DR. TALMAGE TALKS ABOUT THE CRY, "AMERICA FOR AMERICANS."

He Says It Is Absurd, Contrary to the Spirit of American Institutions, and Un-Inst-Who Are Americans? Advantages of the Indiax of Nations.

BROOKLYN, N Y., March 3. - Dr Talmage preached in the Brooklyn Tabernacle this morning on the subject, "Shall America be reserved for Americans?" As his sermons are now translated in every language of Europe and many languages of Asia, in his audiences may be seen persons from many different nations. After an exposition of the scriptures be gave out the bynin.

Arm of the Lord, awake! awake!

Put on thy strength, the nations shake! Text, Acts xvii, 26: "And hath made of one blood all nations," That is, if for some reason general philebotomy were ordered, and standing in a row were an American, an Englishman, a Scotchman, and an Irishman, a Frenchman, a German, a Norwegian, an Icelander, a Spaniard, an Italian, a Russian and representatives of all other nation; lities bared their right arm and a lancet were struck into it the blood let out would have the same characteristics, for it would be red, complex, fibrine, globutine, chlorine and containing sulphurie acid, potassium, phosphate of magnesia and so on, and Harvey and Sir Astley Cooper and Richardson and Zimmerman and Brown-Sequard and all the scientific doctors, allopathic, homeopathic, pathic and eelectic, would agree with Paul as, standing on Mars Hill, his pulpit a ridge of limestone rock fifty feet high and among the proudest and most exclusive and undemocratic people of the earth he crashed into all their prejudices by declaring in the words of my text that God had made "of one blood all nations." The countenances of the five races of the human family may be different as a result of climate or education or habits, and the Malay will have the projecting upper jaw, and the Caucasian the oval face and small mouth, and the Ethiopian the retreating forehead and large lip, and the Mongolian the flat face of olive bue, and the American Indian the copper colored complexion, but the blood is the same and indicates that they all had one origin and that Adam and Eve were their ancestor and ancestress. AMERICA IS THE MIXING CALDRON OF NATIONS.

and organized this United States republic to demonstrate the stupendons idea of the text. A man in Persia will always remain a Persian, a man in Switzerland will always remain a Swiss, a man in Austria will always remain an Austrian, but all foreign nationalities coming to America were intended to be Americans. This land is the chemical laboratory where foreign bloods are to be inextricably mixed up and race prejudices and race antipathies are to perish, and this sermon is an ax by which I hope to help to kill them. It is not hard for me to preach such a sermon, because, although my ancestors came to this country about two hundred and fifty years ago, some of them came from Wales and some from Scotland and some from Holland and some from other lands, and I am a mixture of so many nationalities that I feel at home with people from under every sky and have a right to call them blood relations. There are madcaps and patriotic lumatics in this country, who are ever and anon crying out, "America for Americans!" Down with the Germans! Down with the Irish! Down with the Jews! Down with the Chinese! are in some directions the popular cries, all of which vociferations I will drown out by the full organ of my text, while I pull out the stops and put my foot on the pedal that will open the loudest pipes, and run my fingers over all the four banks of ivory keys, playing the chant, "God hath made of one

I think God built this American continent

There are not five men in this audience, nor far enough back. The only native Americans are the Modocs, the Shawners, the Chippewas, the Cherokees, the Chickasaws, the Seminoles and such like. If the principle America only for Americans be carried out then you and I have no right to be here and we had better charter all the steamers and clippers and men-of-war and yachts and sloops and get out of this country as quick as possible. The Pilgrim Fathers were all immigrants, the Huguenots all immigrants. The cradle of most every one of our families was rocked on the bank of the Clyde, or the Rhine, or the Shannon, or the Seine, or the Tiber. Had the watchword "America for Americans" been an early and successful cry, where now stand our cities would have stood Indian wigwams, and canoes instead of steamers would have tracked the Hudson and the Connecticut; and instead of the Mississippi bein - the main artery of the continent it would have been only a trough for deer and antelope and wild pigeons to drink out of. What makes the cry of "America for Americans" the more absurd and the more inhuman is that some in this country who themselves arrived here in their boyhood or arrived here only one or two generations back are joining in the cry. Escaped from foreign despotisms themselves they say, Shut the door of escape for others! Getting themselves on our shores in a lifeboat from the shipwreck saying Haul the boat on the beach and let the rest of the passengers go to the bottom! Men who have yet on them a Scotch or German or English or Irish brogue crying out, America for Americans! What if the native inhabitants of heaven. I mean the angels, the cherubim, the scraphim born there, should stand in the gate and when they see us coming up at the last should say: "Go back! Heaven for the Heavenians!"

WHERE THE ABSURDITY IS UNJUST. Of course we do well not to allow foreign nations to make this country a convict colony We would have a wall built as high as heaven and as deep as hell against foreign thieves, pickpocaets and nunrchists. We would not let them wipe their feet on the map of the outside door of Castle Garden If England or Russia or Germany or France send here their desperadoes to get clear of them, we would have these desperadoes sent back in chains to the places where they came from. We will not have America become the dumping place for foreign vagabondism. But you build up a wall at the Narrows before New York harbor, or at the Golden Gate before San Francisco, and forbid the coming of the industrious and hard working and honest populations of other lands who want to breathe the air of our free institutions and get epportunity for better livelihood, and it a question of time when God will tumble that wall flat on our own heads with the red hot thunderbolts of his omnipotent in dignation. You are a father and you have five children. The parlor is the best room in your Your son Philip says to the other four children: 'Now, John, you live in the small room in the end of the hall and stay there; George, you live in the garret and stay there: Mary, you live in the cellar and stay you live in the kitchen and there; Fannie, stay there. I, Philip, will take the parlor. It suits me exactly. I like the pictures on the I like the lambrequins at the windows. I like the Axminster on the floor. Now, I, Philip, propose to occupy this parlor and I

command you to stay out. The parlor only for Philippians." You, the father, bear of this arrangement, and what will you do! You will got red in the face and say: "John, come out of that small room at the end of the hall, George, come down out of the garret. Mary come up from the cellar. Fannie, come out of the kitchen, and go into the parfor or anywhere you choose, and, Philip, for your greediness and unbrotherty behavior, I put you for two nears' in the dark closet under the stairs." God is the Father of the human race. He has at least five sons—a North American, a South American, a European, an Asiatic and an African. The North American sniffs the breeze and he says to his four brothers and race prejudice buried, the healthier will be "Let the South American stay in South America, let the European stay in Europe, let the Asiatic stay in Asia, let the African stay in Africa, but America is for me. I think it is the parlor of the whole earth. I like its carpets of grassand its upholstery of the front window, namely the American sunrise, and the upholstery of the back window, namely the American sunset. Now, I want you all to stay out and keep to your places." I am sure the Father of the whole human race would hear of it and chastisement would come, and, whether by earthquake or flood or drought, or heaven darkening swarms of locust and grashopper, or destroying angel of pestilence, God would rebuke our selfishness as a nation and say to the four winds of Heaven: "This world is my house and the North American is no more my child than is the South American and the European and the Asiatic and the African. And I built this world for all the children, and the parlor is theirs and all is theirs." For, let me say, whether we will or not, the population of other lands will come here. There Galveston, and if you shut fifty gates there will be other gates unguarded. And if you if you forbid them coming on sailing vessels they will come in boats. And if you will not let them come in boats they will come on rafts. And if you will not allow wharfness to the raft they will leave it outside Sandy Hook and swim for free America. Stop them! You might as well pass a law forbidding a swarm of summer bees from alighting on the clover tops, or pass a law forbidding the tides of the Atlantic to rise when the moon puts under it silver grappling hooks, or a law that the noonday sun should not irradiate the atmosphere. They have Thanks for John Knox's Presbyterian-They are coming now, be heard across the seas I would put it to the stingy, selfish, shriveled up, blasted souls who sit before your silver dinner plate piled up with breast of roast turkey incarnadined with cranberry, your fork full and your mouth full, and cramming down the superabundance till your digestive organs are ter-

AMERICA HAS ENOUGH ROOM FOR ALL. But some of this cry, America for the Americans, may arise from an bonest fear est this land be overcrowded. Such persons had better take the Northern Pacific or Union Pacific or Southern Pacific, or Atlanta Fe, and go a long journey and find out that no more than a tenth part of this continent is acres of farm land should put all his cultivation on one acre, he would be cultivating a larger ratio of his farm than our nation is now occupying of the national farm. Pour the whole human race-Europe, Asia, Africa, and all the islands of the sea-into America, and there would be room to spare. All the Rocky nountain barrennesses and all the other American deserts are to be fertilized, and as Lake City and much of Utah once yielded not a blade of grass now by artifleial rrigation have become gardens, so a large through artificial irrigation tides of immigration will turn the other way. Politics and government affairs being corrected on the other side of the waters, Ireland under different regulation turned into a garden will invite back another generation of Irishmen, and the wide wastes of Russia own green fields invite back another generation of Russians. And there will be hundreds of thousands of Americans every year settling on the other continents. And after a number of centuries, all the earth full and crowded, what then? Well, at that time some night a panther meteor wandering through the hearens will put its paw on our world and stop it, and putting its panther tooth into the neck of its mountain range will shake it lifeless as the rat terrier a rat. So I have no more fear of America being overcrowded than that the perpoises in the Atlantic ocean will become so numerous as to stop shipping.

THE ADVANTAGES OF THE INFLUX OF NATIONS. It is through mighty addition of foreign population to our native population that I think God is going to fill this land with a race of people 95 per cent, superior to anything the world has ever seen. Intermarriage of one's own nationality and with another style of nationality is a mighty gain. What makes the Scotch-Irish second to no pedigree for brain and staming of character, so that blood goes right up to supreme court bench and to dise and art? Because nothing under heaven can be more unlike than a Scotchman and en conjoined nationalities, unless rum flings them, go right to the tip top in everything. opposites will all the while be affianced, and ench and German will units and that will stop all the quarrel between them, and one child they will call Alace and the will unite with cool blooded Polander, and Christ, the Jew, and descended from a Jewess, nevertheless provided a religion for all nces, and that Paul, though a Jew, became the chief apostle of the Gentiles, and that recently God has allowed to burst in splendor upon the attention of the world, Hirsch, the Jew, who after giving ten million dollars to Christian churches and bospitals has called a committee of nations and furnished them with forty million dollars for schools to elevate his race in France and

their race, these fifty million dollars not given in a last will and testament and at a dreds of thousands of Germans in New York, time when a man must leave his money anyhow, but by donation at fifty-five years of age and in good health, utterly eclipsing all benevolence since the world was created. I must confess there was a time when I entertained race projudice, but, thanks to God, that projudice has gone, and if I sat in church on one side of me. there was a black man and on the other side of me was an Indian, and before me was a Chinaman, and behind me a Turk, I would be as happy as I can now standing in the presence of this terilibrat audience, and I am as lappy now as I can be and live. The sooner we get this corpse of American atmosphera Let each fetch a spade and let us dig its grave elear on down deeper and deeper till we get us far down as the conter of the carth and half way to China, but no further lost it poison those living on the other sole the cartia. Then into this grave let down the accursed carcass of race projudice and throw on it all the mean things that have ever been said and written be tween Jew and Gentile, between Turk and Russian, between English and French, be tween Mongolian and anti-Mongolian, be tween black and white, and put up over that grave for tombstones some scorched and jagged chunk of scorin spit out by some volcame eruption and chise on it for epitaph: "Here lies the carcass of one who cursed the Aged, near six thousand years. Departed this life for the perdition from whence own. it came. No peace to its ashes." A RATIONAL VIEW OF THE CASE.

Now in view of this subject I have two

point blank words to utter, one suggesting what foreigners ought to do for us, and the other what we ought to do for foreigners. are harbors all the way from Baffin's bay to First, to foreigners. Lay aside all apologetic air and realize you have as much right as any man who was not only himself born here, but forbid foreigners from coming on the his father and his grandfather and great steamers they will take sailing vessels. And grandfather before him. Are you an grandfather before him. Are you an Englishman! Though during the revolutionary war your fathers treated our father roughly, England has more than atomed for that by giving to this country at least two denominations of Christians, the Church of England and the Methodist church. The Beart Often Rests.

It is the general impression among those who do not stop to consider, that the heart is continually in action, but such is really very fer from being the fact, for about one-third part of the life of the organ is passed in absolute rest. Thus it dilates to receive the blood, it contracts to expel the blood, and it rests between these two actions. By simply putting the finger on the pulse, the truth of his assertion will be readily demonstrated The artery at the wrist, for instance, will be elt to dilate, and then there is quite an apreciable interval before it is felt again, and this marks the repose of the heart. This period varies greatly in different persons and under different circumstances, and some times, as in fevers or conditions of great exhaustion, the pulsations follow each other with such great degree of rapidity that the interval between them, can scarcely be meas ured. In other instances the pulsations are so very slow that the impression that the jeart has entirely stopped may be obtained. ordinarily and in normal conditions of the system and in adults the pulsations vary in number from sixty to eighty in a minute. out this rule is not without its exceptions, have known healthy persons in whom the cartbeats were as few as forty a minute and others in whom it exceeded ninety. They are generally increased in all persons by mental excitement, by stimulating food of drink, or even by an ordinary meal and by physical exercise

I think it undoubtedly true that the bear beats more rapidly at the present day than it did fifty years ago-a result which must be ascribed to the great mental activity of the age. As a consequence the heart wears out more quickly now than it did with our ances tors, and cases of heart weakness and heart failure, which in former times were almost unknown, are now quite common.-William A. A Mistake in the Marriage Fee.

Ministers' marriage fees add much to their income during the year in many locali-tics. We were told of a case that occurred in Sussex a short time ago. minister was about entering the church to preach where a revival meeting was being carried on, when a man stepped up and asked him if he could marry him after preaching 'Yes, I guess so," was the reply "What will be your charge?" "Whatever you think right," said the manister. "Well, what are you in the habit of receiving?" "Ob, well." said the minister, "That depends upon the liberality of the person married; and this means some pay kerge fees and others small "Well, how would \$1.50 suit?" "I am satisfied," said the minister; "if it is for you." "Altright," said the prospective groom; "Fil be on hand after the preaching." And he was, with his bride, and they were married When he handed the manister a note and a silver half dollar the minister placed the money in his pocket without looking at the amount. When we got bome he took the money out and found that instead of a \$1 ioto it was a \$2 note. A week after be saw be groom, who asked him if his fee was all right. "You gave me two and a half," said the preacher. "Yes," said the groom, "I made a mostake and gave you the \$2 note to stend of \$1, but I knew you would make "it all right." DISCUSSING HYPNOTISM

Dr. Corning on Limitations of the Infle ence of the Mind Upon the Body. At the meeting of the Medical society of the state of New York, in Albany, Dr J. conard Corning, the specialist for nervous diseases, read a most practical and suggestive paper, illustrating the influence of purely

mental phenomena upon bodily function. Beginning with common sensation, be procoeded to show that painful sensations on the one hand and complete immunity from pains of all kinds on the other, might be produced emperarily by acting upon the unagination suggestion, and thus evoking a state of He also showed that the action of the muscles temporarily modified by a powerful appeal to

A number of cases were given illustrating these various phases of mental influence

A man was about to have a tooth extracted under the influence of laughing gas, but, at the critical moment, the apparatus for its administration became deranged. Not wishing to delay the operation, he insisted upon hav ing it performed at once. Accordingly this was done, when, to the astonishment of all the gentleman, a physician of distinction, declared that he had succeeded in rendering agining pleasant ideas, and mentally repeat ing to himself, bow delightful! how delight

Much more common, however, is the immunity from soffering enjoyed by persons while in a state of great excitement; sensory perception is greatly impaired and the individual may be wounded by bullets, sharp instruments or even severely burned without experiencing pain. Moreover, surgical opera-tions of great gravity have been performed by the aid of hypnotism during the last forty years. Unfortunately, however, it is not possible to hypnotize more than a limited percentage of persons, and this limitation of its applicability becomes a serious objection to its adoption. Vision, hearing, smell and taste may also undergo an astonishing modifleation by virtue of suggestion or eircum stances which exert a powerful influence upon be invigination. As an illustration of the hallucinations of the sense of smell while may be aroused in this way, Dr. Corning cited the case of a prosecuting attorney who was present at the exhuning of a coffin on ecount of suspicious circumstances. While the operation was in progress the presecuting attorney declared that he already perceived the odor of decomposition, which caused him o feel faint. His astonishment was great, however, when on opening the coffin it was ound to be quite empty.

From a careful analysis of evidence which

ad long been in the possession of the profesdon, it was evident that the effects of the mind upon the body were entirely functional n character. Moreover, such effects were sually quite evanescent; and, in so far as permanent changes in the tissues were conerned, the evidence was absolutely negative. Hence the preposterous claims of "faith" and 'mind" healers were nothing more than a cheap perversion of facts which had been known to the profession for centuries. The uses to which these iscalers frequently put the credulity of their votaries was of a highly pernicions character. The appeal to motive f superstition caused such disturbances of the imagination that persons were frequently rendered insane, while the neglect of the most ordinary rules of hygiene, coupled with entire lack of proper medication, had already cost many lives. Dr. Corning did not believe that legislative interference would be required in dealing with the evil. All the pub lic required was thorough and authoritative enlightenment at the hands of competent members of the profession. The church ing the vagaries and perversions of doctrine which were calculated to do harm to the cause of true religion among the educated classes. Of course, it fell when the flames destroyed its supports. I don't know whether Harry Everhart caught it or not as it fell, but he was soon on the ground and secured the debris. Before the fire was out he had purchased the remains of the bell and had arranged to have the bell metal modeled into small bells as 'relics of the fire.' Every one around town soon were upon by watch chain a tinkling reminder of the bug disaster.
