

Above, specialization has been carried further by poultry producers than by most other farmers. Some no longer even raise their own replacement pullets . . . they prefer to arrange to buy them from someone else. By doing this they are able to concentrate completely on producing as many high quality eggs as possible. This practice, while not as far advanced, is being used by dairy, hog and cattle men.

Above right, shelled corn harvest is becoming more common throughout the country wherever corn is produced. Major advantages are reduced field losses, earlier harvest and more complete use of equipment. Pace setting farmers want to harvest all of the crop they produce. Elimination of high field losses makes the difference between profit and loss.

GEIGY—creators of chemicals for modern agriculture

depend
upon

DIAZINON
INSECTICIDE

to control flies in dairy barns

You'll find it pays to spray with Diazinon—just one residual application on dairy barn walls and ceiling, kills flies for weeks.

Diazinon saves time and labor, gives you lower cost per day of protection. So spray less . . . pay less for effective fly control. Ask your farm supply dealer for Diazinon—one of the safer phosphate insecticides.

MORE WORK

Your Allis-Chalmers dealer will demonstrate in the field . . . for you . . . why a new D Tractor does up to $\frac{1}{3}$ more work than your present tractor on the same amount of fuel. You'll see why the TRACTION BOOSTER system keeps you on-the-go . . . adding weight automatically when the going gets tough . . . releasing weight to save fuel as the load lightens.

Across the country, many new D Tractors are working from 25 to 45 percent more land than other tractors on the same amount of fuel. Your Allis-Chalmers dealer will give you a proof-test in the field. Also, he will prove the dollar-making difference of these other tractor features: Power Director (The Big Stick), SNAP-COUPLER hitch, Power-Shift rear wheels, and Roll-Shift front axle. You'll find out how you can save money . . . and farm faster and easier than ever before.
