideration for the things they find entertaining at conservation gatherings and go back to their rural domains unimpressed.

The night is hot. Not a leaf or twig stirs.

croaching shadows. Out in the gloaming a lone katydid rasps his evening tune. The grinding hum of a power lawn mower, guided by some hand-waits. We never appre- slowed down the statehouse pace householder in the gathering gloom, disturbs the quiet of the early July evening. The lawn mower have since we're away. is silent and now off in the distance, beyond crowded street, beyond the dwellings of citybound humanity, comes the sound of machines gathering the ripened grain. Night has closed in. Machines are silent. A pale moon looks down upon the hot earth. Street lights cast steady rays abroad. House lights are out. Sweltering folks in the nude stand under the bathroom shower and home to make a night of it. And then our old re liable Nebraska wind sweeps out of the north with a fresh blast from the regions of the Arctic circle. Good night.

In Lincoln, state and city officials, the newspaper guys and milling crowds of notables and nobodies, always ready to give one of the great who enters the gates a respectful hearing, saw and them just before it freezes in Noheard the notable army man who had visions of vember or December. a seat in the white house. Looking down from the eminence above the steps at the north entrance of the state house upon the assembled Nebrakans grouped about the imposing figure of that notable Nebraskan, William Jennings Bryan, General Eisenhower addressed us as our guest of the evening of July 3. There is not much that a speaker can say under such circumstances other than the customary platitudes but after the work of the Chicago convention is over and the fireworks begin no doubt the political spellbinders will have something interesting.

Revised census figures give the population of the United States at 156,187,000. . . Young America was added to by the birth of 3,900,000 babies last year, if all were accounted for. . . port this week.

Even the title of "Rev." is being used to work a racket, and if gifted with a good line of gab you will gather a following, mostly sisters.

Automobile license plates Nebraskans are required to buy are lacking in decorative features to the worry of a lot of prairieland patriots, who point an envious finger at these plates of tin attached to cars from neighboring states. Did you catch the story in a recent national publication? Of all the thousands of automobiles that roll in and out of Washington over the bridges spanning the Potomac only the quiet dignity of a Nebraska plate on the rearend of a coupe caught the attention of the magazine writer who tells the story. Probably if an emblem is to be attached to the license plates the fellow riding a cultivator would propose an ear of corn, another patriot a shock of grain, another a sugar beet, and if left to prairieland dwellers out Holt county way they would want a steer in one corner and a bale of hay in one corner.

I asked a fourth grader why we celebrate the Fourth of July. To shoot off firecrackers, he said. The same question put to an 80-year-old. His reply was, To celebrate a battle. Chancellor Views Education

sired course of study needed for the Stuart public schools wrote to Chancellor R. G. Gustavson of the University of Nebraska. His reply was one all Nebraskans might as well read and we are happy to reprint it here:

Dear Mr. Yost:

The ideal courses for a ranching and farming community which would benefit all students as fully as possible, is, as your community is finding, a rather large order.

A high school education should enable all students, according to their abilities, to achieve certain ends.

The first aim is that they should be able to communicate with and to understand other people in reading, writing, speaking and listening. In short, they should be able to handle the English language with the facility that their abilities permit.

The second aim is the development and maintenance of a mature sense of "getting along" constructively with others. In family and married life, with employers and employees, with civic groups and with other groups. This is the very heart of young people learning to live well in both their local groups and in the larger world community of which we are all a part today.

Closely related, is the aim of citizenship, de-

The Stuart Advocate in search for the de- " continue their formal education beyond high school.

> In a ranching and farming community boys and girls should have the opportunity to train in high school to do farming, ranching or to develop homes more successfully. Stuart might consider advanced education, on a community basis, to help boys and girls to improve their career work after they have worked on their ranches and farms for a few years.

Boys and girls who have the possibilities of ng to college, and who will profit from that perience, should be prepared to do so. Colleges country over expect young people who come Blk I- Neelys 2nd Add- Atk QCD — Katherine Verzal to Robert & Mary Fullerton 7-2-52 \$100- Part of SE¹/₄ 32-30-14 going to college, and who will profit from that experience, should be prepared to do so. signed to encourage students to think through the issues he faces as members of a local community, and a much larger community. Students should learn the ways of democratic living. A good way to learn is through participation. They should learn, too, about the historical background in which they operate.

The fourth aim is to acquire some interests in, and achieve according to their abilities in the world of science. Great achievements of mankind are recorded in the world of science, broadly viewed, and in men's relationships with others. To understand this world it is necessary to have some knowledge of the scientific developments that have helped to make it.

A fifth aim is the development of interests in some of the literature, music, art and other parts of the heritage of young people, and it is the kind of expression that they should also learn in order to be well developed persons.

A final aim in the education of young people is health. During the high school age, students should learn not only to maintain good habits of health, but also should learn or improve in some athletics that they can continue into adult life. Health is both physical and mental, and high schools should not neglect either aspect.

These aims are basic to a good education. With this background students should be well prepared for entering upon their careers or further education. All of them should develop, through this type of education, the desire to continue educating themselves all of their lives.

Beyond this basic core that all students should have there is the question of further train- year; elsewhere in the United States, \$3 per ing for those who conclude their school and the year; abroad, rates provided on request. All question of preparation for college for those who subscriptions are strictly paid-in-advance.

For boys and girls in Stuart, the foregoing implies that help should be given to them in working out their life plans. I feel that is a particular obligation to help those go on to college who should go and who will profit from the experience.

The University of Nebraska has facilities available for help in planning such community programs as this. We will be glad to help you.
