clear and cold water like the great lakes.

This consignment is sent to Nebras-  
ka purely as an experiment and to see  
if the white fish will thrive in our wa-  
ters. They mature slowly, being about  
three years in attaining their growth,  
while the carp will reach a weight of  
three to five pounds in a year and will  
live in any sort of water, from a lake  
to a mud puddle. In fact the carp is  
the hog of its species, but like the ge-  
nius hog is very good for all that.

Superintendent Moore has also for  
the Nebraska commission ten "Golden  
Ideas," a very beautiful fish, somewhat  
like the gold fish, and five "tench."  
They started with a can of gold fish  
but they have been mislaid in some  
way and yesterday could not be found.  
Since starting on the trip two little  
lonesome salmon, about a week old  
have been discovered—lost babies and  
strangers to the half million little or-  
phans who accomdany them.

All in all, the cargo as well as the  
car is curious and interesting. The  
superintendent says that the fish are  
in the finest shape of any they ever  
delivered to any state, and the loss on  
the journey will not exceed one per  
cent, while often on such trips the  
mortality runs up into tens of thous-  
ands.

### Workmen's Benevolent and Relief So- ciety.

The HERALD is glad to endorse an  
organization which has recently been  
formed in this city, and which is en-  
titled as above. The organization is  
composed of those working at manual  
labor or skilled labor, and has for its  
object mutual aid; not a secret socie-  
ty, or a society for the purpose of agi-  
tation in labor circles or unions, but  
rather an organization to aid each  
other in sickness, extend aid to the  
family of any member in the event of  
the members death, and for self-im-  
provement among themselves. The  
organization now numbers fifty mem-  
bers, who are in earnest in their work,  
and who all are a guarantee of the sta-  
bility and good faith of the organiza-  
tion. They meet each week and have  
their organization complete, and have  
adopted their Constitution and By-  
Laws, which they propose having  
printed for their use.

- The officers of the society are:
