Our country's history shows that our most shining hours have always followed the blackest times. A force seems to light our way through the darkness of reverses to achievement and victory.

What is this force? Faith! Faith in Divine Guidance . . . faith in our leadership . . . faith in our democratic principles . . . faith in ourselves.

So reads our country's history: from the Pilgrim fathers through the great wars . . . from pioneer times through the great depression . . . when all else was gone there was faith. The very core of our modern existence, our giant industry, our abundant farms, our health and prosperity have been brought from the wilderness across the bridge of faith.

It was such a faith . . . faith in its product and faith in the people it would serve that caused Kansas-Nebraska to bring the wonder fuel, Natural Gas, to the communities it serves. In the past quarter century that faith has been justified . . . and has been renewed so that in the ensuing years even more benefits to the people of the Great Plains areas of Kansas, Nebraska and Colorado will be derived from the truly miracle fuel.
