#### Republican State Convention.

The republican electors of the state of Nebraska are requested to send delegates from their several counties to meet in convention at the city of Lincoln Thursday, August 23, 1888, at 2 o'clock p. m., for the purpose of placing in nomination candidates for the following state offices.

Governor. Lieutenant Governor. Secretary of State.

State Treasurer.

- Auditor of Public Accounts.
- Attorney General.
- Commissioner of Public Lands and

Buildings. And the transaction of such other busi-

ness as may come before the convention. THE APPORTIONMENT.

The several counties are entitled to representation as follows, being based upon the vote cast for Hon. Samuel Maxwell, judge, in 1887, giving one delegate at large to each county, and for each 150 votes and major fraction thereof:

election the democrats come up smiling with a "Mitls Bill" which they offer to the American people as a test of their suncerity in abolishing those abominable tariff laws.

Now what does this Mills bill propose to do. Will it reduce the tariff on im ports regardless of the section of the country that may be affected thereby? Oh yes, for whatever else may be said of democrats their patriotism and their love of the country is of that pure and undefiled sort which know no North, no South,

but one united people. Now that sounds well enough but its all in your mind; there's precious little of it in the bill.

As a matter of fact this measure knocks the tariff off of wool but leaves rice undisturbed. Wool is clipped in republican states. Rice is grown in South Carolin. South Carolina is a democratic state you know.

According to this bill the farmer who wishes hoop iron for his wagon bed, must pay a duty of 11 cents per pound but the southern planter who desires some of the same kind of iron to tie cotton balgs can go to the custom house and secure all the iron he wishes for this purpose free of duty. Democrats are inconsistent. That is to say they are very anxious to redeem their pledges by taking the tariff off of articles produced in northern states but when it comes to rice, sugar, cotton tie iron etc., then that is a horse of a different color.

### \$500 Reward.

We will pay the above reward for any case of liver complaint, dyspepsia, sick headache, indigestion, constipation or costiveness we cannot cure with West's Vegetable Liver Pills, when the directions are strictly complied with. They are purely yegetable, and never fail to give satisfaction. Large boxes containing 30 sugar coated pills, 25c. For sale by all druggists. Beware of counterfeits and imitations. The genuine manufactured only by John O. Well & Co., 862 W. Madison St. Chicago, Its Sold by W. J. Warrick.

-We now publish music each week in the WEEKLY HERALD. Everybody should be a musician. The pieces furnished in the paper will be found as popular as any costing 50 cents. Everybody should take the paper. We are endeavoring to make it a great success, and feel quite confident we can suit all.

## PROPRIETARY MEDICINES. A visit to Dr. Green's Laboratory, at

Woodbury, N. J. has considerably changed our views, and especially our prejudices in regard to what are generally known as "Standard Patent Medicines." itself is a humbug, and naturally distrust anything that has not withstood long and WHEREAS, At the republican state con- tried experiences. Being a physician I vention held at Lincoln October 5, 1887, had the curtosity to know how such a sale of two medical preparations could be sustained for so many years. The perfect system upon which the business is conducted, and the pharmaceutical arrangements for the manufacture of the two receipes with which we are made acquainted, are sufficiently convincing to sia and Liver Complaints, and Boschee's German Syrup, for Throat and Lung Troubles, were for the complaints they are recommended, most excellent remedies, and only regret that in much of our practice, medical ethics prevent us from prescribing them without making the formulas public. When we were shown the great quantity of voluntary letters having been forwarded Dr. Green, from all parts of the country, and from all clasges of people, lawyers, ministers and doctors, giving a description of their ailments, testimenials of their cares, etc., I feel like endorsing Dr. Green's suggestion that the Government accept such valuable formulas, and license them for general use by giving protection to the inventor same as patents generally. -Copied from N. Y. Druggists' Circular of Oct., 1886.

## MODES OF APPLYING MANURE.

Different Opinions Expressed on a Subject of General Interest.

It is not an easy matter to lay down general rules in regard to the application of manures that will be wise in all cases. Opinions differ somewhat as to the economy of spreading farm yard manure upon the surfaces of fields or lawns in lato autumn or early winter. Circum-stances alter cases here as elsewhere. It seems, however, reasonable to maintain that winter top dressing should be re-stricted to level fields; for both rain and snow must sweep manure from frozen hillsides before its constituents have had

hillsides before its constituents have had any fair chance to soak into the ground. There are advocates both at home and abroad of the practice of carting out fresh manure from the barn yard as fast as it is made and spreading it directly on the fields. The chief gain in such practice is

doubtless the saving of labor. The spreading of short manure upon grass in the spring, or in the autumn even, is no doubt commendable in many situais no doubt commendable in many situa-tions as a means of maintaining the same. A chief objection to the system of sur-face spreading, which applies particularly to light leaching soils, is that the non-soluble portions of the manure, as they lie on the ground, are liable to dry out to a peat like substance that is not specially useful to the growing group.

useful to the growing crop. However manure may be applied, it is of importance to secure its equable distriof importance to secure its equable distri-bution in the soil. In a general way, it may be said that horse droppings and manure from sheep pens should be applied by preference to cold clayey loams, or to moist soils rich in humus. These hot manures tend to warm and enliven the land. On the other hand, the slowly fermenting cow manure is preferred for warm light soils. On light sandy soils it will be found a good plan when using will be found a good plan when using horse manure to mix it with some slow sort, as cow or swine manure.

#### Comb Honey in Small Packages.

In Gleanings in Bee Culture is described the plan of a Michigan apiarian by which he gets two small packages of comb honey that have proven very popular in his market.

A seven-eighths board is selected just A seven-eighths board is selected just long enough to slip inside of a Langstroth frame. Then with a jack plane, set coarse, he scoops off the shavings. The shavings of course roll up, but he tumbles them into a pail of water, and when they get well soaked, they are straightened out, piled up and dried. This gives thin strips of veneer, and cheaper than you can im-agine. He then fixes a board as in the second engraving. The Langstroth frame is slipped over this board. These little blocks are made by gluing

a three-eighths board on top of a seveneighths board, as you see. Now, with a circular saw, cut grooves clear through the thin board until the saw strikes the thick one. These grooves are of such a width that three of the afore mentioned width that three of the afore mentioned strips of veneer will drop into each groove, the strips running lengthwise of the frame. When this is done, three short pieces of veneer are dropped into the grooves crosswise. But to make these bits of wood stay in place when the frame is pulled up, a little glue is put into each corner with a camel's hair brush. You want to be careful, so the

J. W. MARTHIS.

It is recommended that no proxies be admitted to the convention except such as | Of course we are getting to that age in are held by persons residing in the coun- life when we are forced to conclude life ties from which the proxies are given. To Chairmen County Central Committees

the following resolution was adopted: Resolved. That the state central com-

mittee be instructed to embrace in its call for the next state convention the submission of the prohibition question to the republican voters at the republican pri maries.

Therefore, in accordance with th above resolution, the several county central committees are hereby instructed to us that the August Flower, for Dyspepinclude in their call for their next county convention the submission of the prohi bition question to the REPUBLICAN voters at the republican primaries.

GEO. D. MEIKLEJOHN, Chairman, WALT. M. SEELEY, Secretary.

The convention in Chicago is a strik ingly different affair from that one held in St. Louis. The democratic gathering was hardly more than a ratification meeting: the candidates were ready-made, and so was the platform; the delegates had no field for deliberation or independent action. Whatever the outcome of the republican convention, it will be the result of the carefully considered and deliberate judgment of over 800 representative members of the party. There is no dictator, no prearranged program. The reports from Chicago continue to show that the situation is indeterminate. The delegates clearly understood the gravity of the work in hand, and there is every reason to believe that the best man will be chosen.

#### DEMOCRATS ARE INCONSIS-TENT.

Four years ago they pranced up and down the country prophesying that a continuation of those horrible "war taxes" would impoverish the people and transform merchantile industries into asylums for the poor. Let us manage the affairs of government, said these deciples of free trade, and civil service reform for democrats only, and at one fell stroke we will wipe from the face of the statute books every vestige of a high protective tariff which they pictured as more damaging than pestilence, famine or war. A sufficient number of people who were too old to remember distinctly the past record of this party, or too young to know past. So it is used with nervous diseases, from observation that it never made promises with a view of keeping them, placed them in power.

They have now been four years at the head of the government and for a much | it cannot dispose of the bile through the longer time have they been in the major- ordinary channel is compelled to pass it. But now on the eve of a presidential gust Flower. Its cures are marvelous. WARNER'S SAFE CURE.

Scarlet fever is at its minimum from January to May, and at its maximum in October and November. Dipbtheria is more evenly distributed through the year, and is most dangerous a little later than scarlet fever. Measles and whooping cough seem to be somewhat aggravated by cold weather. but are most fatal in May and June. iiot weather is averse to smallpox and favorable to disorders of the bowels, particularly in childran.

An Explanation,

What is this "nervous trouble" with which so many seem now to be afflicted? If you will remember a few years ago the word Malaria was comparatively unknown,-today it is as common as any word in the English language, yet this word covers only the meaning of another word used by our forefathers in times as they and Malaria are intended to cover what our grandfathers called Biliousness, and all are caused by troubles that arise from a diseased condition of the Liver no kidney disease! They have and don't which in performing its functions finding know it. You will never get well of the ity in the lower house and during all off through the system causing nervous orders, which would never prevail if the ity in the lower house and during all troubles, Malaria, Bilious Fever, etc. Kidneys we e all right, unless you restore this time tariff laws continued in force You who are suffering can well appreciand mills and factories continued to run. ate a cure. We recommend Green's Au- that great ble od tonic and purifier,

PLAN FOR MAKING SMALL SECTIONS. glue will not run in too far, and stick to the form. Before you put in the glue, however, drop some little squares of foundation into each little section. The glue should just catch each corner of the foundation. When the whole thing is dry, lift it off and hang it in the hive. When the little sections are full and sealed over, take frame and all to the grocer; slip off the outside, and show him that he can separate the squares into long strips. With a sharp knife he can now cut them up into little cakes as wanted. If a customer wants two, four, six or eight, let him have them all in a slice, to says handling so many loose pieces.

Of Interest to Bee Kcepers.

The query recently sent out to authori-ties on bee culture by "Gleaning in Bee Culture"—"Do you prefer the entrance at the and of the frame? Why?" elicited quite a number of replies including plain "yes" and "no," and several answers to the effect that it makes no difference. In a word, a consideration of all the replies justifies the conclusion that it does not make any difference about the amount of honey stored, whether the bees go into the hives sidewise or endwise. But so far as alding the beez in housecleaning, expelling intruders, etc., is concerned, the endwise door appears to offer the best facilities. It also seems as if an entrance the fall width of the hive, with the combs running endwise, must offer the bees better facilities for perfect ventilation.

#### Facts Worth Knowing.

A good force pump, with which the orchardist may apply insecticides early in the season and thus prevent loss from insects, is one of the requisites of the re-
