Simplicity and Convenience-- A Bespoke Bed.

[News Clipping]

WASHINGTON, June 17.

Present is a report of the purchase of the picturesque cottage known as "The Metropole," at the entrance of the Rock Creek Park, Sixty-four acres in extent, for use as a summer retreat by the President. It is now in process of changes, and some alteration is expected, but the present home of Mr. Cleveland is to be the residence of the family during the summer months.

This house is a large, old fashioned structure and was built of logs in the form of a square log. The ground floor of the house is of stone and the upper stories of wood. The central portion being three stories high. The walls are of brick, painted in various colors, and the floor is covered with wood. The house is approached by a cobbled walk, and the view from the windows is of the most beautiful scenery.

The President's Summer Home.

Mr. Cleveland has selected the site where his home should be located for the reason that the climate is better than that of Wash-ington, D.C., and that the estate is much more suited to his purposes. The land is especially suited for a summer residence, and the climate is much more favorable than that of the city.

CLIVE WHITTARDS LETTER.

The American Farmer's Almanac.

New York, May 16.-There are a few things that the American farmer should know about the growth of plants. He should study the influence of the environment on the growth of plants, and he should also study the influence of the climate on the growth of plants. He should learn how to make his land more productive, and how to make his land more fertile. He should also study the influence of the climate on the growth of plants, and he should learn how to make his land more fertile.
