The Mysteries of Presentation to Royalty What It Costs.

In these days almost any respectable person can be presented to the queen, or prince and prince of Wales in her behalf. All you want is an introducer (called a "presenter"), a lady having a lady and a gentleman.

Your name, accompanied by that of your presenter, who must already have been presented him or her self, and who nominally vouches for you, is formally sent to the Lord Chambertain a reasonable time before the holding of the drawing-room or levee. He is supposed to submit it to the queen for approval. Whether he does or not I can't begin to say. There is a common idea that the queen directs the whole business, but I very much doubt it. At all events, if you or your presenter don't receive a polite intimtion that your presence can be dispensed with, at the appointed day and hour you make your appearance at Buckingham Palace, if it be a drawing-room; at St James' Palace if it be a levee. The difference between a drawing-room and levee is this: Drawing-rooms are chiefly for ladies, and are held either by the queeen or princess of Wales. Both take place in the afternoon, the former at 3, the latter at 2 o'clock. They are, of course, very grand, formal affairs, both of them. Every woman must wear a peculiar style of court dress of either silk, satin, or velvet, and while the pattern, trimming, etc., are left to the taste of the wearer, one or two things are de riguer. The skirt must have a train two or three yards long at the back, and the head-dress must be "feathers and lapets" -the former being white ostrich and the latter white lace. Gentlemen must appear at drawing-room or levces in uniform or court dress. Every man who possibly can wears a uniform of some sort, for the regulation court suit is far from a becoming one. It consists of a dark colored silk velvet dress coat, vest, and knee breeches with white silk stocdings, or a coat richly embroidered with gold cloth, white yest and gold-laced trousers. With the former, shoes and buckles are worn, and with both there is a cocked hat and a steel or guilt sword. The whole outfit costs from twenty one to nearly twenty-three pounds at the cheapest, that is if you buy it. You can hire it if you like. But apart from the necessary bad fit of hired clothes there are other objections to wearing them which I think most people recognize and appreciate. Besides, a man who feels fine enough to swagger in court ought to be able to buy and own his clothes. Why American gentlemen, of all people, should be willing, and not only willing, but anxious, to chuck away a lot of money for a few hours' unacconntable gratification of their republican vanity, is a problem for which I have been unable to find a solution. What they gain by being presented to the queen I am at a loss to discern. But it is useless to say this. They still keep on coming over hear every summer and giving the American Embassy something to do. I wonder if they realize the fact that not one in a hundred English gentlemen are ever presented. Why then should they be? I dare say they find it a grand thing to talk about, to other Anglo-maniacs, when they go home in the fall and make them turn greeen with envy. If, however, they must come and bend their heads before royal magesty, let me give them this kind sof implements, watches and jewelry bit of advice: Get some sort of a uni- England leads the world in the line of form to wear. Some American uniform, art pottery. A well known English manmilitary or naval, and save yourself the ufacturer of pottery has the honor of prohumility of appearing in the court dress, ducing the largest and one of the most which you must otherwise do. Boston Herald: The Russian government has decided to enter upon the work of building a line of railway across Siberia, from the borders of European Russia to the Pacific ocean, the probable eastern terminus of the line to be the port of Vladivostok, on the Japan sea. It is estimated that it will require five years to complete this line, but at the end of that time it will be possible to travel from St. Petersburg to the Pacific ocean in fifteen days. This will materially reduce the time now required to make a circuit of the globe. It is possible now to improve on the once sensational assertion of "round the world in eighty days," in consequence of the greater rapidity of water transportation. But by the short cut suggested above, as- life and strength giving constituents, use suming that regular connections could Dr. J. H. days. That is, starting from New York, One of the most singular incidents conit would require seven days to go to London, three days from London to St. Petersburg, fifteen from there to the Pacific, nineteen days for crossing that chorus singers. On the first alarm he had over the simple Georgia picnic kiss, at ocean, and six days from San Francisco rushed up stairs to his dressing room on the mere mention of which there rise beto his starting point. While at present the fourth floor to save his small poses- fore the visions of all the old boys dainty there is no connecting line on the Pacific sions, and on arriving there, overcome muslins, pink ribbons, rosy checks, and with Vladivostok, the distance from that with heat and smoke, he had fallen on Rembrandt shadow. The very air seems point to the trade centers of Japan is the floor in a swoon. There he lay in a redolent of heliotrope, laughter like the relatively short, and if a trans-Siberian state of utter insensibility for over two rippling of a hidden brook trembles in railway is built, one may be sure that a hours. His dressing room was fortunate- the distance, and the good right arm feels line of swift steamers will run across the ly situated in an angle of the building again the faint struggle of modesty upon Japan Sea in connection with it, and in which flaues did not reach, the state of it. How tawdry, how coarse and revoltthis way the regular steamers plying syncope in which he was had suspended ing seems the stage spasm compared with across the Pacific could be readily reach- respiration, and so, unharmed by the fire this. No; the best kissing after all is ed. Indeed, if the speed of these Pacific and poisonous smoke and gasses evolved what the circumstances make it. The steamers could be increased so as to equal from the burning scenery, he remained that of the fast steamers that now cross | there in safety while death and destruc- | ioned Georgia picnic make it simply dethe Atlantic ocean, the allowance of tion was rioting around him. It was lightful. The young man who is led off nineteen days given for passage from long past 11 o'clock when he came to his continent to continent might be appresenses and realized the horror and danger ciably reduced. We are beginning to of his position. He made his escape by realize that our globe is but a small a staircase leading to the Rue de Marplace, and in a generation or two more ivaux, and on finding himself in safety there will probably not be any part of he once more became unconcious and was the earth's surface, except the polar taken to a pharmacy, from whence he regions, that will not be quite as acceswas transferred to a hospital. A few sible to the inhabitants of this city, for days ago he was discharged cured, after example, as what is now Chicago was to suffering severely from his long sojourn the residents of Boston two generations in the pestilential atmosphere of the burning building. He can now boast of Bonaparte's Escape from Elba.

being the only person who remained for two hours in the Opera Comique after the fire broke out, and who then escaped not only alive, but comparatively unhurt.

Dangers From Oil.

No oii which envolves an inflammable vapor at a less temperature than 110° Fahrenheit is allowed to be sold in this state. The purpose of this law is manifestly to prevent danger from explosion. At the time the law was passed the lamp in almost universal use had but a single plain wick, and the heat evolved by the combustion of the oil was not excessive.
