To cut haying costs— sweep and stack with a FARMHAND

ELIMINATE UNNECESSARY HANDLING . . . get your hay off the field and into the stack in half the time. With a FARMHAND and HAY BASKET you buck windrows at 15 m.p.h., carry half-ton loads direct to the stack. In just 30 seconds you raise huge loads to top the highest stacks. One man sweeps and stacks 5-6 tons per hour with a FARMHAND. Hay harvest cost studies prove that loose hay harvesting with a Hi-LIFT LOADER costs only half as much as any other method.

BUILD TIGHT 27 ft. stacks with Farmhand Loader with Hay Basket and Push-Off. The Farmhand way requires only 2 men, takes less labor, harvests more hay per hour. And with Grapple Fork Attachment you can break hay out of the stack in half ton bites as easily as you put it in.
