As spring plowing gets underway on farms across the nation, none of the more than 4 million farm tractors in use will resemble this one. Henry Ford's first farm tractor, built in 1907, long since has been retired to a place of honor in the Henry Ford Museum, Dearborn, Mich. The 24-horsepower vehicle, which Mr. Ford called his "Automobile Plow," sports an engine with copper water jackets. Its rear wheels were taken from a binder. Despite its early vintage, it still runs.
