### Little Ones Make Less Noise

Next time your neighbor's power lawn mower threatens to give him, or you, a case of "power mower nerves," you might recommend the latest type of "swinging-four" safety-blades.

Lawn mower manufacturers have long searched for a quieter gasoline mower. Now they've proven that four small blades, mounted on a balanced disk, will do a thorough cutting job while engines run at a slower, quieter speed.

With the "swinging-four" blades above, the Huffly "Silencer" Mower is only about half as noisy as most gasoline mowers and the electric Hufflys make far less noise than a hand mower.

The young lady above is demonstrating the increased safety that is built into this cutting mechanism. Mounted on pivots, centrifugal force swings the small blades out to cut grass, weeds, brush and small twigs, but they bounce back when they hit a rock or other heavy obstacle instead of breaking or throwing the object.

**EWING NEWS**

Mr. and Mrs. Donald Payder and children from Kalama, Wash., are visiting relatives in Ewing and vicinity.
