## Concrete

**"Concrete streets certainly added to the safety of our neighborhood!"**

Peace-of-mind goes with concrete pavement! Its grainy surface assures safe, sure stops—gives you dependable skid resistance—even in wet weather. It stays smooth and level, too. There are no potholes to cause dangerous swerves. You're always in control of your car.

And because clean-colored concrete reflects light four times more than any dark surface, you can see and be seen far better at night—a real comfort, driving or walking.

Yet with all this built-in safety, modern concrete offers moderate first-cost and continued low maintenance. Reasons enough to make it the preferred pavement for residential streets everywhere.

Get together with your neighbors!

If your street needs paving, make your preference for concrete known. Concrete is the only pavement that can be accurately engineered to carry the expected traffic loads on your street and lasts 50 years and more.
