A NEW TYPEWRITER.

A Machine That is Superior to the Remington or Calligraph.

The Wessel Printing Company have been appointed agents for the new and popular York Typewriter for southeastern Nebraska. To many of our readers this new machine is already known, and all who have seen it pronounce it far superior to any of the older machines. As far as utility and speed are concerned it is giving better satisfaction than either the Remington or the Calligraph, besides for points of convenience, improvements and general construction it far exceeds anything in this line ever invented. This may seem a broad assertion and doubted by those who are using the above machines, but when it is known that Mr. Yost, the inventor, has for years built the Remington and Calligraph, it is reasonable to believe that being constantly in the business he has had opportunity to note where improvements could be made, and accordingly is able to furnish a better typewriter than either of the others. On the York no ribbon is used, each letter or figure striking the paper direct, and by a very valuable new patent are in exact and perfect alignment. If preferable either Calligraph or Remington keyboard will be furnished. All who have seen this new machine in Lincoln pronounce it a gem, and we shall be pleased to have all interested call and see it.
