ON LIFE'S THRESHOLD.

Young Tommy, a Goat, a Hose and a Pretty Grave.

A dear, benevolent old gentleman gave to so enfant terrible a fine goat. This was a few days ago. The youngster was naturally delighted with his pet. His gave out vaguely to his friends and enemies that he was train-ing an animal which would be a terror to the neighborhood. Doubtless the goat would have proved a very disturbing element in society if its youthful owner had not trained it a trifle too fine.

It came about in this wise: The goat-and of this there is no doubtstood badly in need of a washing. Tommy, as its owner may be called for the occasion, is not generally overfond of washing, but as regarding goats he was an ardent lover of cleanliness. So he got a garden hose and attached it to a hydrant. Then he tied up the goat securely and played upon it till the animal's hair was as clean as the streets of Pittsburg will be at the millennium. Then Tommy fell to communing with him-

"If," reasoned he, "the goat was so dirty outside, he must be very far from clean inside.

This seemed conclusive to Tommy's companions, and they consented to hold the goat while he effected the internal purification. Tommy inserted the nozzle of the hose into the goat's mouth.

It is a painful subject.

Reasoning from Analogy.

A4-year-old miss lately created a good deal of consternation, not unmixed with amusement, in a small social circle uptown. She had been on a visit to her grandfather, and while there was in the habit of playing with him as he lay, half asleep, on the sofa. One day, as her chubby fingers glided caressingly over the old gentleman's scant locks, he murmured drowsily, in reply to some infantile remark: "Yes, Vm your poor old bald headed

grandfather." One evening not long afterwards, a young old bachelor was making a call on the family, towards a certain member of which, only 18 and decidedly pretty, he inclined with very tender feelings. Into the pleasant circle where the bachelor sat flashing bright nothings of society talk, entered the 4-year-old. Unseen by the gentleman she sauntered around the room inspecting him, and gazed with especial interest on his polished scalp which gleamed in the light of the chandelier. Suddenly, with a burst of ingenuous sociability, she threw herself at his knees and exclaimed: "Whose poor old bald headed grandfather are you "-Philadelphia Times.

The Pocket in His Night Shirt.

The precocity of eight-year-old boys has often been the theme for newspaper comment, but I think I know of one who is entitled to particular distinction for his brightness. The other day he importuned his mamma for a night shirt "just like papa's," with a pocket in it. His mother made him one, and the first night he wore it he went to bed in high glee. In the morning, when his mother took the robe off, she found in the one pocket a couple of seed cakes, three matches, a toothpick, a small silver watch, several pieces of cough candy and the boy's pocket bandkerchief. When the little fellow was questioned as to the reason for the varied assortment he replied: "Weil, I thought if I got hungry in the night time I would need the seed cakes, and of course I'd want the toothpick afterward. If I wanted to see what time it was by my watch I would have to have a match, and I was afraid of coughing, so I put the candy there." What the Hoe firm has since done in its experiments in this direction of course I do not know, but there is a man in New York now working very nearly on this line who will soon have his invention in shape to patent. The principle upon which he depends is a "photoglyptic stereotype," as he calls it, in which the stereotype sheet is made directly by the camera, very cheaply and with clearer and better results than any common stereotype can give, as the matter is photographed on to a matrix already curved to the shape of the cylinder by an arrangement of lenses which he has kept secret. You know the common matrix is made flat and then bent into a curve before the metal is poured upon it, thus naturally blurring and crushing the fine edges of the letters and the lines of the illustrations, so we seldom get a satisfactory picture from a rapid press.-Chicago News.

Ex-Governor Cornell's Stone Quarry.

Ex-Governor Alonzo B. Cornell is interested largely in tin ores dug up at the Black Hills, and his Broadway office is littered with samples, rough and refined. He lately acquired a quarry of stone in the Catskills, which promises to prove more than a gold mine. It is remarkable that, rich as it is, it never was worked, but lay unknown in the hands of some one who evidently did not ap-preciate its value. There are acres and acres of it, with sandstone, granite and black marble in large quantities. There is also a fourth stone known to be durable and curionsly beautiful, because of shells mixed in with the body of the stone. It polishes up handsomely. But the handsome stone of the quarry is the black marble. Nothing equal to it has been discovered on the continent, and it is surpassed only by the black marble of Italian quarries. It is susceptible of a lustrous polish, and its grain is so fine that for the sculptor it affords good opportunity. -New York Sun.

Ignorant of French Law.

A Paris dispatch reports that "a Polish lady in straitened circumstances has just been fined for raffling a richly embroidered shawi, her own property. She pleaded that she was ignorant of French law, which does not permit the 'raising of the wind' by this means; explained that her husband had lost his property, and stated that owing to the fall in the ruble, the allowance made her by her relatives in Russia often proved insufficient. She adjured the court to overlook the offense in the name of her father, who had fought for France and had been decorated on the battlefield with the cross of the Legion of Honor. But the fine was inflicted, nevertheless, and the shawl, which figured at the exhibition of 1867, has been confiscated into the bargain. Some knowledge of local rules and regulations is certainly necessary in these days."-Boston Transcript."

Latest on the Tennis Lawn.

The latest novelty on the tennis lawn is a wheeled table. The invention naturally followed the fashion of serving tea and something light to eat to the players after a few games had been played. To get the things necessary for the occasion to the lawn re-quired the waiter to make several trips between the house and the lawn. With a tea wagon but one trip is necessary. The vehicle has wheels about the size of those on a baby

carriage. They are made of steel, with rub-ber tires like the wheels of a bicycle. Shackle springs rise above the wheels to support a rectangular tray, perhaps two feet by three and a half large. The tray is made of either papier mache, polished birch, oak or mahogany to suit the taste of the buyer, and the price varies from \$22 to \$25. They are imported from England.-New York Sun.
