Clark-McNary Trees To Be Available in 1960

The County Extension office announced this week that there will be a good supply of Clark-McNary trees available for 1960 windbreak and woodlot planting. These should be ordered early to avoid last minute shortages.

Christmas trees will also be available for 1960 planting. These trees are Scotch and White Pine and Douglas and Concolor Fir. County Extension agent A. J. Snyder also said that farmers should take seed and soil samples early and send to laboratories for analysis. He noted that the best time to get the samples is now before the heavy winter frost sets in. This would give ample time to make plans for next year's fertilization program.

Profit Clinic

Set At Norfolk

Neil Dawes, Holt county extension agent, announced this week that a "Farm Profit Clinic" will be held at Norfolk, February 10. Farmers and ranchers from 11 Northeastern Nebraska counties are invited.

Dawes stated that a full day of activity for those attending will include discussion in the general areas of minimum tillage, increasing pasture profits, new developments in irrigation and new developments in crops and fertilizers.

A free lunch will be served at the meeting.
