SWEEDISH CONGREGATIONAL.—Granite between Fifth and Sixth.

-Watch for the eclipse this evening. -The sleighing is almost played out -Nebraska weather is on top this

week. -Mrs. Ami Todd is reported as improving to-day.

- The moon will play some curious freaks this evening.

-It will take lots of work to make the coasting carnival a success to-night, it should have been held last night.

-A telephone dispatch from Council represented at the carnival to-night.

-The young man who received the wound in the forehead at the dance over the river last night received treatment this afternoon from Dr. Schildknecht. His skull was slightly fractured but no serious results are anticipated.

-- A party of young folks, consisting of Messrs. B. A. McElwain, Chas. Coleman, Stephen Buzzell, Will Horton, Lewis Horton, Lon Todd, and the Misses Gracie Wiles, Ursula Wiles, Laura Shipman, Ida Foglesong, Anna Coleman, Rose McCauley and Mary Buzzell, enjoyed a moonlight sleigh-ride last night, going out to the pleasant and hospitable home of T. J. Thomas, about three miles west of the city, where a very pleasant evening was passed in mirth and laughter until a late

-It is rumored upon the streets to-day that the gentlemanly firm of Messrs Turner, Clarke and Rawson, of Boston, Mass., comprising the Plattsmouth Water Company, have disposed of said plant to the Consolidated Water Co., of Boston. No reason has been assigned to the public for this change as vet and perhaps there will be none. However, the rumor is causing quite a sensation among Plattsmouth citizens, but THE HERALD has no reason to think but what everything will be all right. And while we regret having to lose the visits of Mr. Rawson, who has been so often among our people, and upon whom we have looked with the highest esteem and respect, vet we hope that the new firm will be as business like, agreable and sociable.

The Discovery of Coal.

It is now generally believed by reason of a discovery made a few days ago that the question regarding the supply of coal for Council Bluffs and Omaha is settled for many years to come. The discovery is a ten foot vein of cannel coal of a bituminous shade, which has been traced for more than five miles around the bluffs about nine miles south of the city. This discovery was made some weeks ago, and the persons interested in the matter have Danbury News or some paper not read kept it very quiet. This newly discover ed coal is much similar to the regular bituminous variety, but by the tests already made has demonstrated that it will produce 100 per cent more gas than ing: the anthracite, and has much better oil qualities. As a stove coal it gives [great heat, and is a ready burner. A syndicate has already become interested in the mat ter, among whom are J. E. Riley and J. C. Reagan of Omaha. The new discovery has also had a tendency to increase the value of property in the vicinity. One man who purchased eighty acres at \$8 an acre, stated that he would not sell it now for \$4,000. The investigations will in out for him since the date of the warrant the meantime proceed, and it is generally believed that they will prove to be profitable in the cnd. -Omaha Herald.

A ROW AMONG THE WEB-FEET Two Men Shot in Bethlenam--The

Swamp Angels Have a Racket With the Young Bloods of Plattsmouth. There was a dance last night on the

lowa side, at Jim Price's den, and ar even dozen of Plattsmouth's boys crossed the Big Mundly, where they went for the purpose of having a time, and from all reports they satisfied their anxieties. It seems that a grudge has been existing between the boys of the sand bottoms and those of Plattsmouth for a long time past. Threats have been thrown out on both sides, until last night it came to a regular old-fashioned shot for shot row.

Shortly after the crowd from this side landed at Pierce's the hoodlums of the east side came in and informed the boys that they would not be allowed to dance. The west side boys replied that they had come there for the purpose of dancing and they proposed to do so, to which the Iowa boys objected, and invited the crowd to leave or fight.

After bombarding the house with clubs and stones until the Nebraskans could endure it no longer, they tried to persuade the Iowans to leave, but to no purpose. Five shots were fired into the Nebraska crowd, to which they responded with a volley of twice their number, two of which took effect, one ball striking Geo. Ashburn in the neck, causing a slight flesh would, and another tore the flesh across the forehead of Eli Burchill. Neither case was serious. The Nebraskans came out ahead and danced until they they were tired, imagining when they reached home that they had whipped the world.

THE HERALD is not prepared to say which party is to blame, but more than likely there is fault on both sides. Such conduct should be looked into by the authorities and the parties severely pun-

THE MOON'S ECLIPSE.

An Interesting Phenomena Visible . Here This Eyening.

A total eclipse of the moon will occur this afternoon according to the prediction of astronomers whose accurate calculations in the movements of the heavenly bodies have been so well demonstrated that we may look for the occurence of interesting phenomena in the starry firmanent with unerring certainty. Be on the lookout for this grand spectacle this evening. A lunar eclipse, as is well Bluffs states that that city will be well known, of course, is the obstruction of the moon by the shadow of the earth. The moon enters the shadow soon after and commit errors which sap the very 4 o'clock, and may not at that time be visible here, but it can be seen when it visible here, but it can be seen when it becomes total if no clouds interfere, feited the implicit confidence placed in which is not probable at the time of go- it as a timekeeper, and questions relating ing to press, and it will be 7 o'clock be- to the stability of the of the earth's axis fore the moon passes out of the shadow. These eclipses occur only at the time of the full moon because the orbit of the fair goddes of the night inclines about lating a curiosity which the rapid devel-5 o to the plane of the elliptic.

It cannot be eclipsed more than twice during the year, and it may escape eclipse for an entire year altogether. The phenonenon occurrs twice during this year. The next appearance is visible in this part of the globe at midnight July 22-23. Three partial eclipses of the sun will occur during the year, but these are not visible in any civilized parts of the

"Where the Credit Belongs."

An oversight on the part of the local reporter of the HERALD in failing to credit an article printed in these columns a few days ago, throws the Journal into sanctimonious fit of cramps. If the HERALD were in the habit of cribbing its articles as some of its neighbors are, from dailies not read by our people, and put ting them in its own columns as original matter, not once or twice, but every week almost, then there would be some cause for complaint. The facts probably are that the Journal lamented the fact that it did not get to print the item in question, having overlooked it until it saw it in the HERALD, and use this ruse of reading the HERALD a lesson, in order to find an excuse for printing what has become stale news. The very fact that the article in question was taken from the the Lincoln Journal, a newspaper read by a great many people in this city. would have been sufficient evidence to a clear conscience that it was simply a mistake in failing to give credit. A profesnever perpetrates this sin upon its neigh- Bluffs. bors; it is generally the New York Sun. in this city, that suffers.

Henry Bunte in Custody.

The following is a telegram received from sheriff Eikenbary at 8:45 this morn-

ALEXANDER, NEB.

/ January 28, 1888. To DAVID MILLER, Plattsmoth, Neb .: Have got Henry Bunte. Will be home at 4:30 P. M. J. C. EIKENBARY.

The warrant isued against Bunte is for embezzlement of money when he was acting as agent at this place for the Western Horse and Cattle Insurance Company. Sheriff Eikenbary has been on the look which was issued Jan. 16. In case they

arrive in time the trial will probably

occur this evening.

SCIENCE OF THE HEAVENS. Astronomical Progress During the

Wineteenth Century. "Looking back to the year 1800," says the Sidereal Messanger, " we are astonished at the change. The comparatively simple science of the heavenly bodies known to our predecessors, almost perfect so far as it went, incurious of what lay beyond its grasp, has developed into a body of manifold powers and parts, each with its seperate mode and means of growth, full of strong vitality, but animated by a restless and unsatisfied spirit, haunted by the sense of problems unsolved and tormented by consious impotence to sound the immensities it perpetually confronts. Knowledge might then be said to be founded by the solar system ; but even the solar system presented itself under an aspect strangely different from that it now wears. It consisted of the sun, seven planets, and twice as many satellites, all circling harmoniously in obedience to a universal law, by the compensating action of which the indefinite stability of their natural relations was secured. The occasional incursion of a comet, or the periodical presence of a single such wanderer, chained by planetary or solar attraction to prevent escape to outer space, availed nothing to impair the symmetry of the majestic spectacle. "Now, not alone have the ascertained

limits of the system been widened by

1,000,000,000 of miles, with the addition

of one more giant planet and six statel lites to the ancient classes of its members, but a complexity has been given to its constitution baffling description or thought. Two hundred and seventy circulating planetary bodies bridge the gap between Jupiter and Mars, the complete investigation of the movements of any one of which would overtask the energies of a lifetime. Meteorites, strangers apparently to the fundamental ordering of the selar household, swarm, nevertheless, by millions in every cranky of its space, returning at regular intervals like the comets so singularly associated with them, and sweeping acress with the velocities, brought perhaps from some distant star. And each of these cosmical grains of dust has a theory far more complex than that of Jupiter; it bears within it the secret of its origin, and fulfills a function in the universe. The sun itself is no longer a semi-fabulous, firegirt globe, but the vast scene of the play of forces as yet imperfectly known to us, offering a boundless field for the most arduous and inspiring researches. Amongst the planets, the wildest variety in physical habitudes is seen to prevail, and each is recognized as a world apart, inviting inquiries which, to be effective, must necessarily be special and detailed. Even our own moon threatens to bread loose from the trammels of calculation foundation of the lunar theory, and suggest the formidable necessity for its reand the constancy of the earth's rate of rotation are amongst those which it behooves the future to answer. Everywhere there is multiformity and change, stimuopment of methods of research offers the

"Outside the solar system the problems which demand a practical solution are all but infinite in number and extent. And these have all arison and crowded upon our thoughts within less than 100 years For sidereal sciense became a recognized branch of astronomy only through Herschel's discovery of the revolutions of double stars in 1802. Yet already it may be, and has been called, 'the astronomy of the future,' so rapidly has the development of a keen and universal interest attended and stimulated the growth of power to investigate this sublime subject. What has been done is little-is scarcely a beginning; yet it is much in comparison with the total blank of a century past. And our knowledge will, we are easily persuaded, appear in turn the merest ig norance to those who come after us. Yet it is not to be dispired, since by it we reach ap groping fingers to to uch the hem of the garment of the Most High."

possibility of at least partially gratifying.

Thank You!

EDITOR HERALD:-The members of the A. O. U. W. lodges of the city, through their respective committees, desire to return most hearty thanks to the Glee Clul and others, for the fine music furnished us at our social last Thursday evening and which aided us very materially in making the occasion a success. THE COMMITTEES.

The Carnival Will bo a Success.

The boys have been busy during the afternoon arranging for the carnival, and it will doubtless be one of the most pleasant and enjoyable events during the winter. The track is being prepared by throwing on snow, and by nightfall will be in the very best of order. A large delsional cribber, such as we have in mind, egation will be present from Council

Y. W. C. T. U.

The Y's extend a cordial invitation te every lady to bring a gentleman and at tend the Leap Year social, to be given at the residence of Mr. Wm. Pickens next Friday night. The gentlemen are requested to come without an invitation from their ladies, as they will be welcomed by

the members of the union. Begg's Blood Purifler and Blood

Maker. No remedy in the world has gained the popularity that this medicine has, as a hold on family medicine. No one should be without it. It has no calomel or quinine in its composition, consequently no bad effects can arise from it. We keep a full supply at all times. O. P. j25-3mod&w SMITH, Druggist.

-At the end of Main Street, near the depot, will be an excellent place to view

Ex. Co. Clerk J. M. Robinson returned from Ashland today, he was present at the opening of the Hotel Lemo at that place by H.R. Dunbar formely of St. Joseph, Mo.

Death of Rozzel Morrow

Rozzel Morrow, a bright and promising youth, born Feb. 15, 1880, departed this life, Jan 23, 1888, at 10 P. M. He was sick but a few days and came to school until Monday noon, when he went home as usual for dinner and did not return, and died at 10 P. M. His favorite piece will be found in the Second Reader. This he read a few hours before his death:

Savior tender shepherd, hear me; Eless thy little lamb te-night Through the darkness, be Thou near me, Watch my sleep till morning light. After reading this piece he told his father and mother that he was going home. He was buried Thursday, January 26. The funeral services were conducted by Rev. Taylor Surface of the U. B. Church. His text is found in Job xiv chap, and 14 v.

Closing bymn: "Asleep in Jesus." The friends extend their heartfelt sympathies to the bereaved parents.

I should like to die, said Rozzel. If my pasa could die toe. But he says he isn't ready, For he's got so much to do. And my little sister, Cassic, Says that I must surely d.e. Then she stopped, because it made me cry.

They tell me, maybe, I shall, Very soon be carled away. If papa were only rendy I should like to go today, But, if I go before him To that world of light and joy, 7...n he'd want to come to heaven To see his little Roy, Then he'd want to came to heaven To see his little boy.

Eight Mile Grove, Neb.

Begg's Charry Cough Syrup.

Is the only medicine that acts directly on the Lungs, Blood and Bowels, it relieves a cough instantly and in time effects a permanent cure. Sold by Q. P. Smith & Co., druggists. j25,3mo,d-w.
