

## Report from Washington

By Congressman Dave Martin  
Fourth District, Nebraska

This week the House Committee on Interstate and Foreign Commerce approved a bill which would, if it becomes law, require the manufacture of TV sets to add 70 ultra high frequency channels. Thus, instead of receiving channels 2 through 13, as at present, 70 additional channels would

have to be added. It would be a year after the bill becomes law before it would become effective, and then TV stations broadcasting on the new channels would have to be built before it would be of any use.

Price supports on milk were dropped by Secretary of Agriculture Freeman, effective on April 1st, from \$3.40 to \$3.11 per hundredweight, and the price support on butterfat was dropped from 60.4c to 57.2c per pound. Cause: unprecedented stocks of

both milk and butterfat in storage.

The House Agriculture subcommittee handling the feed grain section of the farm bill approved this section by a split vote. It now goes to the full committee for action and a vote. Another section of the bill — to set aside land for recreational purposes — was rejected by the subcommittee handling this phase of the bill. The new agriculture bill should reach the floor of the House for action within the next few weeks. Continuation of the present feed grain law will be the main feature after the smoke clears.

The recent settlement of the steel negotiations, in advance of the expiration of the labor contract, should help a sagging economy. This will allow steel production to proceed uninterrupted and should help other industries to maintain a steady level of production. If a strike had taken place in the steel industry, we would have witnessed a strong demand for legislation to prohibit monopolies in the field of labor. There is strong sentiment building up in the United States for such legislation.

The Veterans Administration has had \$300 million in funds to use for housing. This money was

appropriated by Congress last year and has been on hand; but, yet, the VA issued orders last October to stop accepting loan applications. When Congressman Ayers of Ohio recently smoked out this situation, an order went out from Washington to immediately begin furnishing direct loan applications to veterans on the waiting list.

Last week the House passed the Administration's new tax revision bill. Section 2 allows a 7% tax credit, under certain circumstances, to businesses and farmers which would reduce tax revenues to the Federal Government by \$1.2 billion a year. With a \$7 billion deficit for this fiscal year staring us in the face and big spending programs being added regularly, I felt that this bill was fiscally irresponsible. I voted against this tax cut with a resultant larger deficit. Congressional staff experts have predicted another Federal deficit for the next fiscal year, which ends June 30, 1963, of \$4.3 billion. This is in contrast to the Administration's predicted surplus of \$463 million for next year. Unless Federal spending is curtailed sharply, the debt will have to be raised twice more within the next 15 months. There is only one answer — stop spending!

## Venus News

By Mrs. Ralph Brookhouser

Mr. and Mrs. Arthur Safficeol, Craig and Steven, Mr. and Mrs. Clarence Finch Jr. and Randy and Mr. and Mrs. Gordon Gentzler Tilden were Saturday, Mar. 31 evening dinner guests in the home of their parents, Mr. and Mrs. Clarence Finch Jr.
