## Letters to the Editor

### THE CHAMBERS MERGER

Since the plan for the Chambers school reorganization proposal has become active some additional information has been received that will be of interest to the entire area.  
The State Reorganization Committee has approved the plan for the Chambers area. A letter from the State Committee to Miss French contained the following comments. (Quote)  
"The Committee voted to commend the Holt County Committee and the people in the Chambers area for finding a satisfactory solution to the educational problems in their area. The members of the committee feel that the people in the Chambers area have educational problems which seem to be peculiar to their area and that every effort should be made to organize a district which has enough resources and pupils to provide the best educational opportunities." (End of quote).

This gives us confidence that the State Department believes in the existence of an adequate high school for the Chambers area.  
The Chambers high school has been on the fully accredited list of schools much longer than many other schools of similar size and when the inspector from the State Department visited the Chambers school the past year the school was informed that it could not expect to remain on the accredited list much longer. When the question was asked, "Why?" the following answer was given.  
"The present Chambers district is too small to provide the resources that would be adequate to provide for the best educational opportunities."

Next year the school will be classified as minor accredited. A favorable vote for this reorganization plan would enable the Chambers school to regain and maintain an accredited status.  
Some persons have asked, "Where will our rural schoolhouse be located after reorganization?" May I give an illustration to help explain why this question is difficult to answer. First of all there is no authority at the present who is able to give out such information. It would be somewhat like selling a man a farm then telling him where he was to locate the buildings on his own property.  
This new school district will be yours to operate as seems best to you. Since the new school board will be composed chiefly of the rural area you will be making

plans that will best accommodate your needs.

Plans are being set forth to promote a democratic representation of the rural area and to keep it that way. See the board members of your local district for information on this matter.

The matter of a high school district alone has been suggested. From the recent reports by the State Department this type of organization is on the way out and does not seem to be a satisfactory solution to our needs. The County Superintendent or your local school board can give you information on this matter.

There are other districts waiting to join this proposed reorganization plan according to a number of reports. A favorable vote of the State Committee can make the responsibilities even easier to meet.

This whole plan needs your careful consideration as to whether you want a high school in the Chambers area, serving the Chambers area or not.

If you do vote "For the reorganization plan," at the Town Hall in Chambers on June 8.

Superintendent  
Chambers Public School
