A NEW TYPEWRITER.

A Machine That is Superior to the Rem

ington or Caligraph.

The Wessel Printing Company have been appointed agents for the new and popular Yest Typewrite for southeastern Nebraska To many of our readers this new machine is already known, and all who have seen it prosumes it far superior to any of the older machines. As far as utility and speed are constructed it is giving better satisfaction than atther the Remington or the Caligraph, beddies for points of convenience, improvements and general construction it far excels saything in this line ever invented. This may mean a broad assertion and doubted by those who are using the above machines, but when it is known that Mr. Yost, the inventor, has far years built the Remington and Caligraph, it is reasonable to believe that being constantly in the business he has had opportunity to note where improvements could be made, and accordingly is able to furnish a better typewriter than either of the others. On the Yesten or ribbon is used, each letter or figure striking the paper direct, and by a very valuable new patent are in exact and perfect ington or Caligraph. ent. If preferable either Caligraph or gton keyboard will be furnished. All to have seen this new machine in Lincoln prenounce it a gem, and we shall be pleased to have all interested call and see it.
