**Louisiana State Lottery Comp'y.**  
Incorporated by the Legislature for educational and charitable purposes, and its franchise made a part of the present state constitution in 1857 by an overwhelming popular vote.  
Its MAMMOTH DRAWINGS take place Semi-Annually (June and December), and its Grand Single Number Drawings take place in each of the other ten months of the year, and are all drawn in public, at the Academy of Music, New Orleans, La.  
**FAMED FOR TWENTY YEARS.** For Integrity of its Drawings, and Prompt Payment of Prizes, attested as follows:  
"We do hereby certify that we supervise the arrangements for all the Monthly and Semi-Annual Drawings of The Louisiana State Lottery Company, and in person manage and control the drawings themselves, and that the same are conducted with honesty, fairness, and in good faith toward all parties, and we authorize the Company to use this certificate, with fac-similes of our signatures attached, in its advertisements."  
*Wm. C. C. ...*  
*J. T. Emery*  
Commissioners.

We, the undersigned Banks and Bankers will pay all prizes drawn in the Louisiana State Lotteries, which may be presented at our counters.

**ODDS AND ENDS.**

Learning hath gained most by those books by which the printers have lost.—Thomas Fuller.  
Iron Eagle Feather, a Sioux Indian, has just completed the scientific course at Dickinson college.  
Gen. Sherman recently made the ascent of Pike's peak and was delighted with the experience.  
Lime has of late been used to draw frost out of the ground. It is wet slightly and covered over with blankets and other non-conducting materials.  
A shoemaker hung out a new sign, and then wondered what passers by found so amusing. His sign ran as follows: "Don't go elsewhere to be cheated. Walk in here."

The heat in Russia and other parts of northern Europe has been intense of late. The central observatory at St. Petersburg has not recorded such a high temperature at the same time of the year since 1774.

According to a Pittsburg physician the bow legs prevalent in that city are attributable to the descent of the hills by young children, in whom the ankles yield to ease the strain on the limbs.  
Equal and exact justice to all men, of whatever state or persuasion, religious or political, peace, commerce and honest friendship with all nations, entangling alliances with none.—Thomas Jefferson.

An offer has been made to the British government of £20,000 per annum for the privilege of advertising on the backs of post cards and postage stamps.

The saw is largely used now instead of the ax in bringing down the giant redwoods in California. The tree is sawed partly through and then is forced over by wedges.

The latest addition to the methods of suicide has been furnished by a soldier in Fiesburg, Prussia, who loaded a cannon and killed himself standing in front of it after having ignited a slow match.

There is a Cossack girl in Berlin just now who is attracting a good deal of attention. This is not to be wondered at, seeing that though she is only 11 years of age she is nearly "three yards high, weighs twenty stone, and is still growing very rapidly."

All plants and trees consume water in large quantities. Sir John Laws discovered that an acre of barley will take up 1,094 tons of water in two days. Trees and plants are composed more largely of water than any other substance. The branch of a tree will lose nine-tenths of its weight by drying.

John Tenniel, the cartoon artist of London Punch, will be 70 years of age during 1890. He joined the staff in 1851, succeeding Richard Doyle, who resigned on a question of conscience, and has worked under four editors—Mark Lemon, Tom Taylor, Shirley Brooks, and now Mr. Burnand.

It is believed by the Moslems that the judgment day painters will be required to furnish with souls all representations of human beings which they have made. Failing in this ordeal, they will lose their own souls as a forfeit for their presumptuous imitation of the work of the Creator.

Swiss watchmakers have invented a watch for the blind. A small peg is set in the middle of each figure. When the hour hand is moving toward a given hour, the peg for that hour drops. The person finds the peg is down and then counts back to twelve.

There is a whistling well at Logan county, Kan., which warns people of approaching storms from six to twelve hours in advance. It is 135 feet deep, and sends out a strong current of air, which, as it escapes through the apertures about the pump, whistles in a loud, flute like tone that is distinctly audible to every person in the township.

From Kilkenny a remarkable find is reported. A boy named Martin was spearing eels in the River Nore and displaced a stone lying at the bottom. Underneath he saw a sparkling object, which on being flashed up proved to be a valuable gold ring. The ring has been identified as one belonging to the late Mr. Carter, the county surveyor, who dropped it into the river twenty-nine years ago when mooring his pleasure boat.

In the office of a newspaper in Luther, Mich., near a window, hangs a saber captured in the Mexican war. It hangs so that just the point touches the glass. About 300 feet from the office is a sawmill, and the minute the gang saw starts the point of the saber begins a tattoo on the glass. An increase of five pounds of steam is noticeable in the increased noise on the glass. When the saw has passed through a log the saber indicates it instantly by keeping quiet.

Haman is one day feasted with the king, and the next day made a feast for the crowd; the princes of Babylon were high in Darius's favor one day, and cast into the lion's den the next; Scribes and Pharisees that cried up Judas one day did, in effect, bid him go hang himself the next. Such men's favors and friendships are as Venice glasses—quickly broken and not much to be prized. The world is both hard and fleckle.—T. Brooks.

**Fears of a Bean Famine.**

There is sorrow in eastern Connecticut, and in all seaboard New England, too, it is said, for the bean crop is likely to be a failure. There have been no first rate bean seasons in several years, and beans have been scarce and high. Cold, wet summers have caused the trouble. All the virtue in a bean ran into vines, no matter whether it was planted in the fall or the old or new of the moon, for all the moons were wet ones, and frost fell in the autumn before the pods could ripen.

A wall came over the telegraph wires into Connecticut from Boston the other day demanding all the beans there were in the Nutmeg state at any cost; but Connecticut could not spare many for her suffering sister state.

The price of beans was never so high before in the land. Some farmers in this state had difficulty in getting enough for seeding last spring, and what were planted acted just as badly as did the crop last season. The vines ran right up a twelve-foot pole, wrapped it in foliage as dense as that of a hop vine, and then soared skyward from the top of the pole, making a flying tangle of wreaths and tendrils in the air.—Williammatic (Conn.) Special.

**A Rival to the Telephone.**

Mr. W. S. Rogers has a company in process of formation to introduce the writing telegraph machines. Mr. Rogers proposes to operate them on the telephone system, having a central office connecting with all the private or public instruments. If a business man wants to hold a conversation with a customer or friend he pulls a little lever, which rings a bell at the central office. He then writes down on his plate the number he desires, the connection is made, and he proceeds to write down his message, which is immediately reproduced at the other end. If the party the message is addressed to is in the answers in the same way, and the conversation can be carried on indefinitely. The questions and answers being all in writing, they can be filed away for future reference. When the party called up is not in the message is ready for him when he returns to his office. Mr. Rogers also intends to use the machine in furnishing baseball scores to public resorts.—St. Louis Globe-Democrat.

**A COTTAGE FOR THE SOUTH.**

Its Cost About \$500—By Palliser, Palliser & Co.

In a southern climate the requirements for houses, either great or small, are very different from what they are at the north.

Special attention must be paid to keeping cool in summer rather than warm in winter; therefore the rooms must be large and the ceilings high. Cellars are not among the requisites. Neither is it necessary in some parts to build solid foundations, there being no frosts to get clear of; and in some instances houses are set on logs stood on the ground. In the case here given, taken from Palliser's American Architecture, N. Y., J. S. Ogilvie & Co., the frame is supported on brick piers, and a large open space is left under the floor, which is properly prepared so as to keep down damp.

COTTAGE AT SCOOBA, MISS.

It will be observed there is no kitchen provided, the cooking being done in a small out-house provided for that purpose, so as to keep the heat out of the house as far as possible. It is, however, necessary at some seasons of the year to have a fire, and for this purpose a large open fireplace is provided in the parlor. This fireplace is built of brick, with an arch turned in it, and the brick breast continued up; the brick being left exposed in the room, and in this fireplace it is intended to burn large logs on the hearth. The second story or loft is merely a lumber room and air space between the roof and the rooms below.

FLOOR PLAN.

The arrangement of the windows is one of the principal features in the design. The lower sashes are arranged to slide into the walls and the transoms sash to swing. In this way the whole of the windows can be opened instead of half, as is usually the case. This cottage was designed for the residence of a laborer on the estate of J. A. Minnieo, Esq., at Scooba, Miss., to be built of yellow pine throughout. Cost, about \$500.

**A \$600 Cottage.**

Here are cuts of plans and view of a cottage at Birmingham, Conn., designed for a workman of large family, taken from

VIEW.

Palliser's American Architecture, New York J. S. Ogilvie & Co. It is a neat little cottage, and well adapted for the purposes intended and the requirements of its occupants. The

GROUND FLOOR.

first floor contains living room, kitchen and bedroom, and on the second floor four bedrooms, with the necessary closet room. There is a cellar under the whole. Interior finished

SECOND STORY.

in a plain manner, and painted in tints. Colors on exterior are: Clapboards, light slate; trimmings, light brown, and trimmed up with red; blinds, olive green. Cost, \$600.

**Capital • City • Courier.**  
BURR BLOCK.  
*Lincoln, Neb., Aug. 1st, 1889.*

TO OUR FRIENDS :

Having been asked repeatedly why we did not handle the better grades and finer qualities of Correspondence Papers and Fancy Papetries, we have placed on sale the finest line of these goods ever brought to Lincoln.

The stock comprises the best makes, including Whiting's celebrated papers and in quantities to suit the purchaser, viz.: from a quire to a ream.

The very latest styles are now all in and some of the finest novelties ever seen in the city can be found in our new stock.

You are invited to call while the assortment is complete.

Very Respectfully Yours,  
**Wessel Printing Co.**

P. S. We are prepared to furnish these papetries with Monograms, Crests, and other dies, etc., all in the highest style of the engraver's art.
