**CONSUMERS HAS BUT ONE RESPONSIBILITY... It Is To Supply Low-Cost Electricity To More Than 360,000 People**

More than 360,000 people, representing nearly a fourth of Nebraska's entire population, depend upon Consumers Public Power District for an adequate supply of low-cost electricity.

Their use of electricity has doubled in the last ten years and, based on present forecasts, will double again in the next ten.

The responsibility for meeting this increasing demand, at the lowest possible rates, rests solely with Consumers.

Therefore, Consumers can allow no other considerations to interfere with the successful fulfillment of this responsibility.

As a result, Consumers is scheduling additional facilities, such as the atomic power plant at Hallam, so that they will be ready before, not after, the need for them arrives.

You can depend on
