He is Made General of the Army sick list. and Signs His Acceptance

Sends His Thanks to the President and Issues His First Orders

Washington, June 1.- The bulletin is sued at 8:45 this morning says General Sheridan has held his own through the night. There has been no recurring of imminent danger, but his general condition still justifies the gravest anxiety.

So severe was the patient's relapse yesterday afternoon that Father Chapelle was summoned to administer extreme unction. Only by rapid work was the crisis tided over. The sick man might have died at any moment.

Colonel Sheridan said the general had had a comfortable night, and looked very much improved this morning. "The general has had a bad time of it," he replied, "but I think he will come out all right, yet."

At 12 o'clock it was announced that General Sheridan's condition was practically unchanged,

The bulletin issued at 2:30 says Sheridan's condition shows no material change since the issue of the last bulletin. He has been sleeping quietly, at intervals,

9:30 p. m .- The following bulletin has just been issued: The situation remains about the same. Throughout the day General Sheridan's mind has been fueld. There has been no renewal of vesterday's attack, though there is but incomplete recovery from its effects. No new unfavorable symptoms have developed. The unavoidable excitement connected ous effect whatever. He has slept through the great part of the day.

Colonel Speridan called on President Cleveland this afternoon, at the General's request, to thank him for his nomination and commission of general of the army, and to hand him a formal note of thanks signed by the general's own hand.

12:30 a. m. -There has been no appre ciable change in Sheridan's condition since the last evening bulletin was issued. He has coughed but little, has slept most of the time, and when awake has been clear in his mind and cheerful.

MADE GENERAL OF THE ARMY. Washington, June 1. - The senate bill to receive the grade of general of the army has been signed by the speaker of the house and sent to the president. The president signed the bill and sent the nomination of Philip Sheridan to the senate for that position. On receipt of the nomination the senate went into executive session and confirmed him.

At 3 this afternoon Senators Hawley and Manderson drove up to General Sheridan's residence with the commission which the president had just signed mak ing him gener I of the army. Senator Hawley handed it to Mrs. Sheridan, She was much moved and exclaimed: "I know he will get well now."

At 3:45 p. m. General Sheridan signed the following formal acceptance of his commission as general of the army:

HEADQUARTERS ARMY OF THE UNITED STATES, WASHINGTON, June 1, 1888 .-Hon. Secretary of War: Sir-I have the henor to acknowledge the receipt of my commission as general of the army, to which position the president has today appointed me. I hereby accept the same. P. H SHERIDAN, General.

The signature was written with pencil in a large and perfectly legible hand. Soon after the receipt of the commission Sheridan took the oath of office and directed the is vance of the following order, being his first official act in his meeting. capacity as general:

General Order 37. HEADQUARTERS OF THE ARMY, ADJU-TANT GENERAL'S OFFICE. WASHINGTON. June 1 .- 1. The following named officers are appointed aides-de-camp on the staff of general of the army, with the rank of colonel, to date from this day: Major Michael V. Sheridan, assistant adjutant general; Captian Stanhope E. Blunt, erdinance department

2. In addition to the duties of aidesde-cause Colonel Blunt will continue to perform the duty of inspector of rifle practice at headquarters of the army. By command of General Sheridan.

R. C. DRUM, J. C. RELTON, Adjutant General. Assistant Adjutant-General.

The senate then proceeded to consider ation of the Indian appropriation bill. A collogue took place between Senators Plumb and Bate in regard to the administration of the office of commissioner of Indian affairs, the former asserting that had taken dinner and a drive of a the condition of the things in Indian Territory are worse now than they had been for many years; that never was a time when the trader so dominated the Indian, when the Indian was brought so much in debt by the exactions of the trader, and when so much liquor was sold; and that the con missioner had no experience, was advanced in years, and was unequal to the position, while Mr. Bate defended the characted, ability, honesty and efficiency of the commissioner, and challeng d the senator from Kansas to prove his assertions, which Plumb a chance to read something more than promised to do.

The bill was finally vassed. Adjourned | than riding penies and driving cattle. | York Sun.

in Ashland this week.

-The Kansas City trains which run through here at 6:05 a. m. and 9:38 p. m. will after to-day be discontinued through Plattsmouth. The company having leased the U. P. bridge will run these trains by Council Bluffs to Omaha from

-Omaha has been selected as the place to hold the next general conference of the M. E. church. A good selection and we congratulate our neighbor on the honor conferred upon her and feel confident that the general conference will be proud of her selection and enjoy her stay with the people of Omaha.

-Engine No. 4 which runs the Schuylar train had the pipes packed so that water could not be run from the tank to with this promotion has had no deleteri- the boiler. This was done at Pacific Junction by someone who had a desire to see some damage done to the engine or some person Luckily it was found out and the packing cleaned out before any serious damage was done any where, -A tramp was arrested last night by the Pinkerton men for building a fire in the pump house of the water tank which might have caused a great deal of damage had it not been found out in time. The weary sojourner was turned over to the city authorities who lodged him in jail for safe keeping until this morning,

> to suffer for his crime of incendiarism. -Very commendable words can be said of the people who gathered in Plattsmouth to attend the decoration ceremonies. Considering the large number they made the least noise on the streets of any similar crowd we have ever seen. There was very little drunkenness, and the day was passed very pleasantly and in a respectable manner. The day was one of continuous respect and tribute to the dead.

-The school board met on last Tueslay as was previously announced and elected the following teachers: Miss Berry, of Beatrice, room No. 1, salary \$40 per month; Miss M. E. Twomery 2nd and 3rd grades at \$40 per month; Misses Lathrop and Miller were elected to positions in 1st ward at \$40 per month; Miss Fulmer in 2nd ward at \$40 per month; Miss Gertie Kerney and Miss Sampson were both e ected to their former positions at \$40 per month; Miss Kerr, of Wilton Junction, and Miss Carrie Holloway were elected to positions in West 4th ward at \$40 per month; Miss Shepherd at \$35 per month and Miss Woodsen at \$40 per month were elected to positions in East 4th ward. There are yet four vacant places, provided that all these accept the positions to which they are elected. The remainder will be elected at the next

-Yesterday morning Mr. B. R. Hearson came to town and reported to Sheriff Eikenbary that Louis Pierce, a boy about 16 years of age, had stolen his pony, shoes, overalls and hat. The sheriff immediately offered a reward for the capture of the boy and also started out to look for him. Going to Weeping Water and learning nothing of his man, he bought a ticket for Nebraska City and boarded the train for that place but before he had gone far a man on the train informed him that he had seen a boy filling that description back at Weeping Water about 11 o'clock and that he was on his way to Lincoln. The sheriff immediately proceeded to stop the train, went back to Weeplog Water, hired a team and started out after him. He did not go far until he found where the boy few hours overtook him riding along the road in a sort of cowboy trot. He offered no resistence whatever and seemed perfectly willing to go where he was commanded. His idea of stealing the horse seems to have originated from his free use of dime novels of cowboy escapades and such like. His object was to get out to Colorado among the cowbovs with his pony and then he would have a good time. It is highly probable that before he gets to Colorado he will have are particularly partial to razors. When cowboy stories and learn a better trade

The Partridge es a Drammer.

During the time the hen was laying her eggs and setting, he often gave us the "stormy music of his drum." It was small trouble to arrange bushes on a fence near by so that one could creep up un seen and get a full view of the gallant thunderer perched on a knotty old hem lock log. mossy, and half buried in the ground; and "children of a larger growth," as well as the boys and girls availed themselves of the opportunity. Of the many who saw him in the act of drumming, I do not recall one who had a correct idea beforehand of the way in which the "partridge thunder" is produced. It was supposed to be made by the striking of the bird's wings either against the log or against his body; whereas it was now plainly to be seen that the performer stood straight up, like a junk bottle, and brought his wings in front of him with quick, strong strokes, smiting nothing but the air-not even his "own proud breast," as one distinguished observer has suggested.

Wilson thinks the drumming may be heard nearly half a mile. He might safely have doubled the distance; though, when we consider the low pitch, B flat, second line in bass staff, the fact is surprising. The tones somewhat resemble those of any deep drum, being very deceptive as to distance, often sounding near when far off, and far off when near. I would describe the drumming as a succession of thumps, the first dozen of which may be counted.

The first two or three are soft and comparatively slow; then they increase rapidly in force and frequency, rushing onward into a furious whir, the whir subsiding into a sudden but graduated diminish. The entire power of the partridge must be thrown into this exercise. His appearance immediately afterward attests this, as well as the volume of sound; for he drops into the forlornest of attitudes, looking as if he would never move again. In a few minutes, however, perhaps five, he begins to have nervous motions of the head; up, up it goes, and his body with it, till he is perfectly erect-legs, body, neck and all And then for the thunder once more .-Simeon Pease Cheney in The Century.

Deception of the Senses.

The senses are subject to illusions in proportion to the remoteness of the information that they give from the immedi ate necessities of the organism Touch, the most immediate and least inferential of the senses, is least subject to illusions. while sight is so very much so that the blind often say they have an advantage over the seeing in being free from visual illusions. The illusions of bodily motion are much nearer to those of touch than to those of sight, and yet they can under certain conditions be induced through visual impressions.

Of this the writer has recently had two interesting examples. He was standing upon the floor of a railroad depot, the boards of which were laid with a consid erable open space between them; and the shadow of an electric light was moving up and down, by the swinging of the light seemed as though the shadow were stationary, and the floor boards moving. From this it followed that the person on it was moving too, and the writer diswhen he was brought forth and made to other observation was as follows: While riding in the cars and looking out of the window, the trees and all are seen to move in the opposite direction. If, now, one looks in a mirror so situated that it reflects the passing landscape, which, however, must not be visible except in the mirror, one has the illusion of moving in the opposite to the real direction of motion, owing to the reversal of the image in the glass. In both these cases an immediate bodily sensation is induced by a more or less unconscious inference through visual sensations. - American Analyst.

Paper for Cigarette Making. "There are three kinds of paper used in making cigarettes," explained a manufac-turer of these articles. "They are made from cotton and linen rags and from rice straw Cotton paper is made chiefly in Trieste, Austria, and the linen and rice paper in Paris The first, manufactured from the filthy scrapings of ragpickers, b bought in large quantities by the manu facturers, who turn it into pulp and subject it to a bleaching process to make it presentable The lime and other sub stances used in bleaching have a very harmful influence upon the membrane of the throat and nose. Cotten paper is so cheap that a thousand eigarettes can be wrapped at a cost of only two cents. Rice paper is rather expensive.

Tobacconized paper is manufactured It is a common paper saturated with to bacco in such a way as to imitate th ceins of the tobacco leaf very neatly. is used in making all tobacco cigarettes Arsenical preparations are also used in bleaching cigarette papers and oil of creo sote is produced naturally as a conse quence of combustism. This is very inju rious to the throat and lungs, and is said to accelerate the development of consump tion in any one predisposed to the dis-ease."- New York Mail and Express.

The Use of Spectacles.

A vast amount of popular misapprehension and prejudice exists as to the use of spectacles. Many persons who need them object to wearing them for various reasons. Some fear that it will lead their friends to suspect that they are getting old. Others think it will cause them to be suspected of wishing to appear learned or cultured. Some persons do not want to begin to wear them lest, having acquired the habit, they may not be able to leave them off or to see well without them. Others, again, object to glasses only on account of their inconvenience. have personally met with many of all these classes of persons, but I have frequently heard of another class that I have ever met with, namely, those who do not need glasses, but who wear them just for effect and to attract attention. Now, the simple truth is that there are just two good reasons for wearing spectacles, and only two. One is that we may see better, the other is that our eyes may be relieved of strain. Often both these reasons are combined in the same case.-Professor David Webster, M. D.

Gotham's Italians Becoming Civilized. Sergeant Young of the Elizabeth street station is the authority for the assertion that the Italian colony of the old bloody Sixth ward is rapidly becoming civilized. "At one time," he remarked the other evening, "nearly all Italians in the ward had daggers and stilettoes. They were made out of rat tail files or anything that could be filed to a point. Now the pistol and razor are good enough for them. They an Italian is arrested nowadays and a razor is found on him he explains by saying that he wanted it for a shave."-New

A STORY OF EDEN.

In some forgotten chronicle of old This story I have read. And I have heard it said Rosetti wept when he had heard it told:

When Eve from Eden forced and turned her face To pity them inclined God made within her mind

Grow dim the memory of that blissful place Then during many after days of toil Children of earth were born Who knew not of that morn

Before in swear they learned to till the soil. They were content contented with their total Born to return to dust. They fixed, as five they must,

Contented, for of Eden they knew not

Thus God with mercy tempered what seems I have So that men knowing not Their former blissful lot They should not utterly be desolate.

But after many years a child was born, A child unlike (be rest; And when unto her breast Eve pressed it, then she wept, a child forborn.

Better," she said, "this child were in its grove, For in his longing eyes Glimpses of paradi-And long forgotten trees of Eden wave."

-Bennett Bellman.

And everlasting is our mother's pain, For oft at eve or morn Some poet child is born Who hears those sounds of Eden once again.
