

AT THE TABERNACLE.

DR. TALMAGE RESUMES HIS SERIES ON GOD EVERYWHERE.

His Idea of the Twelve Stones Mentioned by St. John as in the Foundation of the Wall of the New Jerusalem.

BROOKLYN, Jan. 22.—Dr. Talmage returned from his southern tour of preaching and lecturing for ten days in Kentucky, Tennessee, Alabama, Georgia and South Carolina, and resumed his course of sermons on God everywhere. Having preached on "The Astronomy of the Bible; or, God among the Stars;" "The Chronology of the Bible; or, God among the Centuries;" "The Ornithology of the Bible; or, God Among the Birds," he today speaks of "The Precious Stones of the Bible; or, God Among the Amethysts." Subject, "The Wall of Heaven." Text, Revelation xxi, 19, "The foundations of the wall of the city were garnished with all manner of precious stones."

Shall I be frank and tell you what are my designs on you today? They are to make you homesick for heaven; to console you concerning your departed Christian friends by giving you some idea of the brilliancy of the scenes in which they now come; to give all who love the Lord a more elevated idea as to where they are going to pass the most of the years of their existence, and to set all the indifferent and neglectful to quick and immediate preparation, that they may have it likewise.

MARVELS OF THE UNIVERSE.

My text stands us in the presence of the most stupendous splendor of the universe, and that is the wall of heaven, and says of its foundations that they are garnished with all manner of precious stones. All the ancient cities had walls for safety, and heaven has a wall for everlasting safety. You may say that a wall made up of all manner of precious stones is figurative, but you cannot understand the force and significance of the figure unless you know something about the real structure and color and value of the precious stones mentioned.

Now I propose this morning, so far as the Lord may help me, to attempt to climb not the wall of heaven, but the foundations of the wall, and I ask you to join me in the attempt to scale some of the heights. We shall only get part of the way up, but better that than to stay down on the stupid level where most of us have all our lives been standing. We begin clear down at the bottom and where the wall begins.

The first layer of the foundation, reaching all around the city and for 1,500 miles, is a layer of jasper. Indeed there is more of jasper in the wall of heaven than of any other brilliant, because it not only composes a part of the foundation, but makes up the chief part of the superstructure. The jasper is a conglomeration of many colors. It is brown; it is yellow; it is green; it is vermilion; it is red; it is purple; it is black, and is so striped with colors that much of it is called ribbon jasper.

It is found in Siberia and Egypt, but it is rare in most lands and of great value, for it is so hard the ordinary processes cannot break it off from the places where it has been deposited. The workmen bore holes into the rock of jasper, then drive into these holes sticks of dry birchwood, and then saturate the sticks and keep them saturated until they swell enough to split the rock, and the fragments are brought out and polished and transported and cut into cameos and put behind the glass doors of museums.

The portraits of Roman emperors were cut into it. The finest intaglio ever seen in the Vatican museum, the head of Minerva in jasper. By divine arrangement jasper adorned the breastplate of the high priest in the ancient temple. But its most significant position is where it glows and burns and darkens and brightens and preaches from the lowest stratum of the wall of heaven. Glad am I that the very first row of stones in the wall of heaven is jasper in many colors, and if you like purple it is purple, and if you like brown it is brown, and if you like green it is green, and if you like ochre yellow it is ochre yellow, and if you like vermilion it is vermilion, and if you like black it is black. It suggests to me that heaven is a place of all colors—colors of opinion, colors of creed, colors of skin, colors of taste.

PRECIOUS STONES INDEED.

But we must pass up in this inspection of the foundations of the great wall of heaven, and after leaving the jasper the next precious stone reached is sapphire, and it sweeps around the city 1,500 miles. All lapidaries agree in saying that the sapphire of the Bible is what we now call lapis lazuli. Job speaks with emotion of "the place of sapphires," and God thought so much of this precious stone that he put it in the breastplate of the high priest, commanding, "The second row shall be an emerald, a sapphire and a diamond."

The sapphire is a blue, but varies from faintest blue to deepest ultramarine. It is found a pebble in the rivers of Ceylon. It is elsewhere in compact masses. Persia and Thibet and Burma and New South Wales and North Carolina yield exquisite specimens. Its blue is seen in the valley of the Rhine. After a burial of thousands of years it has been brought to sight in Egyptian monuments and Assyrian cylinders. At Moscow and St. Petersburg and Constantinople I have seen great masses of this sapphire, commonly called lapis lazuli. The closer you study its veins the more enchanting, and I do not wonder that the sapphire is called into the foundation of the wall of heaven. It makes a strong stone for the foundation, for it is the hardest of all minerals except the diamond.

Sapphire based on jasper, a blue sky over a fiery sunset. St. John points to it in Revelation and says, "The second, sapphire," and this suggests to me that though our earth and all its furniture of mountains and seas and atmospheres are to collapse and vanish we will throughout all eternity have some way kept the most beautiful of earthly appearances, whether you take this sapphire of the second layer as literal or figurative. The deep blue of our skies and the deep blue of our seas must not, will not be forgotten. If a thousand years after the world has gone to ashes you or I want to recall how the earthly skies looked in a summer noon or in the midocean in a calm, we will have only to look at the second row of the foundation of the wall of heaven.

Oh, I am so glad that St. John told us about it! "The second, sapphire." While we are living in sight of that wall spirits who have come from other worlds and who

never saw our earth will visit us, and we will visit them, and some time we will be in converse about this earth when it was yet afloat and afloat, and we shall want to tell them about how it looked at certain times, and then it will be a great object lesson for all eternity, and we will say to our visitor from some other world, as we point toward the wall of heaven, "It looked like that stratum of foundation next to the lowest." John, twenty-first chapter and nineteenth verse, "The second, sapphire."

A step higher and you come to chalcidony, another layer in the foundation of the wall and running 1,500 miles around the heavenly city. Chalcidony! Translucent. A divine mixture of agates and opals and cornelians. Striped with white and gray. Dashed of pailor blushing into red and darkening into purple. Iceland and the Hebrides hold forth beautiful specimens of chalcidony.

But now we must make a swift ascent to the top of the foundation wall, for we cannot minutely examine all the layers, and so, putting one foot on the chalcidony of which we have been speaking, we spring to the emerald, and we are one-third of the way to the top of the foundation, for the fourth row is emerald. That, I would judge, is God's favorite among gems, because it holds what seems evident in his favorite color on earth, the green, since that is the color most widely diffused across all the earth's continents—the grass, the foliage, the everyday dress of nature. The emerald! Kings used it as a seal to stamp pronouncements. The rainbow around the throne of God is by St. John compared to it.

Conquerors have considered it the greatest prize to capture. What ruthlessness when the soldiers of Pizarro pounded it with their hammers! Emeralds have had much to do with the destiny of Mexico. Five of them were presented by Cortez to his bride, one of them cut into the shape of a rose, another into the shape of a trumpet, another into the shape of a bell, with tongue of pearl, and this presentation aroused the jealousy of the throne and caused the consequent downfall of Cortez. But the depths of the sea were decorated with those emeralds, for in a shipwreck they went down off the coast of Barbary. Napoleon wore an emerald at Austerlitz.

In the Kremlin museum at Moscow there are crowns and scepters and outspread mirrors of emerald. Ireland is called the Emerald Isle not because of its verdure, but because it was presented to Henry II of England with an emerald ring. Nero had a magnifying glass of emerald through which he looked at the gladiatorial contests at Rome. But here are 1,500 miles of emerald sweeping around the heavenly city in one layer.

But upward still and you put your foot on a stratum of sardonyx, white and red, a seeming commingling of snow and fire, the snow cooling the fire, the fire melting the snow.

ANCIENT SPLENDORS IN STONE.

Another climb and you reach the sardius, named after the city of Sardis. Another climb and you reach the chrysolite. A specimen of this, belonging to Epiphanius, in the Fourth century, was said to be so brilliant that whatever was put over to conceal it was shown through, and the emperor of China has a specimen that is described as having such penetrating radiance that it makes the night as bright as the day.

A higher climb and you reach the beryl. Two thousand years ago the Greeks used this precious stone for engraving purposes. It was accounted among the royal treasures of Tyre. The hilt of Murat's sword was adorned with it. It glows in the imperial crown of Great Britain. Luther thought the beryl of the heavenly wall was turquoise. Kalisch thought it was chrysolite. Josephus thought it a golden colored jewel. The wheels of Ezekiel's vision flamed with beryl and were a revolving fire.

The beryl appears in six sided prisms, and is set in seals and intaglios, in necklaces and coronets. It was the joy of ancient jewelry. It ornamented the affluent with earrings. Charlemagne presented it to his favorites. Beautiful beryl! Exquisitely shaped beryl! Divinely colored beryl! It seems like congealed color. It looks like frozen fire.

But stop not here. Climb higher and you come to topaz, a bewilderment of beauty and named after an island of the Red sea.

Climb higher and you come to chrysoberyl, of greenish golden hue and hard as flint.

THE FABLED PREVENTIVE.

Climb higher and you reach the jacinth, named after the flower hyacinth and of reddish blue. Take one more step and you reach the top, not of the wall, but the top of the foundations of the wall, and St. John cries out, "The twelfth, an amethyst." This precious stone, when found in Australia or in the Alps, stands in columns and pyramids. For color it is a violet bloom in stone. For its play of light, for its deep mysteries of color, for its uses in Egyptian, in Etruscan, in Roman art it has been honored. The Greeks thought this stone a preventive of drunkenness. The Hebrews thought it a source of pleasant dreams. For all lovers of gems it is a subject of admiration and suggestiveness. Yes, the word amethyst means a prevention of drunkenness.

Long before the New Testament made reference to the amethyst in the wall of heaven the Persians thought that cups made out of amethyst would hinder any kind of liquor contained therein from becoming intoxicating. But of all the amethystine cups from which the ancients drank not one had any such result of prevention. For thousands of years the world has been looking in vain for such a preventive amethystine cup. Staggering Noah could not find it. Convivial Ahasuerus driving Vashti from the gates could not find it. Nabal breaking the heart of beautiful Abigail could not find it. Belshazzar, the kindly reeler, on the night that the Chaldeans took Babylon could not find it.

Not one of the millions of inebriates whose skulls pave the continents and pave the depths of the sea could find it. There is no such cup. Strong drink from hollowed amethyst imbrutes the same as strong drink from pewter mug. It is not the style of cup we drink out of, but that which the cup contains, which decides the helpful or damning result of the beverage. All around the world last night and today, out of cups costlier than amethyst, men and women have been drinking their own doom and the doom of their children for this life and the next.

Ab, it is the amethystine cups that do the wildest and worst slaughter. The smash of the filthy goblets of the numeraries would long ago have taken place by law, but the amethystine chalices prevent—the chalices out of which legislatures and congresses drink before and after they make the laws. Amethystine chalices have been the friends of intoxication instead of its foes. Over the fiery lips of the amethystine chalices is thrust the tongue of that which biteth like a serpent and stingeth like an adder. Drunkenness is a combination of apoplexy and dementia. The 400,000 victims of opium come out to meet the 150,000,000 victims of alco-

hol, and the two agents take the contract for tumbling the human race into perdition, but whether they will succeed in fulfilling the contract depends on the action of the amethystine cups, the amethystine demijohns, the amethystine ale pitchers, the amethystine flagons, the amethystine wine cellars. Oh, Persians! Oh, Assyrians! Oh, Greeks! Oh, Egyptians! You were wrong in thinking that a cup of amethyst would prevent inebriation.

But standing on the top of this amethystine layer of the foundation of the wall of heaven I bethink myself of the mistake that many of the ancient Hebrews made when they thought that the amethyst was a producer of pleasant dreams. Just wear a piece of amethyst over your heart or put it under your pillow, and you would have your dreams filled with everything beautiful and entrancing. No, no. The style of pillow will not decide the character of the dream. The only recipe for pleasant dreams is to do right and think right when you are wide awake. Conditions of physical disease may give a good man a nightmare, but a man physically well, if he behave himself aright, will not be troubled with bad dreams.

Soluchadnezzar, with eagle's down under his head and Tyrian purple over it, struggled with a bad dream that made him shriek out for the soothsayers and astrologers to come and interpret it. Pharaoh, amid the marble palaces of Memphis, was confounded by a dream in which lean cows ate up the fat cows, and the small ears of corn devoured the seven large ears, and awful famine was prefigured. Pilate's wife, amid clouds of richest upholstery, had a startling dream, because of which she sent a message in hot haste to a court-rounder to keep her husband from enacting a judicial outrage. But Jacob, at Bethel, with a pillow of mountain rock, had a blissful dream of the ladder angel blossoming.

Tunyan, with his head on a hard plank of Bedford jail, saw the gates of the celestial city. St. John, on the barrenest island of the Egean sea, in his dream heard trumpets and saw cavaliers on white horses and a new heaven and a new earth. No amount of rough pillow can disturb the night vision of a saint, and no amount of amethystine charm can delectate the dream of a miscreant.

ONLY THE BEGINNING.

But, some one will say, why have you brought us to this amethyst, the top row of the foundation of the heavenly wall, if you are not able to accept the theory of the ancient Greeks, who said that the amethyst was a charm against intoxication, or if you are not willing to accept the theory of the ancient Hebrews, who said that the amethyst was a producer of pleasant dreams? My answer is, I have brought you to the top row, the twelfth layer of the foundation of the heavenly wall of 1,500 miles of circling amethyst, to put you in a position where you can get a new idea of heaven; to let you see that after you have climbed up twelve strata of glory you are only at the base of the eternal grandeur; to let you, with enchantment of soul, look far down and look far up; and to force upon you the conclusion that if all our climbing has only shown us the foundation of the wall, what must the wall itself be; and if this is the outside of heaven, what must the inside be, and if all this is figurative, what must the reality be? Oh, this piled up magnificence of the heavenly wall! Oh, the sternity of decoration! Oh, this opalescent, fluorescent, prismatic miracle of architecture! What enthrone of all colors! A mingling of the blue of skies, and the surf of seas, and the green of meadows, and the upholstery of autumnal forests, and the fire of August sunsets! All the splendors of earth and heaven dashed into those twelve rows of foundation wall! All that, mark you, only typical of the spiritual glories that roll over heaven like the Atlantic and Pacific oceans swung in one billow.

Do you not see that it was impossible that you understand a hundredth part of the suggestiveness of that twenty-first chapter of Revelation without going into some of the particulars of the wall of heaven, and dipping up some of its dripping colors, and running your eye along some of its wondrous crystallizations, and examining some of the frozen light in its turquoise, and feeling with your own finger the hardness of its sapphire, and shielding your eyes against the shimmering brilliance in its beryl, and studying the 1,500 miles of emerald without a flaw? Yet all this only the outside of heaven and the poorest part of the outside—not the wall itself, but only the foot of the wall, for my text says, "The foundations of the wall of the city were garnished with all manner of precious stones." Oh, get down your harp, if you can play one. Get down a palm branch, if you can reach one. Why, it makes us all feel like crying out with James Montgomery: When shall these eyes that heaven built walls And peerly gaze behold?

THE HEAVENLY PALACE.

Oh, my soul! If my text shows us only the outside, what must the inside be? While riding last summer through the emperor's park, near St. Petersburg, I was captivated with the groves, transplanted from all zones, and the flower beds, mingled with this and that way, incandescence with beauty, and the fountains bounding in such revel with the sunlight as nowhere else is seen. I said: "This is beautiful. I never saw anything like this before." But when I entered the palace and saw the pictured walls, and the long line of statuary, and aquariums afloat with all bright scales, and aviaries a-chant with bird voices, and the inner doors of the palace were swung back by the chamberlain, and I saw the emperor and empress and princes and princesses, and they greeted me with a cordiality of old acquaintanceship. I forgot all the groves and floral bewitchment I had seen outside before entrance.

And now I ask, if the outside of heaven attracts our souls today, how much more will be the uplifting when we get inside and see the King in his beauty and all the princes and princesses of the palaces of amethyst? Are you not glad that we did not stop in our ascent this morning until we got to the top round of the foundation wall of heaven, the twelfth row, the amethyst? Perhaps the ancient Hebrews were not after all so far out of the way when they thought that the touch of the amethyst gave pleasant dreams, for the touch of it this hour gives me a very pleasant dream.

Standing on this amethyst I dream a dream. I close my eyes and I see it all. We are there. This is heaven! Not the outside, but the inside of heaven. With what warmth of love come our long ago departed loved ones have kissed us. My! How they have changed in looks! They were so sick when they went away, and now they are so well. Look! Yonder is the palace of our Lord, the King. Not kept a moment outside, we are ushered into the throne-room.

Stretching out his scarred hand he says, "I have loved thee with an everlasting love," and we respond, "Whom have I loved but thee?" But look! Yonder is the playground of the children. Children do not want a throne. A throne would not fit a child. They are in the play-

grounds of heaven—the children. Out of the sick cradle of earth they came into this romping mirth of the eternal playground. I clap my hands to cheer them in the gloe.

Yonder are the palaces of the martyrs, and before their doorways the flowers, crimson as the bloody martyrdoms through which they waded up to glory. Yonder is Apostolic row, and the highest turret is over the home of Paul. Here is Evangelist place. Yonder are the concert halls in which the musicians of earth and heaven are taking part—Haniel with organ, and David with harp, and Gabriel with trumpet, and four and twenty elders with voices.

And an angel of God says to me: "Where shall I take you? On what street of heaven would you like to live? What celestial habitation would you like to occupy?" And I answer: "Now that I have got inside the wall made up of all manner of precious stones I do not care where you put me. Just show me where my departed loved ones are. I have seen the Lord, and next I want to see them. But here are those with whom I toiled in the kingdoms of God on earth. They are from my old parishes at Belleville and Syracuse and Philadelphia and Brooklyn and from many places on both sides the sea, where I have been permitted to work with them and for them. Give them the best places you can find. I will help steady them as they mount the thrones. I will help you burnish their coronets.

"Take these—my old friends—to as good rooms as you can get for them in the house of many mansions and with windows looking out upon the palace of the great King. As for myself, anywhere in heaven is good enough for me. Hallelujah to the lamb that was slain." But I awake. In the ecstasy of the moment my foot slipped from the layer of amethyst, that so called producer of dreams, and in the effort to catch myself the vision vanished. And, lo, it was but a dream!

The Russet Shoe in Winter.

The russet shoe has invaded December and is no longer the sole property of the summer youth. Many a well-to-do citizen wears it now who three short seasons ago would have scorned the idea that one of his age and understanding could ever appear at Christmas with the footgear formerly associated with beach sands and August moonlight and noondays. But even citizens like these are making footprints on the sands of time with the stout winter russet.

Of course those who are learned in the differentiations of the yellow shoe masculine comprehend that russet is not the name to apply to that perfect flower upon the feet of our civilization, the fashionable and extensive black shoe, which is about the color of the cup of over-ripened chocolate that is offered its true wearer, the chappie, when he appears late at an afternoon tea. This pigskin shoe has a great free sole with inquiring edges, and marks its owner as a person not only willing but able to go about with shoes the color of a poet's ebru blotting pad, for they come high.

There is a shoe midway between this creation and the humblest russet of the masses which marks the man who is progressive in his fashion, yet conservative in his taste. This shoe looks worthy to brave the storms of winter. It is neither too light nor too dark, too dear nor too cheap, and although it made no difference, for she came on and rammed into the sand, and it took there with topsails shaking. They got out the boats then and came ashore. Although there was only the usual surf, the captain and mate had taken off their clothes, and the men were completely demoralized. It was a bright, pleasant day, with only a fresh breeze, and a boy could have gone out in a small boat.

"I took the crowd to my house and gave them some hot coffee. Then they started north and were never seen again. They were Germans, and their bark was in good condition—a strong vessel of oak, with a good cargo on board. The cargo was saved, but no attempt was made to save the vessel, though I guess the crackers of the neighborhood got about everything that was worth taking from her. Afterward I learned something that gave a clue to the performance. She was insured for fifteen-sixteenths of her full value."—New York Sun.

On the Florida Coast.

"Some of the most surprising things happen down on the Florida coast," said a man who recently lived there. "I was at breakfast one morning in my house, about a quarter of a mile back from the beach, when I noticed a vessel standing close in to shore. She seemed to be going wild, as if nobody was steering, and was behaving in an extraordinary way. I ran out and shouted and waved my hat, but nobody aboard seemed to see me, or if any one did it made no difference, for she came on and rammed into the sand, and it took there with topsails shaking. They got out the boats then and came ashore. Although there was only the usual surf, the captain and mate had taken off their clothes, and the men were completely demoralized. It was a bright, pleasant day, with only a fresh breeze, and a boy could have gone out in a small boat.

"I took the crowd to my house and gave them some hot coffee. Then they started north and were never seen again. They were Germans, and their bark was in good condition—a strong vessel of oak, with a good cargo on board. The cargo was saved, but no attempt was made to save the vessel, though I guess the crackers of the neighborhood got about everything that was worth taking from her. Afterward I learned something that gave a clue to the performance. She was insured for fifteen-sixteenths of her full value."—New York Sun.

Why Men Dread the Third Time.

There is much superstition regard for the number three in the popular mind, and the third repetition of anything is generally looked upon as a crisis. Thus, an article may be lost twice and recovered, but the third time that it disappears the loser usually gives it up as gone for good. Twice a man may pass through some great danger, but the third time he battles with the fates, according to the superstitious belief, and is apt to lose his life. If, however, the mystic third can be successfully passed, all is well.

Three was called by Pythagoras the perfect number, and thus also may be mentioned the trident of Neptune, the three forked lightning of Jove and the three headed dog of Pluto. The idea of the Trinity is not confined to Christianity, but occurs in several religions.—New York News.

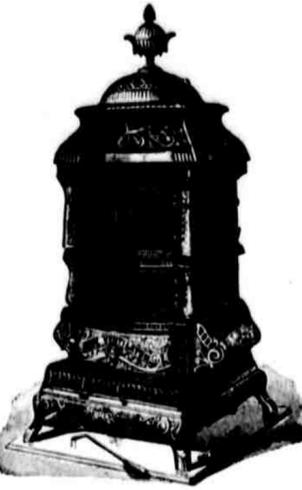

Senator Gorman's Optimism.

Friday night Senator Gorman decided to forget politics for a brief time and went to Daly's theater to enjoy the play. Just in front of the senator sat a lady wearing an immense hat with a regular stage obstruction in the shape of feathers. In following the movements of the principals about the stage he was compelled to keep up a sort of seesaw, dodging motion with his head all during the play. "You didn't enjoy the play much," said a correspondent to the senator as he came out. "Well," he said, "I could hear very well, indeed." He said this with a significant accent on the word "hear."—New York Cor. Baltimore American.

A Word to Office Seekers.

To all young men who contemplate a journey to Washington for the purpose of securing employment the best advice is, don't. The humblest situation in a mercantile house, where the pecuniary reward is small, where the hours are long and where the labor is hard, is better in the end than a government clerkship. One way lies opportunities of advancement, for the utilization and final reward of every talent and all the energy that the young man possesses. The other way lies hopelessness, drudgery, stagnation.—Harper's Weekly.

ARTISTIC BEAUTY

In Penmanship is admired by everyone. There is no penmanship sent out that presents a more artistic dash than that sent out by the Lincoln Business College, which has won an envied position in the realm of pen art. Being desirous of introducing the written cards of

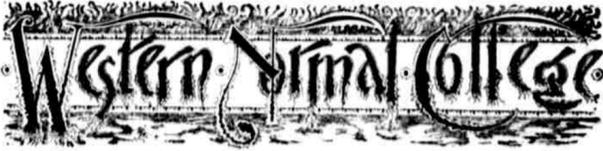

to the Lincoln public, we make the following announcement: They are pronounced by the most competent judges to be the finest ever sent out in this western country. Each card is a rare gem of artistic pen work in itself; the work is but to be seen to be appreciated. A trial order will convince any person that the symmetry of form and extreme delicacy of touch cannot be excelled.

Orders for cards and other styles of pen work may be left at the
