Crippled Children Clinic August 11

A crippled children's extension clinic, under the auspices of the services for crippled children, state department of welfare, will be held at the O'Neill high school on Saturday, August 11.

Clinic registration will begin at 7 a.m., and all registration should be completed by noon.

The clinic is for diagnosis, consultation, checkup and aftercare service of cases receiving treatment. Children who are not now receiving services under the program of services for crippled children may be admitted to the clinic when referred by their local physician.

In addition to orthopedic cases, children with cerebral palsy and children with rheumatic fever and congenital heart disease are eligible for care.

The clinic serves nine counties in this area. The Elks lodge is furnishing, without cost, a noon lunch to all children and their parents who are registered for the clinic examination.

Kimball County Has High Wheat Yield

One of the best wheat harvests in history is winding up likely the total yield might go in western Nebraska.

Observers said it appeared over four million bushels.

Yields on south table, where most of the combining had been completed, averaged around 20 bushels to the acre, better than the south half of the county had done for years.

Hail, drouth, disease and wind wiped out crops in some spots the past seven years.

Grimton Reunion—

VENUS — The 19th annual Grimton school reunion will be held Sunday, August 19, at the usual place.

Picnic dinner and supper. Coffee and iced tea will be furnished, according to Mrs. Albert Pospeshil, publicity chairman.

Mars requires 867 days to go around the sun.

FARMING AND SAFETY

It should come as a distinct shock to everyone to learn that farming is the third most hazardous occupation in America. Farmers have always known that their job is a hard one, calling for long hours, careful planning, a keen understanding of the close relationship between nature and science that are necessary to produce enough food each year to feed more than 150 million people—not to mention much of the rest of the world.

However, perhaps even the farmer does not realize how hazardous his job really is.

According to the Association of Casualty Companies, which is cooperating with the president's conference on industrial safety to emphasize the need for great-occupational safety, one farmer

in every 15 is temporarily or permanently injured while plowing a field, milking a cow, riding a tractor, or doing any number of other chores.

Last year in America, more than 327,000 farmers suffered disabling injuries on their jobs; 4,700 others weren't so lucky. They were killed by falls, machinery, animals, or other "potential hazards."

Statistics show that 22 percent of disabling injuries on farms occurred last year between January and March; 26 percent from April to June, 31 percent from July to September, and 21 percent in the last quarter of the year.

Japan has seven people per arable acre of land.

Japan had 106,000 foreign visitors in 1955.
