LIVING

How NPPS helps your "electrical servants" work for less

Lower cost power means more electrical servants for the average Nebraska home. Through public power, Nebraska's electric rates are among the lowest in the nation. The average home owner in Nebraska pays from 25c to 95c per month less for electricity than home owners in eight surrounding states. And, the use of electricity in Nebraska homes is far above the national average ... in fact, 17% greater than the average use of elec-

tricity in the eight surrounding states. More power at lower cost, so you may enjoy even more of the comforts and conveniences of modern, better living ... electrically, is the goal of NPPS, Nebraska's major power generation and

for Nebraska's Expanding Needs

transmission agency.

# Nebraska Public Power System
