The victory was ning is being followed, and that the first in the series for the North, coached by Don Leahy of Creighton Prep.

An important factor in the upset was 165-pound halfback Jerry Kilcoin of O'Neill. The former OHS gridiron star carried out all of his assignments perfectly, caught a screen pass for 13 yards that moved the north to the ten yard line and helped set up the North's first score.

Jerry saw considerable action throughout the game after earning a starting position among the "cream of the crop" of Nebraska High School football stars of the 1961 season

Clark said ethical procedure would be to discharge his firm and pay them off before consultation with the Mid States com-

Clark also said his firm had designed several schools with the auditorium-gymnasium as the central part of the building, including schools at Hershey, Elmwood, Shelby, Harvard and the Girls' Training school at Geneva.

Smaller schools, those with 350-375 students, usually cost in Nebraska about \$900-\$1,000 per pupil for elementary students; \$1,100-\$1,200 per pupil for junior high; and \$1,600-\$1,800 for high

Clark said he inspected a Belleville, Kan. school built by the Mid States firm of similar design to the Creighton building. Each classroom in the Belleville school is a "concrete block cell with windows and a door," he explained, and have about half the usual amount of windows.

In addition there are no shelves, cupboards, teachers cabinets, wardrobes or storage, no steel columns support beams and 'their heating system won't work", he added.

The cost per square foot is low because a great proportion of the building is gymnasium and locker-dressing room, a comparatively low cost space.

In schools, as in other lines, you get just what you pay for, he said.

After Clark showed slides of schools of similar design the meeting was adjourned.
