From Thursday's Daily. LINCOLN, Neb., April 6.-In the supreme court to day the end of the great Thayer-Boyd case was reached. The record of the proceed-

James E. Boyd. Motion to set aside; judgment denied. Opinion by Mr. Justice Post.

Courts will take notice without proof of events which are generally known within the limits of their jurisdiction. This will include changes in the office of the chief executive, and such acts of public and general interest as may be said | people. to be conspicuous events in the history of the state.

One who seeks by quo warranto proceedings to obtain possession of an office held by another must show that he has a better title to such office than the incumbent.

When the only claim of the relator to an office is the right to hold over after the expiration of his term, on the ground that the respondent, his successor elect, is ineligible; and while the action is pending and undetermined he voluntarily abandons the office in controversy and surrenders it to the respondent, such act will disqualify him to further prosecute as relator and amounts to an abandonment of the action.

World's Fair Notes

A communication has been received from the British commission asking for space to exhibit the rifle calibre guns manufactured by the Maxim-Nordenfeldt Gun company. The company wants to erect a building 30x15 feet to exhibit its guns in practice. One end of the building will be filled with sand bags, into which the projectiles of the guns will be fired. It is claimed that the arrangements are such as will insure perfect safety, and will be reproductions of a similar exhibit recently given at the Royal Naval Exposition in London. The request was referred to Chief Willard Smith of the transportation department as the exhibit if allowed will come under the head of naval and marine

It is proposed to run from New York to Chicago, at the time of the dedication of the exposition buildings, ten special trains, ten minutes apart, each train to have elaborate decorations and music.

At an expense of \$79,300 contracts have been let for furnishing the fair with boilers of 10,03 horse power capacity. The exposition power plant will burn oil instead of coal. About 225,000 barrels will be required, for which the exposition company will pay 72% cents a barrel. The contract has been let for putting in about twelve miles of ing tour. sewerage pipe in the grounds for \$57,736

with the above result. He was carrying his bible under his left arm and his cane in his right hand and was unable to catch himself.

It is a wonder we do not have Cushing, John Tighe, M. Archer, more injured than we do, as our sidewalks are in a very poor condition. When the city gets two or three damage su ts on hand, probably the walks will be kept in a better condition.

World's Fair Notes

The Methodists have decided to hold an international camp meeting of a month's duration at the time of the exposition. It will be held half the time at Desplaines and the other half at Lake Bluff. Both places are a few miles out from Chicago.

A handsome two story building, 165 by 310 feet with a central court 64 by 211 feet, will be crected at once in Jackson Park for use as the headquarters for the construction department, fire department and J. P. Lewis, E. E. Wyfrick and Pat police officers. The building will also contain a hospital, restaurant and sleeping quarters.

A very complete, and doubtless an eye-opening diamond exhibit will be made by Cape Colony, South Africa. The exhibit will include 10,-00C carats of uncut stones, a large quanity of very fine cut and polished ones, together with all that is necessary to show the process of mining and washing. For this it will be day and two-thirds of the other necessary to transport to Chicago 100 tons of pulverized blue earth, 50 tons of unpulverized earth and a will be governed for the next two complete washing machine, which years by C. Considerable misapprehension exists both in this country and abroad as to the mines and mining exhibit which is to be made at the exposition. At world's fairs heretoures building, or in annexes to its having but remote relation to anything of the mineral description. of teachers present: Many press notices and comments indicate that the impression prevails | Ola Norris widely that such is to be the case at the Expostion of 1893. But that is May Reed far from being true. "Mines and W. R. Woodruff Mining" has been made a seperate Geo. Richardson and distinct "Department" of the Anna Barker Classification of Exhibits, and will Hattie Woodard have the exclusive use of one of the finest and largest of the Exposition Edua Murless buildings. The mines and mining Laura Thomas building measures 350 by 700 feet, has a total floor space of almost 6 acres, and cost \$205,000. The fact is that, at the world's Columbian exposition, for the first time in the history of such enterprises, the mining industry and products are accorded the recognition which their exceedingly great importance to the wealth and prosperity of all civilized nations really demands. Mr. Skiff, Chief of the department, says that it is already assured that in the mines and mining building will be gathered in 1893 incomparably the largest array and most complete and Glara Cleghorn most instructive evidence of the Wm, M. Thomas mineral wealth and progress of the mining industry ever collected or attempted.

From Fridays Daily. A Fatal Fall.

Yesterday Dan Rice, the colored perter in the Barker building in Eaud Marshall Omaha had a frightful fall that Gertrude Curyea would of instantly killed any one else. He was standing on a ledge of a window on the third floor on Mrs. A. W. Neihart Melissa Shinn the Fifteenth street side, washing Lizzie Waltz the window. He started to step in, and, missing his footing, fell to the walk. In transit his head struck Jennie Bailey the cornice directly over Wessel's Olive Boyd store and made an indention as deep as a man's hand.

Rice was picked up insensible and J. P. Wright a patrol wagon moved him to the Ira Minford police station where Dr. Towne was called. There was a wound in the man's head nearly two inches deep and a portion of his brains was exposed. It was a miraculous escape from instantaneous death, say the physicians. He was removed to the hospital and the physicians there do not think he can possibly live.

The object of this movement is to oppose legislation harmful to the interests of the railroad employes, and the members of the order are pledeged to drop party affiliations when their class is threatened, and to support men and measures known to be friendly to them.

Henry Knodell, the state organizer, estimates the railway employes of Nebraska at 15,000 and he says that nearly one-fourth of them are already enlisted in the move ment. The Omaha club alone has a membership of about 900. The railroad men have organizations in Nebraska, Minaesota, Iowa, Kansas, and North Dakota, and a convention will be held in May for the forms tion of a national organization.
