"No yearly 'spring break-up' headaches around here since we got our concrete streets!"

You won't find springtime potholes, ruts or washouts on modern concrete streets. No bruised tires or frazzled tempers. No patching crews blocking streets.

Rigid concrete spreads the traffic loads across the spongy, thawed ground beneath it. And a concrete street has the strength and thickness to keep "frost boils" from working through the pavement.

That's one good reason upkeep costs stay so low. You keep on saving money year after year with all-weather concrete streets.
