MORE Get-up- and-GO

MM AVERY "BF" Powered to do More Work on Less Fuel!

It's powered for top performance. The new Hi-Torque engine does the job—it produces higher compression for greater power on less fuel. That means better plowing at lower cost.

4-SPEED RANGES!
Hi-Torque power offers 4-speed ranges—not just 4 speeds. This lets you select the exact speed to handle each of your jobs.

DESIGNED FOR YOUR FARM!

Choice of three front-end treads, including single, Universal and standard adjustable treads. Matched MM Avery plows, planters, and cultivators help to retain moisture, saves valuable topsoil, improve yields and increases your profits. See us soon for complete facts and figures on the MM Avery "BF".

Bumper Crops TAKE A LOT OUT OF YOUR SOIL

Bigger yields from improved crop varieties and hybrids take more plant food out of your soil. As organic matter disappears, soil gets harder to plow, erodes more, soaks up less rain. Prompt manure spreading puts back most of the plant food that feed crops take out, prevents loss through fermenting and leaching. The organic matter in manure makes soil easier to work, helps prevent erosion, and lets your fields soak up more rain for future use.

FEED YOUR HUNGRY FIELDS

Like Your Livestock

It's so quick and easy to hitch up the Case tractor spreader that it's practical to haul whenever you get a chance. No lifting, no jack to fool with. The self-raising hitch rests right on the ground . . . lifts front of box when tractor starts . . . gives it an 18-inch running start in slick barnyards before taking up the load. Come in and see how easy it is to back up, how low to load. Ask for copy of "Handling Manure for Extra Benefits."

Built by world's largest manufacturer of spreaders and hydraulic loaders.

SOON WILL BE HERE! CHECK YOUR EQUIPMENT NOW — REGARDLESS OF MAKE, AND PLACE YOUR PARTS ORDER EARLY!
