NEPBASKA CHAPTER. NO. 3, R. A. M Meets second and fourth Tuesday of each month at Mason's Hall. Transcient brothers

SEEN ON A TRAIN. Peculiar Phases of Life Noted by an Old

Railroad Conductor. "Yes," said an old conductor on one of our runk lines recently, "we see all manifestaions of human happiness and sorrow here in he course of a few months. Sometimes we arry a funeral party in one part of the train and a lot of roistering pleasure seekers on another. We become accustomed to such cenes, and the hurry and worry of our work prevents our sympathizing or rejoicing with hem, no matter how much we might feel so lisposed. And did you ever observe how few copie there are who manifest any breeding when traveling? People who would be called ultured at home will sometimes act in the nost shocking manner aboard a train. How requently we see men, and even women, with their feet upon the velvet cushions in front of them. Men who would be ashamed o have it known that they use the weed will pit tobacco juice over the foot rests and floor intil they render the place they occupy useless for decent people. These coaches are scrubbed, dusted and polished every trip, but

people don't seem to appreciate it. "It's a fine place to study human nature. For instance, look at that man curled up in the space usually occupied by four passengers. He thinks that because he takes his boots off he has the right to project his big dirty feet into the aisle as far as he pleases. But no matter; I can squeeze by them when necessary, and perhaps give his legs a tweak now and then that will make him think we have been telescoped.

"But all people are not boors. You can distinguish the true lady or gentleman here as elsewhere. They are never impertinent, drunk, nor sprawling dead asleep over the seats. They seem to take it for granted that all is being done for their speed and comfort that is possible, and are satisfied. Coarse men, women, and old people make us the most trouble. They seldom know exactly what they want, and so are never at ease. The latter class we can tolerate for humanity's sake-but the men! Why, I feel like pitching them from the train sometimes. They imagine their little slip of pasteboard entitles them to all the room they can occupy and a voice in the train management besides.

"We see all sorts of partings, of course, but there is one kind I shall never get used to, and that is a square, manly young fellow leaving his old father or mother or sweetbeart. I tell you the 'God bless you!' and 'Be a good boy!' and the tears mean some-thing then, and don't you forget it. When he takes his seat he has plenty to think about, and you can tell by a glance at his face that life for him has begun in dead earnest. May be you have been there yourself? I have," and seizing his lantern he left me to my meditations.-Chicago News

The Upas Tree of Civilization. The continent is an armed camp. The nations labor, as the Jews rebuilt Jerusalem, with a sword in one hand and their industrial tools in the other. Restless, suspicious armies are encamped side by side where formerly nations lived and labored. Every year some one or other of these armies invents some more deadly weapon than its rival, some nora terrific explosive, some more expeditious mode of slaughter. No sconer does this happen than all the others hasten to adopt it, piling on with desperate energy the panoply of armor beneath which humanity is crushed. Amid the censeless ebb and flow of human affairs, one phenomenon never varies. The sum total expended on making ready for slaughter constantly increases Every year more and more is drained from the soil in order to feed the magazines Every year the barrack gains on the cottage and proparation for war becomes the absorb ing prececupation of a great proportion of the flower of our youth. From every able bodied man this armed sence exacts three, four or five years of life when it is at its richest and brightest. When the youth slops into manhood and begins to dream of love and labor and of the sweet joys of home and family, there swoops down upon him the kidnsper of Mars and carries him off to the barracks and the camp. This vast organization for murder is the upas tree of civilization, and all the continent is sick ning under its fatal shade. The first cost is the cost in actual cash paid down, the second in life wasted at its prime, the third in the condition of unrest which says the sense of security necessary for the prosecution of business. Business is difficult when peace is ot worth three months' purchase. Every year commerce becomes more and more in ternational. Every year, therefore, any dis turbance of peace becomes more dangerous to the trader. Even the shadow of war nov produces far more serious dislocation of industry than in old times was caused by the actual progress of a campaign. For in old times every parish was a little world in itself, a microcosm capable of independent existence, and able to carry on its own business and grow its own crop if all the rest of the world was in measureless confusion. Today all this has changed. A network of rail arteries and telegraph nerves now knits all Europe into one organism .- Pall Mall Gazette. 2,596,314

A Brief Summer Vacation

A most curious method of spending the summer out of town, and at the same time preserving the comforts of home and avoiding the bitter necessity of rising to catch an early train, has been perfected by several young men who live in chambers and can't afford to be away from their business. For the most part office work in this season is finished by 4 o'clock, and this level headed young man seizes his hat, catches the boat for Staten Island, the train for Coney Island or some like method of conveyance, to some easily accessible resort, and by 5 o'clock is in the surf washing away the heat and annoyances of the day, bracing up his system on tennis, or seeking less active joys is boating. He dines leisurely at 7, smokes his cigar beneath the stars, possibly carries on a gentle summer flirtation till 11, when he takes the train back to the city, and by 12 is fast asleep in his own comfortable chambers, his dreams unrufiled by any thought of hurried breakfast or a scramble for the cars.

In effect, he has something over six hours in the country every day, with time to do a bit of athletics, become cooled and rested, mentally and physically refreshed, and yet sacrifices none of his home comfort and saves himself the fatigue and vexation of a matuti-nal struggle with time. He generally has a room of his own at his country resort, and keeps his tennis and boating togs there, his books and his banjo, and creates a semi-home atmosphere, where he can lounge at his ease, if his soul doth not move him to more sinewy occupation. Indeed, what the New York young man of this enlightened age does not know of the art of living and getting the best out of his span is scarcely worth teachhim.-Brooklyn Eagle.

Photographs Taken at Night.

The beauty of the new magnesium cartridge is that the amateur may now take a photograph of himself in his own room. He sets up the camera, adjusts the focus by means of an ordinary lamp, lights the fuse and takes his place before the camera. The picture is taken instantaneously as soon as the mixture flashes up. The chances are that this new invention will make the detective camera of use to newspaper men at night. By the use of the cartridge a picture can be taken of any building or scene, not only at night, but even if the night is a rainy one. A few minutes will develop the picture. and then the artist can draw a newspaper cut from the wet negative, and process work is now so rapid that a finished block can be made in time for the morning paper .- Detroit Free Press.

Better Bo Getting Away.

I would strongly advise every German in the United States who has any idea of assist ing his friends or relations from Fatherland, to perfect his arrangements and get them out here at once. I say this because one of the first things the new emperor is likely to do in pursuance of his policy will be to vent emigration by all the means in his despotic power. He is for war, and will want them to do his fighting-not alone the high born dandies but the hard handed soldiers from the plow and the work banch. The emperor is wild for the grandest game in crat. life; he longs to hear the earth quiver with the thunder of the guns-yes, even to hear the bullets singing in his ears, though that is a pleasure not aften enjoyed by men in his high station. His ancestors won fame; he, with his lame left hand, must have like glory, and he must have men who will sacrifice their lives in slaughter so that he may ride under the Linden in triumph. Therefore, friends and follow citizens, you who have fathers, brothers, sons and friends who are liable to carry a gun, not for vaterland, but for the glorification of Wilhelm the Second, look lively, before the ports are closed and emigration to this land of peace, the war in the leading newspapers and magfreedom and plenty becomes a crime by order of the emperor. -- Once a Week.

"ART AND LIFE."

Said the Poet unto the Seer, How shall I learn to tell What I know of Heaven and Hell? I speak, but the ashes turn The passions that in me burn. shout to the skies, but I hear No answer from man or God. Shall I throw my lyre on the sod, Rest, and give over the strife, And sink in a voiceless life? Said the Seer to the Poet, Arise And give to the seas and the skies The message that in thee burns. Thrice speak, though the blue sky turns Deaf ears, and the ocean spurns Thy call. Thou men despise The word that from out thy heart Flameth, do thou thy part, Thrice speak it, aloud, I say, Then go, released, on thy way; Live thou deeply and wise; Suffer as never before: Know joy, till it cuts to the quick: Eat the apple, life, to the core. Be thou cursed By them thou hast blessed, by the sick Whom thou in thy weakness nursed With thy strength the weak endue; Ee praised when 'twere better to biame;

In the home of thy spirit be true, Though the voice of the street cry shame. -Richard W

Wales and the New Yorker.

me of a good thing in which a New Yorker

Speaking of the Prince of Wales reminde

-a well known one, too-figured to some ex-tent. The prince had been down at the docks somewhere, "opening" a school, or hospital, and was leisurely walking back in the direction of St. Paul's in company with his son, Albert Victor, alias "Collars and Cuffs," There was quite a crowd behind the royal pair, but the policemen on duty succeeded in keeping them at a respectful distance. The New Yorker, who had just emerged from Short's place, saw the prince and walked up to him with a smiling face. "How do, yer highness. I'm Col. --- from

New York. Glad to see you." The prince, who is rather a good natured fellow and enjoys a joke, extended his right

hand with the remark: "I'm well, colonel. I'm also happy to meet you." The policemen were dumfounded, the crowd immediately revered the colonel and that unabashed personage walked proudly away.-London Cor. New York Press.

What Makes the Difference?

When Caleb Cushing died he said of life, "It is not worth the candle," and Humboldt cried out in despair at the mere fragment of existence he had had. The old lady reported recently at near 100 was "the hannlest woman alive," Another turns up in Yorkshire, England, 101 years old, and is reported as saying she "has thoroughly enjoyed herself." What makes the difference? Is the tendency of learning to render us discontented and dissatisfied with existence? At least life must be lived simply to be lived in

Fishes of the Sea.

Though no sharp line of separation can be drawn, marine fishes are roughly divided, for convenience, into three categories-shore fishes, which habitually frequent coast lines, 1,245,466 and rarely descend to a greater depth than 3,044,915 300 fathoms; pelagic fishes, which inhabit the open sea, most of them spawning there also, and the deep sea fishes, which live where the influence of light and surface temperature is but little felt. The shore fishes, according to Heilprin, number upward of 3,500 species. Their northern range extends to or beyond the eighty-third parallel of latitude, but in the southern hemisphere they are not known to go beyond the sixtieth parallel. In the different zones these fishes are largely identical in both the Atlantic and Pacific basins, as well as on the opposite side of these

> basing. Tropical waters, however, produce a greater abundance and diversity of forms than those of temperate regions, while the reefs give to the Pacific and Indian oceans more species the Pacific and Indian oceans more species than the Atlantic. Our still very meager knowledge of the pelagio fishes is sufficient to indicate that the number of such types is very limited. They diminish rapidly from the equator, and become rare beyond the fortieth parallel. Of the deep sea fishes, Gunther enumerated upward of fifty forms supposed to have been obtained from depths exceeding 1,000 fathoms, twenty-six from depths exceeding 2,000 fathoms, and nine from 3,500 fathoms. Other species have since been obtained, one from the extreme depth of 2,900 fathoms.—Land and Water.

Growing by Electric Light.

It is said that trees planted under the elcctric light increase in size much more rapidly than those sat out under ordinary circumstances. It is finely illustrated in Fairfield just at present, where at a street corner stands a little tree that was set out there last spring. It grew fairly well last season with-out the electric light, but this season, under its effulgent rays, it has stretched out with great rapidity, far outstripping all its fellows at the same time.

The explanation of this unusual growth, given by the scientist on the opposite side of the street, is that the tree grows both day and night, the electric light taking the place of the sup at night. Under all the circumscances this would seem a very plausible explanation, and if it is true the electric light will come into general use in hot houses and other places where it is desirable to force vegetation. -Fairfield Journal.

How to Eat a Ducamber.

"Cool as a cucumber," says an exchange, is scientifically correct. An investigation in England showed this vegetable to have a temperature one degree below that of the surrounding atmosphere. "Cucumbers." says that genial judge of good things, Fran-cis B. Thurber, "seldom disagree with the stomach when taken with plenty of pepper and salt, and never when claret is used as a beverage." He says: "I like to take them from the vines in my garden, peel them, slice them down the center nearly to the end. so that the four quarters will open, sprinkle n some pepper and salt, and, pressing the pusters together, eat them as I would an ople. Any encumber thus obtained from a vines in the cool of the morning is decious, but those having many spines or rickles I have usually found to be the crisp st and best."-Medical Classics,

Caressos of the Surf.

To me the occan is at once the most fasenting and the most horrible sight in the vorld-this incashing of each smiling blue, white crested wave, that, almost with a purr. greeps up to you and seems to absorb you in its greatness, or eise makes you wonderfully conscious of your extreme Littleness.

The feline type as represented by a great, seautiful tiger, or this wonderful sea that ceizes you with a caress call drags you to destruction in a whirl of its bases, is so in ensely famining! I think that is the reason that men are pussionately found of it, wormen deckiedly afraid. The one rushes in not knowing the duplicity of the eterast feminine is shown by the costn. The other, knowi i, er kind, bewares of it it is the old mory a bols rushing in where angels four to tread.-Baur in New York Bur

full; and a m sure of discontent always ac companies high intellectual progress. What shall we aim at-a contented life and length of years or a restless, aggressive life of achievement and discontent?-Globe-Demo-

Newspaper Story of the War.

An immense newspaper history of the civil war has been compiled by Thomas S. Townsend. It is formed entirely of newspaper cuttings, with a digest of these and index, and comprised in more than 100 giant volumes, in Russia binding, each one of which is the size of the largest bank ledger. Mr. Townsend began his labors in 1860, and has continued them ever since, having expended twenty-six years and \$25,000 in the formation of such a collection of newspaper history as never was attempted before, and probably never will be sgain. This collection comprises everything printed relative to

azines.-Once a Week.

When Boller Explosions Occur.

James F. Wilson, the chief engineer of the Equitable building, says that it will be noticed that most boiler explosions come. like black coffee, right after dinner. The reason for this, as he explains it, is that the water in the boilers is in perfect readiness to become steam, and would be such but for the pressure of the actual steam on top of it. When the dinner hour is over and the men and machines begin work again the valves are quickly opened, the steam rushes out and the water suddenly becomes steam. As steam has 1,700 times the expansion of water that effect is an explosion .- New York Sun.

To the Sulphur Springs. Mrs. Schemer (mother of two marriageable

cide whether to send Edith and Lilla to Saratoga or the mountains this summer. What would you advise? Mrs. Sharpe (very ingenuous)-Why not send them to Sulphur Springs, Mrs. Schemer! You know they use sulphur in making matches.-The Idea.

At the Summer Resort,

Gwendolen (in shady path)-Won't you take my hand here, George? George-No; somebody'll see us, and think

we're pretty lovesick for a married couple. Gwendolen (coaxingly)-They won't think we're married at all; they'll think we're only engaged.-Harper's Bazar.

The Dog Raising Industry.

Among the Mantchu Tartars dog raising, it is said, has been quite an industry, the akins being tanned for rugs and the mest sold for consumption by the native popu-lace. So it is easy to understand that a dog ranch is conducted with the keenest sort of an eye upon the main chance.-New York Commercial Advertiser,

There are too many students who comply with the rules of a school simply in form, but not in heart. They are like the little girl when her brother struck her. Her mother told her to kiss her little brother, and heap coals of fire upon his head. The little girl ran up and kissed her brother, and then aid: "Where is the shovel now? Where is the shovelf"-Phrenological Journal.

Blue Pond Lilles. The novelty of pink pond lilies gives way just now to surprise over the blue ones, tha color range of which lies between that of a fringed gentian and a forget-me-not. The manufacture of these pond lily tints remains as yet a profound professional secret.—Phila-
