

Custom Imperial Range, Heirloom Maple Finish Cabinets, Micarta Counter Top... all by Westinghouse

6 Westinghouse features make cooking simpler, clean-up easier

1 Cook the way you want! Surface Units can be "fine-tuned" to any degree of heat, rather than jumping the control from low to medium to hot. You can dial the exact in-between heat you want.

2 With the 1961 Westinghouse Electric Range, all your utensils (even glass) can be automatic. The Safety-Matic Unit automatically maintains the heat you dial. Food won't burn even if pan boils dry.

3 Your roasts stay hot, tender, and juicy hours after they're cooked. Exclusive Roast Guard keeps them from drying out or over-cooking. You can hold the dinner as long as you like if guests are late.

4 New Two-Step Clock Timer is utterly simple. You set one control for the time cooking should start. You set the other control to the time cooking should stop. Dials are easy to read, easy to set.

5 Surface Units plug out to make cleaning easier than ever. Drip pans and chrome rings come out for cleaning at the sink. Oven heaters plug out, too... to make entire oven easy to wipe clean.

6 Oven door lifts off so that you can easily reach into the farthest corner. You don't have to be double-jointed to reach around the open oven door. No cracks or crannies, or sharp corners to catch dirt.

This sleek 1961 Westinghouse Electric Range brings you a new sense of mastery and control. It does exactly what you want it to do so that you can cook creatively, at your best. No complicated panels. Everything is so simple.

And cleaning is far easier, because everything comes out to clean. No poking in, under, and around. Cleaning is a breeze, so it's easy to keep this range looking like new.

Of all electric ranges, this is the outstanding buy. So, see your Westinghouse Dealer soon. Remember, you can be sure... if it's Westinghouse.
