Since it was established in the year 1880 by the versatile Doc Mathews, whose glowing word pictures of "God's county" had much to do with bringing in settlers, and hasn't missed an issue since the first copy came off the Washington handpress, The Frontier has been an inspiration of other publishers throughout North Nebraska to "go and do likewise."

Romaine

It was the first to publish a day earlier, the first to enlarge to an eight-column page, the first to print stories illustrated with pictures of those mentioned in the news, and the first to go on the air. And it is one of the very few that still has the courage of editorial expression, and sometimes the editorial slants carry plenty of punch.

Ten years ago it ranked far behind three or four other papers in the area in terms of circulation. Today, it has outdistanced them all with something like a 1,200 percent increase. while all other papers have remained constant. Such a record requires tremendous work and effort and The Frontier staffers know what it's all about.
