AN IMPENDING DANGER.

THE HERALD for the first time since the beginning of the strike has learned of the points in controversy, as they appear from the statements of both parties, as printed in the Chicago Times of yesterday, and to our way of thinking the strike is certainly an ill-advised piece of business to say the least.

Upon the first division of the Cheyenne branch of the Burlington and Missouri River railroad a passenger train of three cars requiring six hours and ten minutes daily, is paying under the existing schedule to engineers \$144 per month. Upon your schedule it would pay \$189 per month.

UPON THE SCHEDULE which you propose the engineer would receive \$199.29 and the fireman \$119.69. This is a three-car run, the engineer and fireman returning home every night; it is also a daylight run.

While the above statement of facts may not elicit much if any sympathy from the farming community, it will engender anything else but sympathy from the thrifty mechanic, who is satisfied to work in the shops at from two to three dollars per day.

THE OMAHA HERALD is not a riprobbing free trader, it only wants the tariff taken off of wool, sugar, salt, coal, lumber, steel and a few other staples. If that isn't free trade we confess we haven't any other name for it down here.

IGNORANT CRITICISM. It is with surprise and regret that THE HERALD notices ex-Senator Van Wyck has loaned himself to the uncalled for attack upon Judge Field.

THE HERALD today has heard some very bitter talk on the part of skilled mechanics in the shops as well as by many of our citizens. There will be more feeling when this city finds itself in worse straits, as far as business is concerned, than it did during the small pox scourge.

When two people are introduced in Mexico, if both are women, they exchange a light embrace and palmadita or little pat on the back; where one or both are men, a hand shake is in order.

WE DID not see Brother Sherman's article until too late this morning to reply, we promise however to answer him very frankly at an early day.

ANDREW JOHNSON may never rest in peaceful tranquility. The present incumbent at the White House, with his understrapper cabinet, is doing the political trapeze far beyond that of Andrew Johnson's day. Where is the Jeffersonian simplicity, the ancient blue-grass Democracy the country was promised when the ex-sheriff was ushered in as the Moses that was to lead the country back to plain corn bread and potatoes?

PRESIDENT CLEVELAND'S proclamation suspending the collection of tonnage duty from German vessels arriving at American ports, so long as the German Government reciprocate by exempting United States vessels from port charges, is one of those strokes of diplomacy and statesmanship peculiar to this administration.

THE inconvenience of the engineer's strike is already felt, and if the matter is not soon fixed up great loss will be sustained by the people all along the line. Why can't the matter of difference be arbitrated and the vexatious delay of setting who can afford to lose the most, the engineers or the railroad be stopped.

SOME of our best citizens are engineers and firemen on the B. & M. road, yet no one has denied them the right of saying what they think, and THE HERALD expects that what it has said in this matter may be regarded in a proper spirit, as we have the same rights.

How Men Die. If we know all the methods of approach adopted by an enemy we are the better enabled to ward off the danger and postpone the moment when surrender becomes inevitable.

"SECRETARY BAYARD is one of the ablest and most successful diplomatists Canada has ever retained in her interest."

Begg's Blood Purifier and Blood Maker. No remedy in the world has gained the popularity that this medicine has, as a blood purifying medicine.

A New Preservative Art. M. Tru, the French consul at this port, has in his parlour a huge decorative piece, seemingly of roses, rosebuds, violets, smilax and other flowers and foliage, apparently carved with most exquisite delicacy in bronze.

Brain Photographic Revelations. A writer in The New York Tribune tells the story of the appearance of a man's brain under a strong microscope that is both interesting and suggestive.

Astrologers' Magical Rings. The ring among astrologers was a favorite means of divining the future. It was suspended by a hair in the middle of a cup known as the training cup.
