Sinkside Beauty Aid

The same creamy white baby lotion that you use to protect baby's tender skin can double as one of your beauty aids that will work for you while you are working at your daily round of household tasks.

It may not have occurred to you that washing a sinkful of dishes could be turned into a beauty treatment, but it can be if you wear rubber gloves and cover your hands with the baby lotion before you put them on. When you dip your hands into the hot water, the skin will perspire freely within the rubber gloves, opening up the pores to the soothing lotion. Your hands will come out of the dishwasher softer and smoother than when they went in.

A heavy cleaning job will sometimes leave dirt so firmly imbedded in the skin and under the nails that you despair of ever getting rid of the grime. This won't be likely to happen if you rub baby lotion over your hands and under your nails before you start. The film of lotion will act as a buffer between the dirt and your skin, making it much easier to get your hands and nails clean again.

To prevent reddening and chapping in cold weather, keep a bottle of baby lotion where it will serve as a reminder to use it every time you wet and dry your hands. And, by all means, smooth the lotion over your hands and wrists before you hang out the wash on a cold, windy day.
