Former O'Neill Man Named Assistant

Gerald "Bud" Daily of Grand Island and formerly of O'Neill has been appointed conversion assistant for the Grand Island district of the Northwestern Bell Telephone Company. He was announced today by H. Petersen, local manager.

His principal duties will be that of assisting O'Neill rural telephone companies in preparing their lines for dial service. He will be available to help those groups who own their own lines with engineering and construction supervision. Daily has had a varied experience since joining Northwestern Bell's Construction department in 1948. He is well acquainted with the O'Neill territory, having served as an installer and repair-

man for the O'Neill office from 1948 to 1951. Since July 1958, he has been working at the Grand Island office of the company.

Meetings have been held with all companies owning lines in the O'Neill rural area in recent weeks at which the need for rearranging and rebuilding lines has been discussed. Dial telephone equipment is designed to serve no more than eight customers per line and all lines must be metallic or "two wire" lines. The planning has now advanced to the stage where actual engineering and construction can begin and Mr. Daily will be available to help all these companies Mr. Petersen said.

Steps Taken Monday

At the invitation of the Atkinson Chamber of Commerce television committee, Frank J. Brady, chairman, representatives from eight towns in this vicinity met at the Steak House and unanimously favored

ored immediate action on the proposal. The 25 men present here Monday night organized the North Central Television Association, which will spearhead the satellite promotion. They named Brady as chairman and Ron Shonka of Atkinson as secretary. Towns represented in the group were Basset, Stuart, Atkinson, Butte, Spencer, O'Neill, Chambers and Ewing. Other towns in the area will be invited to join the effort.

"Most of the towns in north-central Nebraska are in the remote fringe area of television reception," said Brady, "and consequently have no dependable program reception from any station. We get fringe service—very poor most of the time—from stations to the north, south and east of us, the best coming from a South Dakota satellite.
