## Einstein Is Frank About It

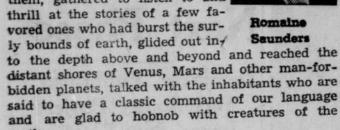

By ROMAINE SAUNDERS, Rettred, Former Editor The Frontier

MARION, IND. - Albert Einstein, the famed scientist who has toyed with the mysteries of nature and who has given to the world theories too deep for the most of us, at the age of 76 declines further public attention, saying he is now "a has-

Approaching and a step beyond the three-quarters of a century passing down time's highway, most all sense the same condition. Few are as frank about it as Doctor Einstein.

Scientists have a place in the complexities of human activities but they, too, must lean upon the staff of life which is the fruits of the toil-

worn hands of the commoner. And there goes to make up this human aggregation strutting across the scene some strange specimens with fantastic mental slants. There came a story from a southwest desert of a gathering of such individuals, one thousand of them, gathered to listen to and thrill at the stories of a few favored ones who had burst the sur-

One emotional sister told the desert assembled group that she had a "beautiful romance" with a Venecian Lochinvar. But a cheering word came from these space explorers—there will not be atom-

A magazine master of imagination begins his two-page offering by putting in caps, "WE ALL ENJOY . . . " Yes, there is at least one thing that "we all enjoy." But this literary cloud explorer was not thinking of sitting down to a good meal when you are half starved, but rather announces that all and sundry enjoy reading about the achievements or efforts at achievements of various personages when real or fancied tales may be a bore to you. It is said that everybody loves a lover. While that universal and all-inclusive attitude toward such things predominated in the time of Romeo and Juliet there seems to be a different reaction to royal romances at this period of tumult in all lands. As I write this 17th day of March, memory unrolls the scroll of years and I see writ upon its hallowed page that all enjoyed-Irish, Yankee, Bohemian or Scotchmen alike-pinning on a green ribbon and strutting the board walks and cow paths of a village called O'Neill and in the evening gathering at McCafferty's hall where John Harmon's dramatic performers gathered off of the streets and enacted 'Robert Emmet," the deep-voiced hero exclaimed, "O, Erin, mighty nation thou were once, though now the chains of thraldom bind thee fast to an unrelenting foe

The United Nations, through the medium of the economic and social council, toys again with a proposed calendar change that a world calendar group in this country has been spreading propaganda for for years. Preston Hotchkiss, the United States representative on the council, said at the annual session of he council that this government will support no action to change the calendar without the prior approval of congress. The proposed calendar change does away with the historic week and introduces a blank day feature as much as to say there is no sunrise and sunset at certain yearend periods. It would appear that there is trouble enough in national and world affairs without introducing such a thing to bring on more confusion.

One in every six American alcoholics is said to be a woman, and among the female population of our country the trend to alcoholism is greater than among males,

"To serve God, be a credit to my country and to make my city a better place in which to live," to this program 30,000 teenage youth of Chicago, Ill., have committed themselves during ceremonies held at the International amphitheater marking the beginning of a movement in that great throbbing center of good and bad humanity to combat uveile delinquency. The most eloquent of all the oratory on that occasion came from a girl, a shoplifter, when she said, "I can tell you that to be a delinquent is no fun." Had the wag who crashed into the county treasurer's quarters here in Marion the other night and made away with \$476 been given the opportunity as a teenager to have identified himself with such a group of youth minions of the law would not be on his trail today.

All is quiet on the Potomac. Nothing noteworthy on capital hill . Congressional scenery stale, flat and uninteresting since Senator Joe has been relegated to a backseat.

Stanley Weinstein, a Marion high school senior, has perfected a telescope that carries him in vision to the moon and other heavenly bodies. His homemade telescope magnifies 96 times and brings the hills and valleys or whatever they are on the moon out clearly for the young star gazer to study. Three other young men, students of the high school, are devoting time and study to radio, explaining that it gives them experience they feel will be helpful in their chosen professional careers after school has been finished. These young men will doubtless be heard from otherwise than as "juvenile delinquents." Youth who devote themselves to worthwhile undertakings are the ones who become worthwhile citizens.

A Pennsylvania town reports 35 applications for the job of dog catcher, generally supposed to be at the bottom of the political ladder. Whether the urge to get a hand on stray dogs or the lure of the \$3,800-a-year salary is the incentive has not been officially disclosed. . . "I don't figure my age is any of the government's business. I don't ask them no questions and they don't need to ask me none." That's how an oldtimer up a mile high in Denver, Colo., feels about it.

The budget of a few hundred million dollars voted by the Indiana legislature includes eight and a half millions for bonuses to go to veterans of the Korean battlefields whose homes were in this state. Thirty thousand public school students have visited the legislature during the 1955 session. A polio fund of \$15,389 has been raised in Grant county through the recent march of dimes. One labor union group and the Moose lodge contributed checks totaling \$675.

"A woodpecker pecks out sawdust when building a

He works like a nigger to make the hole bigger-He doesn't bother with plans of cheap artisans, But there's one thing can rightly be said, The whole excavation has this explanation-He builds it by using his head!"

An Episcopal church group down in Tennessee, in deciding to pay the expenses for Mrs. Florence Greenwood to accompany her husband to a convention in Hawaii, explained: "Husband can't be allowed to go running all over the globe

A couple riding in their automobile when the car went out of control, missed the bridge and plunged into the Mississinewa river. The husband got out. His wife's body was recovered three days later three-quarters of mile from the point of

The earth has 141,055,000 square miles of water and 55.885,000 square miles of land. At the end of the trail the most anyone can claim as his is a six-foot strip.

Editorial

# Make Trucks Pay Way

(Guest editorial from the Valentine Republican) Senators Anderson, Hoffmeister and Cole have introduced in the Nebraska legislature LB 362, designed to offset the advantage enjoyed by big commercial trucks over automobiles and small trucks. This bill would apply a ton-mile tax to huge commercial trucks, but would not apply to smaller commercial trucks or to any farm or local truck.

The owner of a large truck uses the highway for a business profit. Such use is many times that of the automobile when both weight and distance are considered. The trucker bases his charge upon the weight he carries and the distance he travels over the public highway. Why then should not the tax for use of the highway for profit be so meas-

The gas tax is not a fair charge for such use. It does not give enough consideration to weight. A small truck or automobile, weighing under two tons and averaging 15 miles per gallon, carries a ton of weight approximately 30 miles for six cents tax. A diesel truck, weighing 30 tons and averaging five miles per gallon, carries a ton of weight 150 miles for six cents tax. Thus the automobile owner pays five times as much tax as the diesel truck owner.

The added cost of building highways necessary for big trucks is not included in the above comparison. All highway builders will tell you that highways would cost only a part of their present cost if built only for automobiles and small trucks.

Neither is the tax advantage enjoyed by large trucks offset by the license fees they pay. The license fee paid on a heavy truck will offset the tax advantage enjoyed by the truck over an automobile until the truck travels 16,000 miles. From then on, and most trucks travel 75,000 to 100,000 miles per year, the truck enjoys the tax advantage cited

We heartily recommend passage of LB 362, and urge our readers to write their senators in support of it.

Best guess is the Tuesday, April 5, municipal election will be a humdinger in O'Neill with considerably more interest than normally. Regardless of how you vote, be sure to go to the polls next Tuesday.

This is the time of the year when the man who has been lazy all winter starts complaining about spring fever.

'The national guard tank company in O'Neill is now a reality.

There is no place like Nebraska,

### Reds Use Island for Talking Point

It is hard for Americans, sure of their own nonaggressive purposes, to understand how other peoples may feel about American operations in far cornors of the globe. Particularly do Asian peoples, sensitive from their colonial experience, feel that American military forces are defending the United States very far from home.

The Formosa Strait offers a natural bufferan unusual opportunity to draw a clear line. Crossing it would plainly spell aggression. Actually the United States sought to draw that line with its declaration on defense of Formosa. It intended to disengage cleanly from Chiang's project for invading the mainland. But the islands, plus certain military and political crosscurrents, have been allowed to blur the picture.

There has also been a hope in Washington, D.C., that the coastal islands could be used in bargaining for a cease-fire. But Peking shows no interest in a cease-fire. Quite possibly the reds prefer to use the islands as talking points at home and abroad. If they would rather push the United States out, why bargain?

The bargain Washington might better be interested in is trading the military and phychological incubus imposed by support of the nationalists on the islands for a clean and plainly defensive line in the Strait of Formosa. In such a bargain it could win the confidence of many Asians and turn them against a Peking move on Formosa. It could strengthen its own position militarily and morally.
