STUART - Funeral services Mr. and Mrs. Ray Greenfield were Sunday afternoon, January

These steers required only 863 lbs. of eed for each 100 lbs. of gain with MoorMan Steer Mintrate.

Dr. W. P. Elmslie of Moorman's Research Laboratories says that one of the basic principles of their research was to develop a concentrate that

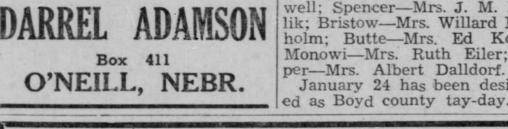

would fit any feeding program. "Whether you're dry lot feedinggrain feeding on pasture—or feeding roughage only", Dr. Elmslie says, "MoorMan's Steer Mintrate helps cattle gain faster and finish sooner".

This type of research explains why MoorMan's feeds have gained wide acceptance and why Moormans is one ginning with a covered dish dinof the fastest growing feed companies in the United States.

Because of this rapid growth, a local man or two is needed in this county to represent the Company. It is an excellent opportunity for an ambitious wide-awake man. Previous feed sales experience is helpful but not necessary. Many of our successful men did not have feed sales experience Saturday Will Be
