

CAPTURING A BRIDE.

One Way Savages Have of Choosing a Wife When Many Men Want Her.

The oblong wedge, the Maori order of battle, advanced, singing in a low tone, and gesticulating in what they would have called a mild manner. On they advanced, the movement raising no suspicion in the breasts of their adversaries, it being part of the customary ritual of the war dance, until the thin end of the phalanx overlapped the Mania, and stood between them and the gates of the pa.

Suddenly a change was visible in the antics of the Ngatiroa. Their gesticulations became violent, their eyes protruded, their heads were thrown back, and their throats uttered a mighty shout. As the cry passed their lips a stream of warriors rushed up the banks of the gully and joined the cluster of their own ranks, now swollen to a compact mass of 600 men.

When the Mania realized the ruse practiced upon them they never for a moment thought of giving up the fair cause of the incursion without a struggle. Into the pa poured both parties—the Mania to rally round the girl; the Ngatiroa, except the small party expressly told off to carry away the lady, seeking every man an opponent to wrestle with. Each party was anxious to avoid bloodshed, both being "Tribes of the River." The uproar was therefore greater than had they been engaged in actual warfare, it being more difficult to master a man by strength of muscle than to knock a hole through him. At length superior numbers prevailed.

Those who fought around the lady were dragged away. She was roughly seized, and such a tugging and hauling ensued that had she not been to the manner born, she must have been rent in pieces. At last but one young man, a secret admirer of the lady, retained his hold. An active young fellow, he had so twisted his hands and arms into the girl's hair, and fought so vigorously with his legs, that he could not be removed until he was knocked down senseless.

The contest ended, and the bride being borne in triumph to the canoes, both parties proceeded to pick up their weapons and smooth their feathers. Everything had been conducted in the most honorable and satisfactory manner.—Lieutenant Colonel A. B. Ellis in Popular Science Monthly.

A Wonderful Sense of Smell.

The buzzard's wonderful sense of smell is a curious subject that has often been discussed, the discussion of the matter having resulted in a general uniformity of opinion among scientists that they locate their food by their sense of smell alone. C. L. Hopkins, the noted biologist, says that he has noticed that in Florida they never leave the roots where the night is spent, especially on damp, foggy mornings, until the moisture has been dried by the sun. They then move slowly across the wind until a "scent" is struck, when they move more slowly "up the wind" until the carrion is located. Sometimes they will drift down the wind past their prey, until they have struck the scent, which they follow up until they have found the object of their search, sometimes in the densest thickets. Mr. Hopkins says that he has upon several occasions killed wild hogs in the thickets, and after dressing them and taking what meat he wished would see twenty or more buzzards coming down with the wind. On one occasion he had discovered some animal remains he had covered up, and on another had found a dead snake which he had buried.—St. Louis Republic.

The Old and New Way of Scouring Wool.

Our ancestors scoured their wool in tubs, much as our wives and daughters scour our clothes today. In the hand washing of wool, a tub was filled with the suds, in which one or two men with long poles stirred the wool until clean, when they lifted it upon a traveling apron, which carried it between a pair of rollers which squeezed out the water. The same principle is applied in the automatic scouring now in vogue.

Great forks or rakes seize the wool as it is carried by rollers from a feeding apron into the iron tanks, and by alternating motions of their teeth give it a thorough scouring. Thus cleansed, the wool is delivered by rollers to the drying machines, where hot air and great fans are now utilized to extract all the moisture without tearing the fiber.—S. N. D. North in Popular Science Monthly.

A Learned Jewess.

Eve Cohen Bacharach was born in Prague in the latter part of the sixteenth century. The mother, who was a "woman of great knowledge," carefully educated the daughter, and together they took great delight in studying rabbinical literature. The most abstruse works written by the learned men among her people were thoroughly appreciated by the youthful pupil. Later in life her explanations of the "festival and penitential prayers" were listened to with rare pleasure. She was, it is recorded, an "Aramaic translations and paraphrases on the Bible quite at home." "No less marked was her proficiency in Hebrew, which she read and wrote with ease and elegance."

Will Eat in Heaven.

We cannot discuss the subject of heaven with editors who show by their statements that they have never studied the question of the resurrection. Our bodies will be material after the resurrection. This is an article of faith. Heaven is a material place. The object of the resurrection is to reward the body for its partnership in the good done by the soul in the flesh. It shall have bodily enjoyments after the resurrection. Will eating and drinking be one of them? We think so. Why not?—Western Watchman.

A Candid Confession.

He—Life with me has been a failure. She—You must have had and wasted some opportunity.

He—No, I have spent half my life raising whiskers to conceal my youth, and the other half dyeing them to conceal my age.—Munsey's Weekly.

THE UNKISSED KISS.

I have kissed the girls a-plenty, Aged from one year old to twenty, Kisses better far than honey, I can taste their sweetness yet;

But far dearer than the kisses Given me by kindly misses Is the ever verdant memory of a kiss I did not get.

For one winsome little fairy, With a grace so light and airy, Kept me ever fondly saying, "I'll achieve my purpose yet."

But at length she shyly vanished, With the gift for which I fished, And she left me sadly sighing for the kiss I did not get.

Reader, pardon this digression, Does pursuit or does possession The greater pleasure bring? I really cannot say, and yet

I've forgotten many misses Who bestowed on me their kisses, But I'll always recollect the girl whose kiss I did not get.

Now, of course, there is a moral In this simple story for all Those indiscreet young ladies, who will some times much regret

That they gave their kisses freely, For they'll find a lover really May remember more than all the rest the kiss he did not get.

—Chicago Herald.

The First Post Diluvian Family.

An English divine has prepared a startling table of the figures, purporting of which will make one thankful that he is living in the latter part of the Nineteenth century instead of in the days immediately following the landing of the ark. He shows that if one of Noah's boys had lived to be 500 years old, having his first child at thirty and his last at four hundred and seventy, and allowing for but one addition to his family every three years, and supposing them all to live to the ripe old age of 450, he could gather around him at least 147 sons and daughters.

With a reasonable degree of prolific bearing his grandchildren would number between 10,000 and 12,000; his great and the great-great grandchildren taken with the others enumerated above would swell the figures to something like 50,000; this, too, if monogamy alone were practiced. If polygamy were the rule, as it probably was at that time, the figures would be still more startling.—St. Louis Republic.

Methods of Sea Doctors.

It is related that a lieutenant in command of one of her majesty's gunboats deemed the responsibility of the charge of a medicine chest too much for him. Immediately she was off soundings the gallant officer mustered all hands and divided the contents of the chest equally, so that each had "his whack and na'air." There are two other naval yarns in this connection well worth mentioning.

A man-of-war doctor whose name is unfortunately lost to posterity had a simple method of locating a man's ailment and alleviating it (save the mark!) by drastic and infallible remedies. He would tie a piece of tape around the waist of the complaining mariner, and command him to declare whether his pain existed above or below the tape. If above an emetic, if below a dose of salts followed as a matter of course.—Pall Mall Gazette.

How the Tea Plant Started.

As you drink a cup of tea do you ever think how tea came to grow? Tell your next visitor the story. A Persian prince, on his way to meet his betrothed, vowed that he would not sleep until he saw her. After traveling seven days, he stopped to rest under a shade tree, and there, being no longer able to resist the temptation, he fell into a sound sleep. When he awakened he was so sorry that he cut off his eyelids and threw them on the ground. From them grew the tea plant. It is rather unfortunate that the story stops here, because it would be interesting to know what the lady thought of a sweetheart without eyelids, and whether it would be possible for them to grow again.—New York Sun.

Sat Upon by an Ostrich.

A gentleman had a theory that any creature, however savage, could be subdued—"quelled," as he said, by the human eye. One day he tried to quell one of his own ostriches, with the result that he was presently found in a very pitiable predicament, lying flat on the ground, while the subject of his experiment jumped up and down on him, occasionally varying the treatment by sitting upon him. Doubtless it was safer to lie down than to stand up to be kicked, but to be sat upon as if one were an egg must have been indeed humiliating.—London Spectator.

Future of Terra del Fuego.

The notions of Terra del Fuego which prevailed ten years ago have been completely upset by recent explorations. The latest travelers there are Messrs. Rousson and Willems, who have returned to France from their scientific mission in Terra del Fuego. These explorers believe the northern part of the island can be turned to good account, and that the day is not far distant when large herds and flocks will be raised upon ranches established all along the river valleys. A large district north of the Straits of Magellan, in Patagonia, which was wholly unoccupied twelve years ago, is now full of little farms devoted to raising sheep and cattle.

The owners have prospered so well that the territory they occupy has become so crowded. It is impossible to extend this business further north, and the farmers will therefore be compelled to turn to Terra del Fuego, which will receive the overflow from Patagonia. On Dawson Island, near the northwest coast of Terra del Fuego, Jesuit fathers are now engaged in stock raising, and for two years or so a fine ranch has been established on the northern coast of Terra del Fuego, where there are today about 20,000 sheep and 6,000 cattle. The English have been the first to establish themselves in this territory. Stock-raising is now reaping a profit of 50 per cent. per annum. The explorers say the availability of the island for stock raising has been amply proven, and there is now no doubt that a prosperous future is before it.—Chicago Times.

THREE STREETS.

I sought the new, unknown to meet, And found a gay and favored street; Where fashion walked with flitting feet; And as I watched, a golden gleam Pierced swiftly through the summer air And darted o'er the human stream; Then nestled 'midst some dusky hair. I gazed upon the hair's dark grace, The tender frame to woman's face, That pictured all its charms so sweet. Then as I looked I met her eyes, Deep as the blue of southern skies, And from them glanced a baby smile My own poor treasure to beguile, Through every vein, throughout my frame, There swept a dry, an ardent flame, Love's passion!

'Twas in the time of Love's defeat, I wandered through a busy street, And paced to where four crossways meet; And as I gazed, the thronging crowd Pressed onward, without rest or heed, With hasty feet, too anxious browed To cast a glance upon my need. The chill neglect, the biting blast That o'er my heart as ice wind passed, And turned to bitter or the sweet Brought from his frozen realm a gift, The love of self, a careful thrift To guard its treasure and to guide The current of its burning tide. Through every vein, throughout every pore, An angry summons at my door! Ambition!

I wandered for a dim retreat, I found a quiet moss-grown street, And trod its length with tired feet; And as I passed, a door I kept, And lattered with the strife of years Unlocked, and forth a figure stepped And met me with a face of tears. A figure that had beauty's mien, A face that in a mood serene, Unmarred by grief, had been more sweet Than such that painter's art had traced, Or chiseled marble coldly graced. And as I gazed with anxious will There came a glow, a silent thrill Through every vein, through every part, The swift heroic message to my heart, Life's mission! —H. Boyd Carpenter in Good Words.

Are we in it? Are we in it? Are we in it?

Well I should say so, when it comes to wall paper, or wall paper or wall paper, we are clear in it, that is with the largest stock, greatest variety and the lowest prices. We call the attention of, and invite, every one to come and examine our stock and prices. Who are we that advertise thus? We are the lowest price, and the leading house in the wall paper business, the only small things about us is our prices. Gering & Co., druggist.

A Scrofulous Boy

Running Sores Covered His Body and Head. Bones Affected. Cured by Cuticura Remedy.

When six months old, the left hand of our little grandchild had a large boil, which we polished with a little oil. About five months after it became a running sore, on other sores followed. He then had two of them on each hand, and as his head became more and more inflamed it took less time to break out a sore came on his chin beneath the upper lip which was very offensive. His head was one solid scab, discharging a great deal. This was his condition at two, to two months old, when I undertook the cure of him, his mother having died when he was a little more than a year old, of consumption (scrofula, of course). He could walk a little, but could not get up if he fell down, and could not move when he was bed, having no use of his hand. I immediately commenced with the CUTICURA REMEDY, and cured all freely. One sore after another healed, a bony matter forming in each one of these five days, and before healing, which would finally grow loose and were taken out; then they would heal rapidly. One of these ugly bone formations I preserved. After taking a dozen, and a half bottles he was completely cured and is now, at the age of six years, a strong and healthy child. MR. J. S. BRIGGS, 412 E. CHAY ST., BLOOMINGTON, ILL. My grandson remains perfectly well. No signs of scrofula and no sores.

Feb 7, 1885. MR. J. S. BRIGGS, Bloomington, Ill. The new blood purifier, internally to clean the blood of all impurities and poisonous elements and thus remove the cause, and CUTICURA, the great Skin Cure, and CUTICURA SOAP, an exquisite Skin Beautifier, externally to clear the skin and scalp, and to treat the hair cure every disease and humor of the skin and head, from pimples to scrofula. Sold everywhere. Price CUTICURA, 50c; SOAP, 25c; RESOLVENT, 50c. Prepared by the Forth Drug and Chemical Dispensary, Boston. Send for "How to Cure Blood Disease."

CUTICURA RESOLVENT

DAVY—skin and scalp purified and beautified by CUTICURA SOAP. Absolutely pure.

RHEUMATIC PAINS. In one minute the Cuticura Anti-Pain plaster relieves rheumatism, sciatica, neuralgia, headache, chest and muscular pains and weaknesses. Price 25c.
