Editor

O'Neill, Nebr. Oct. 5, 1960 Dear Editor: The State Board of Education with a appointed Commissioner of Education was adopted by the State of Nebraska in 1952. The State has operated under this plan for eight years and has made

great strides forward in the field of education. There is still very much to do and changing our present system will not only block additional progress but erase many of the forward steps that have been made during the past eight years. We cannot let this small group, backing the amendment win the battle. They will seek lower certification standards for teachers and schools. With the shortage of teachers and the insecurity teachers have in Nebraska the passing of this amendment would strike a blow to the teaching field that would make it very difficult, if not impossible, for Nebraska to hold good teachers. In order to retain our present system, by that I mean an elected board with an appointed Commissioner of Education, we must vote
