BORROWED AND STOLEN.

TEXAS TRIPLETS.

Three at a Birth and Two Indissolubly Joined The Father a Triplet.

SAN ANTONIO, Tex., Jan. 18 .- Joe Cochran is an able-bodied full-blooded negro of 30 years. He is one of triplets, and both his brothers are hving. Lately he has "taken up with" a negress about 20 years old, also full blooded, whose name is Anna Watkins. On Wednesday Anna gave birth to three children, two boys and a girl. They have taken kindly to the bottle and are thriving. The girl baby does to the south. Very cold days will is very nearly the average size, the boys are each something smaller. These two boys come into the world together for the sufficient reason that from the shoulder to the elbow they are closely joined, They have two heads, two necks, four forearms, two bodies and four legs, but | 23. are indisselubly joined for life. So far as they have afforded opportunity for observation, they are of two seperate minds and tempermants. The pains and wants of one do not effect the other. They are exact duplicates in form and ing until about the 13th. Heavy snow feature. They have been visited by a large number of curiosity lovers, male and female, white and colored, the ladies especially going into eestasies over "the little ducks." The twins appear to have every chance of living.

Manitoba's Change of Covernment. WINNIPEG, MAN., Jan. 18 .- The government formerly resigned at 11 o'clock Monday. The governor immediately sent for Thomas Greenway, leader of the opposition, who repaired to the government house and was called upon to take | the most miserable creatures living. Give the reigns of government. There was a tremendous crowd at the legislature that afternoon, many spectators having to be turned away. The new members elected last week were introduced amid great applause. Harrison then stated that since tenant governor and begged him to accept of them. They had also advised his honor to send for Mr. Greenway to form a new government, and under these circumstances would move that the house adjourn till Thursday afternoon, to give the new leader time to form a cabinet. Norquay and his supporters then retired Better Facilities for making Farm Loans than from the legislative chamber, singingaccording to a prearranged plan, "There's One More River to Cross," amidst the hoots of the liberals. No definite announcement of the new cabinet is expected to be made until the meeting on Thursday, when Greenway will name the members chosen, and an adjournment will be made for the re-election. The Norquay men charge the opposition with wholesale bribery in the recent election contests.

Annexation for Peace.

HALIFAX, N. S., Jan. 18-Jeffery Mc Coll, member of the Provincial Legislature for Pictou, in a speech to his constitunents to-day, advocated the immediate abolition of local legislatures and the annexation of Nova Scotia to the United States. His idea is that with the North American continent and the West Indies under one government on this side of the Atlantic, and the British government over the United Kingdom, India, Austra-6.639.381 lasta and Africa, the Anglo-Saxon race will maintain the peace of the world.

THE WEATHER.

A New Weather Prophet Who Ciyes Us A Hard Layout For 1888.

One day last week the Hon. J. H. Ager, secretary of the board of transportation, permitted the following prediction to be published. The forecast has been singularly and enthusiastically successful so far:

for 1st, 2d, 3d, 12th, 13th, 14th, 15th, Smith & Co. 16th, 22d, 23d, 24th, 25th, 26th and 27th, and the "danger days" are given as 1st, 2d, 12th, 13th, 14th 28d, 24th, 25th and

A storm originating the last two days of 1887 will end about the 3rd of January, adding to the supply of snow on hand, and will be followed for four or five days by excessive cold. Beware of exposure in all noethern and western sec-

About the 10th or 11th it will turn warmer, culminating in a storm of rain or snow, according to sections of the country, on the 12, 13, and 14th. Very cold days will follow. From the 21st to the 27th the hardest storms of the month may be expected. Dangerous and des-

the winter will most likely follow these storms. Heavy rains to the far south and southwest.

Mlattsmouth

FEBRUARY. Storm days: 2, 3, 4, 5, 6, 7, 8, 14, 15,

16, 17, 18, 26, 27, 28 and 29,

Danger days: 3, 4, 5, 6, 15, 16, 17, 27, 28 and 29.

From February 2d to the 8th is the first storm period for the month, during which it will moderate and a winter the country, the mercury falling very

low again westward of the storm passage. From the 14th to 18th, or thereabouts, look for heavy storms, embracing blizzzards to the north, and rain, with lightning and thunder, and possibly, tornafollow to the next period, which begins about the 26th and runs into March.

MARCH. Storm days: 1, 2, 7, 8, 9, 10, 11, 12. 13, 19, 20, 21, 22, 23, 24th and 31st.

Danger days: 9, 10, 11, 12, 21, 22 and

about over, followed by falling temperature until the 7th and 8th. About the 8th a storm period of marked energy and violence will begin, last

all over the north, turning to destructive sleet. Rain and general tropical storms southward. Cold days will follow. About the 19th prepare for the next

danger period, which will last from the 19th to the 24th or 25th.

It is proper to add that secretary Ager but it was made by a friend of his.

Who is Your Best Friend?

Your stomach of course. Why? Because if it is out of order you are one of it a fair chance and see if it is not the best friend you have in the end. Don't smoke in the morning. Don't drink in the morning. If you must smoke and drink wait until your stomach is through with ed with Heartburn, Dizzniess of the head. coming up of the food after eating, biljousness, indigestion, or any other trouble of the stomach, you had best use Green's August Flower, as no person can use it without im nediate relief.

-From the German by F. R. Shipman.

THE RICHES OF BOLIVIA.

The Wealthiest in Minerals of Any Land

on the Globe. Bolivia is doubtless the richest in minerals of any lard on the globe, and millions upon millions of precious metal have been taken out of her mines by the primitive process storm of more or less intensity will cross which still exists, and must exist till railroads are constructed to carry machinery there. Every ounce of ore that fluds its way out of the Andes is carried on the back of a man or a llama, and the quartz is crashed by rolling heavy logs upon it. By this method Bolivia exports from \$12,000,000 to \$15,000,-000 of gold and silver annually, and the output would be fabulous if modern machinery could be taken into the mines. The distance from Jujuy to the farthest mining district of Bolivia is 700 miles, and it is no further

to the diamond fields of Brazil, Bolivia offers a grant of twelve square leagues of land and \$40,000 a mile for the extension of the Argentine Northern to Sucre, and English capitalists are ready to continue

the work as soon as to ment drops it at the boundary line. When it is built the owners of this road will hold March opens up with a February storm | the key to a country which has excited the cupidity of adventurers since the New World was discovered. It has furnished food for four centuries of fable, and armies of men

have died in search of its treasures, A territory as large as that which lies between the Mississippi river and the Rocky mountains remains entirely unexplored. On its borders are the richest of agricultural lands, immense tracts of timber, diamond strewn streams, and the silver and gold de-posits of Cerro de Pasco and Potosi. What Hes within is the subject of speculation. The tales of explorers who have attempted to penetrate its mysteries read like the old romances of Golconda and the El Dorada of the Amazons, where the women warriers were armors of solid gold; but the swamps and the does not claim the honor of this forecast, mountains, and the rivers that cannot be forded, and the jumgles which forbid search, the absence of food, and the difficulty of carrying sufficient supplies on foot, with the other obstacles that have prevented exploration, will be overcome eventually, and the secret that has tantalized the world for four centuries will be told by ambitious scientists. -Harper's Monthly.

The Ameer of Afghanistan. People commonly think of the Ameer of Afghanistan as a moroce, cruel, covetous, despotic savage, but nothing, according to Messrs, O'Meara and Pyne, the only two Engbreekfast. You can drink more and lishmen who have seen him at home, could be the opening of the house the members of smoke more in the evening and it will tell more unlike the real man. His government is no doubt severe; for only a rod of iron the government had seen fit to place on you less. If your food ferments and could keep the Afghans under control. their resignations in the hands of the lieu- does not digest right- if you are troubl- Nevertheless, although the Ameer is unoubtedly respected, and perhaps admired, by the mass of his people, the weight of his hand is felt chiefly by the Sirdars. He is essentially a friend of the common people, What principally attracted the attention of Messrs, O'Meara and Pyne was his enormous capacity for work. Most trivial details come to him for decision day after day. He sits plodding at work in durbar from 10 in the morning till 12 at night. The durbar is open to all, and the humblest approach him with their complaints. As he marched back recently from Paghman to Cabul, attended by some 3,000 troops, many poor people along the route did not hesitate to present their petitions to him personally. He invariably received them, and after glencing at them

scribbled some words and handed them to an He seems to trust no one, but endeavors to do everything himself. Affairs the most insignificant from all parts of the country are reported to him direct. "Thirty or forty reports," he remarked, "come to me about an event. They all give different versions of it and they are all mostly lies. I examine and compare them, and extract the true version myself," There can be no doubt that he is far in advance of his people, and he seems stock of cloaks, woolen goods, blankets | conscious of this. The favorite observation work, the captain must call to his assistancepassengers who are temporarily on board ship. Afghanistan is that ship, the world is the sen, the Afghans are the crew, I am the captain, you are the passengers," He would probably go far toward Europeanizing the country could be rely more thoroughly on his people. He is keenly alive to the advantages likely to follow from its material destock of cloaks, woolen goods, blankets velopment. In his personal manner he is and comforts, at cost, and below cost to quiet, but hearty and genial; he cares nothmake room for the spring stock of ing for estentation and display; he has adopted to a great extent European habits of life, has his meals in the European style, and bus discarded the hookah for a rigar.—New
