HOT WATER

An Electric WATER HEATER

In Nebraska, where ELECTRICITY is plentiful and economical, the advantages of modern ELECTRIC water heaters cannot be matched. Every up-to-date home needs the CLEAN, RELIABLE, LOW-COST performance of an ELECTRIC water heater.

And about operating cost: an ELECTRIC water heater puts most families who cook electrically (and who doesn't?) into the low rate bracket. So average family hot water consumption of 300 kilowatt hours per month can actually cost as little as \$3.30. So compare if you dare.
