PERSONAL.

—Tom Patterson Stayed in Omaha.

—J. A. Davis Stayed in Glenwood.

—W. E. Paul spent Sunday in Omaha.

—A. M. Davis left for St. Joe this morning.

—Mrs. A. B. Smith left this morning for her home in Denver.

—Dr. H. H. Brown, of Omaha, is visiting the family of J. M. Patterson.

—Mr. C. G. Styles returned Saturday evening from her visit in Nebraska City.

—Mr. Phillip Shaffer, who has been visiting friends in Plattsmouth, returned to his home in Eureka this morning.

—County treasurer D. A. Caspall went to Omaha on business this morning, and from there to Weeping Water.

—Mrs. A. W. Alexander, of Eureka, who has been visiting her son, Rev. W. B. Alexander, returned home this morning.

—Judge S. M. Chapman left Saturday evening for Des Moines, to attend the reunion of the "Hornet's nest" brigade with which he served during the war. He will also visit Calfax.

—Weather indications. For Nebraska: Warmer, followed by cooler, fair weather; light to fresh northwesterly winds.

—Plattsmouth will no doubt do herself proud in honor of President Cleveland Wednesday between 12 and 1 o'clock.

—Saturday the extensive Omaha clothing house of Alexander Polack, went under. The cause of the failure was unprofitable branch houses and a large credit system.

—Judge Russell, Sheriff Eikenberry, M. D. Polk and A. B. Knotts were passengers on Weeping Water to-day. Their purpose was to attend the republican central committee meeting.

—The predictions for tonight are clear and falling temperature. That means frost. A number of citizens to-day were seen busily engaged in removing their house plants from the ground to pots and if any are to be left out over night they had best be well covered.

—Through the kindness of our worthy citizen, J. A. Connor, we are furnished with a special telegram concerning President Cleveland's stop in Omaha and Plattsmouth. He will be here about 12.45 o'clock Wednesday afternoon, and an effort is being made to have him stop at least 20 minutes.

—Three colored men supposed to be those who saturated the bridge between Lincoln and Crete, with oil, last Thursday night and fired it and came near wrecking a passenger train were given a preliminary hearing Saturday and to-day at Lincoln. Their names were Tom Robinson, Isaac Mackinfield and Wm. Strothers.

Notice to Ice Consumers. All contracts for ice expired on the 1st day of Oct. All persons in arrears please call at F. S. White's store and settle the same. Parties wishing their ice continued can have it at the same rate per month as heretofore.

F. S. WHITE.

Hon. N. W. Gray.

The Statesman, Scholar and True American, set an example worthy of emulation for all True Americans. Healing wounds that no methods except those used by Heaps' Camphorated Arnica Salve which is sold on its merits for any use that's sake can be used. No cure, no pay. For sale by the following druggist. Price 25c per box.

W. J. WARRICK.

The Quaker Medicine Company. Respectfully ask some very plain questions: Can Consumption be cured or even benefited? Can a Cold be cured or even stopped? Can you expect to be even relieved by any medicine or physician?—No you cannot, if you simply change the temperature of your body three or four times a day—for every change you add to your cold—Mothers, your children's health and your future happiness demands of you consistent love. Shall vanity make your life miserable, ending only in death. Dr. Watson's New Specific Cough Cure is the result of science. Price 50c and \$1. It is warranted by the following druggist.

W. J. WARRICK.

Human Nature Library, No. 3, is from the able pen of Dr. H. S. Drayton, editor of the Phrenological Journal, and considers Physical Factors in Character, or the Influence of Temperament. The position taken by Dr. Drayton is conclusively proven by the examples cited from among well-known people of the present day and historical characters as well. Caesar, Peter, the great St. Paul, Michael Angelo, Martin Luther, Lincoln, Beecher, and several others are cited, with portraits, as examples from real life in proof of the logical arguments. The readers of this number will be on the lookout for its successors. The subject of this series is certainly of great importance. Published at only 10c. a number, by Fowler & Wells Co., 775 Broadway, New York.

FREEZING MUTTON.

SIGHTS NOT ALTOGETHER PLEASING TO THE VISITOR.

Methods of an Australian Factory for Freezing the Carcasses of Sheep—A Process the Reverse of a Turkish Bath. Leading.

Perhaps almost as much ghastliness clings about the Australian meat freezing factory as about the Chicago pig killing yard. Yet a visit to either is not without its interest. The freezing factory stands, necessarily, in a somewhat isolated position, for the conditions of its existence are not such as to commend themselves to those living in the neighborhood, since the sheep are not slaughtered on the runs, but in the factory yards. The machinery necessary for the freezing process is very expensive and elaborate, so that comparatively few factories exist in the colonies. Each, however, does a very large business, and during the active season the number of sheep killed per day is enormous. When the carcasses first obtained footing in New Zealand quailers and farmers were so sanguine about the success of the experiment, that many of them went to the colonies to see the colonies. Each, however, does a very large business, and during the active season the number of sheep killed per day is enormous. When the carcasses first obtained footing in New Zealand quailers and farmers were so sanguine about the success of the experiment, that many of them went to the colonies to see the colonies.

At first the speculation caused a loss; for the most, owing to imperfections in the methods employed, and prejudices at home, did not bring the price anticipated. But soon the tide turned. The contract system is still in vogue, but in the colonies sheep owners do not slaughter their mutton independently and on the chance of getting a good price. As the sheep are not killed on the runs, it is necessary that they should be sent down to the factory. This is, of course, a tedious process in pairs, as a flock of, say 1,000 sheep may have to be driven many miles before they reach the station, whence they can be conveyed direct to the factory. Sheep move very slowly, and five or six miles a day is as much as the most active of them will be lured into.

THE FREEZING PROCESS.

Arrived at length at the yards of the factory, they are slaughtered, and the process of freezing begins. The scene is rather a horrible one to witness. In the yards outside are done masses of sheep awaiting their turn in more or less frightened amazement; in a covered shed are the slaughterers at work liberally in a sea of blood. Assistants stand beside them to skin and clean the animals, and before many minutes are over the unfortunate sheep are lying empty carcasses hanging from the low roof. The carcasses are then slipped on hooks, which are attached to small wheels running upon grooved rails in the roof. Along this miniature trolley line they are shot into the cooling department. The process is the reverse of a Turkish bath. The first room of a modern factory is the temperature, and the first stage of the freezing begins. That is, perhaps, the worst part of the whole affair. One after another the bodies are rolled into the room and hung in long lines from end to end. No idea can be conveyed of the stinging sensation experienced in this grotesque chamber. Facing into the second room, you will find less to upset you. The air is cool and even still. The carcasses have been exposed for twenty-four hours in the first room, and are now hardening, as you may perceive, if you feel them.

The process of purification has begun. As you advance into the apartments the atmosphere is more manifest. To the rap of your knuckles the mutton gives back a hard ringing sound, and you may gather that the freezing is almost complete. After closing behind you the door of the third and last room, you find yourself in the Arctic regions. The roof is low, and dense masses of white ice all that is discernible as first, for the light is dim. Presently you make out pendulous forms suspended in white linen coverings; and as you pick your way through the narrow passages you get an idea of the vast number collected here. It is the storeroom, and probably contains 10,000 or 20,000 carcasses. They are all packed in some manner in their wrappings are still with frock. It is very silent in here, and the white shrouded forms give an appearance of mystery to the somewhat uncanny scene. The freezing is accomplished and the sheep wait here for shipment.

LOADING FOR ENGLAND.

Shipment is, however, not far distant. From the storeroom they are removed to huge closed cars, specially prepared to receive them, and arranged so as to exclude as much light, air and heat as possible. These trucks are run down to the port and left alongside the steamer which is loading for England. To the last there is an uncertainty about them. It is necessary that the trucks should be unloaded as soon as possible, so as to give these noxious gases temperature, and consequently it is usual for the stowagers to work all night, or most of the night, at the loading. The visitor who finds himself about 12 o'clock on one of the lower decks may be startled by the ghastly nature of the scene that meets his eyes. Under the silver beams of the electric light men are visible slowly and stealthily carrying shrouded forms upon their shoulders under the eaves. Up the gangways they are moving with their hands, which are by one's side shot down in the recesses of the hold. Here they are once more packed away in another "frozen" chamber, where they remain for the six weeks' voyage.

At the end of that time they are disgorged into the receiving shed in London and pass into the markets for sale and consumption. Before they are ready for sale, however, they must be thawed, and a great deal depends upon the method of thawing. On board ships it is very easy to tell when mutton has been properly thawed. Sometimes with a rush the cook finds himself surrounded with his work and then is obliged to thaw artificially by pouring hot water upon the joint or otherwise heating it. But the proper way is to allow the thawing to be accomplished naturally and slowly by exposing the meat to the ordinary temperature of the air. By this means discoloration may be prevented, and the meat is more likely to be tender. When thawed the mutton is to be regarded as if it were freshly killed and treated accordingly.

—Cor. St. James Gazette.

The Cowboy Dialect.

It becomes, indeed, a familiar and useful addition to your conversational stock of the vernacular. Nay, you even find the field of its usefulness extending, for the terms of the "roundup" and the "branding" and sheep shearing are more or less piquant, and lend themselves easily to applications remote from their primitive usage. Transposed to the ordinary business of social converse of modern life, they come to have a sort of zest in the usefulness of having a source of humor; they place old saws and old customs in a sharp light, a fresh illumination; but always by that undercurrent of suggestion, by contrast or association with the original pursuits, which the words described. So I heard, last year, a politician speak of a boiler of the Republican ticket as a "bocker." A "bocker" is one that "jumps sideways or forward, up and down, with his legs stiffened into an unrelaxed perpendicular," and the image certainly has a kind of affinity with the moral action of a refractory voter.—Louis Swinburne in Scribner's Magazine.

W. C. T. U.

BEATRICE, Thursday, Oct. 6.

The first session of the W. C. T. U. state convention was held in the Methodist church last evening.

At 7:30 the convention was called to order by Mrs. Jennie F. Holmes, state president. Soon the drum sounded and the Band of Hope of Beatrice marched in singing a song of greeting. Mrs. Palmer, state superintendent of evangelistic work, then gave a short bible reading after which prayer was offered.

The Band of Hope sang "Tremble King Alcohol, we shall grow up," which was rendered with much spirit. Next came the address of welcome by Mrs. A. Hardy of Beatrice in which she extended to all persons who were here for the purpose of attending the convention. Then came the response by Mrs. Black of Kansas. We were entertained by a selection by Mr. N. K. Griggs on the flute accompanied by his young daughter on the organ. Mrs. Flora McDonald then gave a recitation to which all listened to with pleasure and was very well rendered.

The president's address was very interesting and showed much thought and study. The chair then appointed a committee on credentials after which all arose and after singing were dismissed with the benediction.

Balyeat's Fig Tonic.

Balyeat's Fig Tonic cures chronic indigestion.

Balyeat's Fig Tonic is especially for weak and delicate women.

Balyeat's Fig Tonic, not only relieves, but cures.

Balyeat's Fig Tonic removes all impurities of the blood.

Balyeat's Fig Tonic is a mild and gentle laxative; with its use, strength and ambition will return and a healthy glow will brighten the complexion. Price 50c and \$1. Money cheerfully refunded if the above is not substantiated by trial. For sale by W. J. Warrick.
