Dated this 30 day of May A. D. 1887.
C. RUSSELL, County Judge.

City Council.

The Council met in regular session Monday evening with all members present.

The mayor called the meeting to order and the clerk read the minutes of the last meeting which were approved.

Mr. M. D. Polk appeared and presented a proposition for the water company in which the company proposed to lay something over three miles of water mains in different parts of the city with thirty additional fire hydrants if the city would pay \$40 a year, rental, for each hydrant. The company claimed that the laying of these mains would give a much better circulation and increase the pressure, besides extending the water to within reach of many who desired it. The new territory over which the company wished to extend their mains lay as follows: Beginning at Seventh street on Dey, thence west four blocks, to Eleventh, thence south to the main on Elm; one block on Ninth, connecting the Dey and Courtland street mains; seven blocks from Elm to Marble on Sixth street, connecting Old to Sixth; three blocks on Vine from Third to Sixth; on Pearl from Seventh to Eleventh; on Ninth from Rock to Main, four blocks; on Marble from Fifth to Eleventh; on Rock from Tenth to Eleventh, thence north on Eleventh to the old line on Granite, two blocks; on Locust, from Sixth to Washington avenue, three and a half blocks; on Fourth, from Oak to Locust, one block; on Billings avenue from Third to Fifth, over two blocks, thence north on Fifth one block to the old line on Rock; on Seventh, one block south from Rock, thence east one block to Sixth.

Mr. Greusel thought that the laying of the mains on Billings avenue would not be of any benefit to the city as very few people lived along that avenue. Mr. Polk replied that the water company had very great faith in the immediate growth and prosperity of Plattsmouth and they could lay the mains cheaper now than in a few weeks as the company had their men in the city and the material bought with which to lay the mains, and if the proposition was not accepted soon it would be withdrawn, as the men were needed in Salem Ohio to erect works there. The matter was referred to the committee on fire and water.

Petitions for sidewalks on north Sixth street, on east side of Fourth from Main to Vine, were referred to the committee on streets, alleys and bridges, with power to act, as were also petitions for grading at the intersection of Oak and Fourth streets, the intersection of Sixth and Pearl and the establishment of a grade on Seventh from Main north to the city limits.

The Plattsmouth Land and Improvement Co. presented their former proposition but considerably amended. It provides that the company will place all grounds in the city limits at once as far west as Ballou avenue (county road on the road intersecting the fair grounds cemetery) and to include the Richey, Estabrook, Valley Egenberger and Patterson tracts of 200 acres, and in consideration of thus placing this amount of land in the city limits, the city is to put in water mains with necessary hydrants along Mercer avenue, commencing at the middle of the south line of the Richey farm and running to the north line of the Egenberger farm, and water to extend from said mains east and run into Rural park or Livingston Heights, and a stream to be made for the natural basin in the park, said park to be fixed up in a manner to suit the city so that the basin will hold six feet of water. The company also agrees to dedicate to the city said park upon condition that the city make to the company a title to the pest house property, and expend \$1,200 for a park house and such other annual sums as may be necessary to make it an attractive pleasure resort. The company agreeing to cash city warrants at par to the amount of \$1,200 if necessary to secure immediate building.

Mr. Greusel moved that the proposition be not accepted and Mr. McCallen seconded, but upon motion of Mr. Weckbach an amendment passed referring the proposition to the committee on parks.

The following bills were allowed: Byron Clark, salary for April quarter \$55.00. C. H. Smith, salary for five months \$125. B. Anderson, boarding city guests \$1.50. John Fitzpatrick, salary for April \$40.00. W. H. Malick, salary for April, \$50.00. J. F. Foglesong, special police, \$2. J. Kepner, same, \$2. Geo. White, same \$2. L. M. Giles, same, \$2. Plattsmouth Gas Co., same, \$20.00. Wm. ...

The treasurer's report showed a total cash in hand of \$6,920.12, and \$400 in receivable notes. It was referred to the committee on finance.

The licence committee reported favorably upon the application of F. G. Fricke for druggist's permit, and upon motion the permit was ordered granted.

Mr. Weckbach introduced an ordinance extending the fire limits from the first alley north of Main street to the first alley north of Vine, and from the first alley south of Main to the first alley south of Pearl and from the river to Eighth.

Mr. White moved the ordinance be changed and made to run only to the centers of Vine and Pearl, giving as his reasons that it would stop the building of residences on these streets and hinder their prosperity for a time. Mr. Weber suggested another amendment by changing the western boundary to Seventh, and on motion of Mr. Dutton the change was made. Mr. Murphy moved the ordinance be given a second and third reading and put on final passage. Mr. Greusel moved to amend this motion by referring it back to the judiciary committee but the amendment was not accepted and ordinance was passed as amended.

A fine of \$100 per day was made for violation of this ordinance, as long as a frame structure was allowed to stand.

Mr. Greusel presented a proposition for Mr. Fitzgerald, agreeing to take \$2,500 as payment for the bonds held by him. He further said that the city had paid upon said bonds, originally only something over \$7,000, some \$15,500. Estimated at simple interest in conformity with the opinions of two city attorneys, there was still due Mr. Fitzgerald about \$2,000. He was opposed to paying more than was due, and moved that the proposition be not accepted, and the clerk be instructed to notify Mr. Fitzgerald of the fact and the \$2,000 for the bonds, was awaiting his acceptance. Motion passed.

The "cow ordinance" was again brought up and again laid over till the next regular meeting; Messrs. Weber and McCallen being in favor of hearing it then as they thought it was not right to put it off the second time.

The mayor announced his appointments for members of the board of public works as follows: For the three year term, J. W. Johnson, chairman; for the two year term, Fred Gorder; for the one year term, D. Hawkworth. The appointments were confirmed.

The question arose as to the salaries of the members of this committee. The mayor read the law which provided the chairman should not receive more than \$500 per year, and the other members not more than \$100. No salaries were fixed.

The city engineer made his report, as near as he had it completed, for the cost of the grading of Main from Sixth street to Maiden Lane. The report was made in seven divisions. The first and largest division extended from Sixth to Ninth streets, and required the removal of 37,513 cubic yards of dirt, at an estimated cost of 25 cents per yard. The cost here was so much because there was no handy place to put the dirt. Mr. Madole suggested that if the city would sewer its creeks there would be no trouble in disposing of this dirt and it could be used to fill the creek banks to a great advantage. Mr. Madole said that some of the remaining six divisions would need filling, as they were below grade, and these would afford a cheap and handy place for the surplus dirt from those which were above grade, while if the extra dirt was not all needed in fetching up the low places to grade, the owners of some of the neighboring lots would be glad to have the dirt placed on them, and on this account the estimated cost for divisions 2, 3, 4, 5, 6 and 7 would be only about 15 cents per cubic yard. He estimated the total amount of dirt to be removed at 60,000 cubic yards, at a cost of \$11,831. Mr. Madole had not finished his estimate for the cost and work on Main street from Fourteenth to Maiden Lane. To get the sentiment of the council Mr. Murphy moved that Main street be graded, and the discussion that ensued brought out the fact that Messrs. Madole and Dutton were in favor of going on with the work; Messrs. Greusel, McCallen and White were in the dark as to the source of the needed funds; Mr. Greusel was in favor of getting bids if the work could not be done cheaper before the council came on.

On motion the committee on fire and water was instructed to have the hook and ladder trucks put in repair.

Mr. McVey complained of the condition of the street near his property. The matter was referred to the committee on streets, alleys and bridges.

On motion Mr. Madole was instructed to survey Chicago avenue and find the true lines and mark them. Council then adjourned till this evening.

THE LATEST NEWS.

THE NARROW ESCAPE OF A SOCIALIST FROM LYNNING.

Pittsburg, Pa., May 9.—While Walter W. Vrooman, a socialist lecturer, was lecturing to a small audience in the Diamond hall in Allegheny City this evening he described the American flag as "a rag tied to a pole." The crowd grew angry and threats of lynching went from mouth to mouth, and amid the uproar a brick was thrown which struck a man standing behind Vrooman. The speaker's friends gathered around him, and just as the angry crowd was closing in on him Detectives Murphy and Donaldson arrived and arrested Vrooman. The crowd followed to the lockup with cheers for the detectives. Vrooman claims to be on his way to New York to take an engagement with Henry George.

THE ARIZONA SHAKE.

Tucson, Ariz., May 10.—R. J. Kerr returned from a trip to Treslamas, on the San Pedro. He reports an earthquake fissure not less than twenty-five miles long. It extends a short distance below Benson, to fifteen miles below Treslamas. At the surface the fissure varies in width from six to eighteen inches. At places along the crack, water burst forth, but afterward ceased flowing. The crack in many places is still open to a depth of several feet. From Empire ranch, on Strita, seventy miles south of here, the fissure is also reported. Reliable information states that when the earth opened water and mud was thrown to a great height. Springs in that vicinity went dry. Two others doubled their volume of water, but on cessation of the disturbances, the springs resumed their normal state.

INDIAN TROUBLES EXPECTED.

Fort Benton, Mont., May 10.—Indian horse thieves, undoubtedly Canadian Bloods, are operating along Teton river and in the Sein river country. Men in from Birch Creek say there are several war parties of Canadian Indians on this side of the line and trouble may be expected.

THE STORY OF THE MEXICAN CONVULSIONS PROVES TERRIBLY TRUE.

Nogales, Ariz., May 7.—Later accounts received here tend to show that the reports of the volcano having broken out in the Whetstone mountains are true. A gentleman who arrived from Sonora yesterday says there is strong evidence of volcanic eruptions at a point about forty miles southeast of Magdalena, and it is confidently stated that one peak is throwing out large volumes of smoke, accompanied by streams of lava. The smoke and fire can be distinctly seen from several points along the line of the Sonora railroad. As far as can be ascertained the volcano is in the Sierras Azul range. From the appearance of the country and the heavy earthquakes that have occurred, it is believed other volcanoes will break forth in a few days.

Tucson, Ariz., May 7.—Another violent earthquake is reported in the San Jose mountains, forty miles south of Fort Huachuca, in Sonora. General Forsyth has sent an exploration party to investigate. A party just returned from the Catania mountains report the canons full of water. The water was brought to the surface by the earthquake. This is a great boon for this region, as there are thousands of acres of very good farming land at the base of these mountains, which only need water to make them fertile.

May 7.—The Call's ... Mexico, special to-night says: ... of the 3d was started by ... volcanic eruption at Bahispi, ... Montezuma, killing 150 persons ... igniting the woods. Also two persons were killed at Oputa by the ... of buildings. Many people were ... Guebar, which ...
