Ham and Cheese
Dish Is Delicious

This unique cheese and ham main dish could well be that something "hot" and "hearty" you serve for a buffet supper or to the young crowd that gathers to spin records, says Bill Perry, route supervisor of the Meadow Gold Dairy. It is easy to prepare too, for well filled sandwiches are simply baked in a tangy, custard-type sauce.

Developed by Beatrice Cooke, director of the company's Chicago test kitchens, the unusual sauce is made with buttermilk, a product now being featured by the dairy.

CHEESE HAM PUFF
(Four servings)
8 slices day old white bread or 4 English muffins, split
1/4 cup butter, softened
8 slices cooked ham
8 slices process pimento cheese
3 eggs, beaten
2 cups buttermilk
1 tablespoon grated onion
2 teaspoons horseradish
1/4 teaspoon dry mustard

Spread bread slices with butter. Arrange 4 slices on bottom of buttered 8-inch square pan. Cover each with a slice of ham and cheese. Repeat layers. Combine eggs, buttermilk, onion, horseradish and dry mustard. Pour over all. Bake at 325 degrees for 1 hour. Serve immediately.

Increased Operation Costs Prompts Request for Increase In Telephone Rates

The Public Telephone Company announces its intention to file an Application with the Nebraska State Railway Commission for authority to increase telephone rates for local service at its Arnold, Callaway, Oconto, Stapleton, Ewing and Page exchanges. The proposed monthly increases range from 25c to \$1.25 depending upon the class of service furnished.

Maintenance material costs and taxes have increased substantially since the last general rate adjustment in April of 1952. Company management has found it necessary to make certain wage adjustments to certain of its employees from time to time since the year 1952. Other employees have not received any wage increases since the last rate adjustment. Several of our local employees are requesting an upward wage adjustment at this time and it will be necessary for the Company to obtain rate relief in order to grant the needed wage increases.

Approximately 56% of the additional revenue that would be derived from the proposed rate increase would be used for local employee wage adjustments. Various forms of operating taxes would take 21% of the added revenue. The remaining 23% would be available for debt service and the purchase of new plant materials.

Customers desiring information on the exact amount of the proposed rate increase applicable to their class of service may obtain this information from the local telephone manager.

WHEN BETTER AUTOMOBILES ARE BUILT BUICK WILL BUILD THEM

Watch Dale Robertson in Tales of Wells Fargo on NBC-TV Monday Nights

Along with the most talked about style on the road today goes performance new even to owners of previous Buicks... and too great for you to miss.

Buick '59 is livelier yet smoother, more powerful yet thrifter, as any previous Buick owner will tell you. And credit goes to the turbine smoothness of Buick transmissions, plus the new responsiveness of Buick "Wildcat" engines.

At the wheel, too, you'll find new handling ease and finned-brake sureness that owners put high on their "most liked" list.

But that's far from all these owners tell us. They talk about new operating economy from the most efficient power plant on the road today. About quality of finish and detail, and of quietness that even beats the best of Buick heretofore. They speak of reliability... and they speak of the pure pleasure of owning a Buick '59... in ways that warm the heart.

But the best spokesman for Buick '59—and what it can do for you—is a Buick itself. Why not go to your Buick dealer and get the inside story, today?
