PLATTSMOUTH, CASS COUNTY, NEBRASKA, THURSDAY, MAY 1, 1890.

\$1.50 A YEAR.

IN MEMORY OF EMMA JOHNSON.

Pure and fair her dear young life, Ended in its spring time sweet. No dark blot the fair one, mars, Where the story stands complete.

Always patient, kind and true, Hopingstill when hope was vain, Now at rest, her pain is o'er, She with Jesus eer shall reign.

Sweet to yield to God again, Life as pure as hers has been, Free from evil, free from stain, Guiltless of corroding sin.

The Verdict Unanimous. W. D. Sult, Druggist, Bippus, Ind., testifies: "I can recommend Electric Bitters as the very best remedy. Every bottle sold has given relief in every case. One man took six bottles, and was cured of Rheumatism of 10 years standing." Abraham Hare, druggist, Bellville, Onio, affirms: "The best selling medicine I have ever handled in my 20 years, ex-perience, is Electric Bitters." Thousands of others have added their testimony, so that the verdict is unanimous that Electric Bitters do cure all diseases of the Liver, Kidneys or Blood. Only a half dollar a bottle at F. G. VOLTAIC BELT CO., Marshall, Mich. POWDERLY'S VIEWS.

The Master Workman's Interest in the Eight Hour Movement.

SCHANTON, Pa., May 1.—Gereral Master Workman Powderly of the Knights of Labor was seen at his home by a reporter of the United Press. The master workman had just returned from Buffalo, where he had gone to aid in adjusting labor differences. He was asked his views concerning the labor demonstration in New York and elsewhere, and at first stated that he had nothing to say, and that all such information should come from Mr. Gompers, president of Nebraska City with the deputy sheriff. the Federation of Labor, under whose auspices the demonstration would be

> Mr. Powderly said that he would address a labor meeting in Jersey City this evening, at which time he would air his ideas concerning this great labor move ment. Warming up to the subject later, he said that his position on this question was two well known to need explana tion. He had always favored an eigh hour law. The Knights of Labor line also indersed it, adopting a preamble favoring it at the general assembly in

As he understood it, the demonstrations throughout the country were to convince the public that the labor elemeat was really in favor of shorter nour for the toilers. It had been alleged by many that the eight-hour movement was simple for effect and that the vorkmen did not really favor it. After the demonstration of to-day it is to be larged there will be no untrue charges f the kind. "The movement to secure an eight-hour law is a universal one, said Mr. Powderly, "and we are all working steadily for it. Within the last few hours about thirty industries employing labor have adopted it, and still others have adopted the nine-hour system. In some fastances workmen received but eight hours' compensation, Miss. Alma Waterman and her sister | for eight hours work. Other industries pay their workmen ien hours compensation for nine hours work. The plan which I recom-Judge Chapman came in from Nebras-a City this morning having finished up be obtained with ten hours' pay. This has been adopted by the Union Pacific railroad company, and in three years their men will be working eight hours eration of Labor is concentrating its efforts in favor of the carpenters just now, and if they succeed it will be a great gain to labor generally. The carpenters are the largest class of mechanies which have a member hip in the federation. The cigarmakers are already working on the eight hour system, at least all who were members of the

Knights of Labor are."
"You will see," concluded Mr. Powderly, "that this eight-hour law is a most righteous one when you remember that a man can perform between the hours of 8 and 12 in the morning more labor with the implements of the pres-ent tinen two men could perform in two days of ten hours. The gentus of the mechanic provided this labor-saving machinery, and it is but right that I should share its benefits. However, th solution of the whole problem will com when the laborer shares the profits of his toil. As he will then be working for himself, he can labor eight or ten hour as he may desire.'

Colliers Protest Against Steam Holster Boston, May 1.—The Colliers' Pro tective union distributed upon the street an appeal for a boycott upon coal hoise by machinery. The Lague Dodges on Dates-Sunday's Games-Clubs' Standing.

Chicago, April 28.—Secretary Brunnell of the Physics' league said that the Chicago club of the Players' league would make no move to need that of the National league team in transferring the Pittsburg club from Pittsburg and opening its season here next Tuesday. It is amusing though, he says, to see the Pittsburg team of the National league, whose officials were the loudest for a conflict of dates, go on record as the first to dedge, and run away from its own town to do it. Pittsburg's retreat in his opinion, only points to a general one all along the old league line. "Our schedule was made to stay," he says, "and will stay, no matter what the old league

HENS' EGGS NOWHERE.

Hail Visits Baltimore and Riddles All but the Correspondents Lively

Baltimore, April 28,-This city was visited about 4 o'clock by hail of a size and destructive power never before seen in this city. The hail was not like the snow-coated hail of commerce, but was plain, hard ice, frozen through and consumptive. Began taking Dr. King's deliver a lecture, and was then on her New Discovery for Consumption, am way. She disclaimed any connection a rock. It went through thick panes of the service pension bill which had been glass as if they were tissue paper, and the amount of damage done by it can only be figured up when all the broken panes are counted. The loss will run into the thousands. The hail stones were like rocks, some of them ragged and sharp on the edges as a steel blade. Hens' eggs were nothing to them in size. Many of them were as large as a man's fist and as they came down they sounded like so many cannon balls falling on the helpless earth. The storm came from the west, local in its character, and swept to the east with a rattle like heavy musketry, frightening people out of their wits, making some of the superstitious think that the day of judgment had come, and hitting those who were on the streets many hard knocks and driving them into places of shelter. All over the city the damage was heavy. No glass that met the full force of the hail was strong enough to stand the force of the cobble stone like blocks that came out of the sky. Charles street windows looked as if they had been on the battlefield, and in the ing attention to the penal code and other laws regulating public meetings. The Anarchists have issued a call inviting workingmen to assemble at the music of glass smashed and other damage done was almost incalculable.
