#### Nebraska's Vote.

LINCOLN, Nov. 20. -Time has not yet allowed the officials to foot the figures, but Governor Thayer's plurality is now set down by those who have run over the lists at 19,553. Auditor elect T. H. Benton's plurality is 26,728, or 7,175 more than that of Governor Thayer. Benton's plurality is substantially that of Lowe, Hill and Lane, so that the cut made by the boodlers is represented in the above difference of 7,175. It is not certain yet whether these votes were lost to Gov. his name off, or exchanging that of Mc-Shane for it. It remains to be seen whether McShane ran 3,500 votes ahead of his ticket or not.

The electoral returns will be opened and canvassed next Monday.

The congressional returns are as fol-

#### A Victory for the Bible.

MILWAUKEE, Nov. 20 .- A Janesville, Wis., dispatch says: The celebrated Edgerton bible case, in which suit was brought by the Catholic taxpavers to prevent the reading of King James' version of the bible in the public schools, was decided yesterday. Judge Bennett held that such reading was not sectarian instruction, the children of the petitioners not being obliged to listen if they did not desire, and the bible having been decided upon by the authorities as one of the text books for the Wisconsin schools. There was nothing, however, to prevent children from reading the version of the bible accepted by the Catholic church if they preferred.

#### The Freight Conductor's Dutles.

The freight conductor is simply a high grade of brakeman. His work is almost wholly supervisory and clerical, and so, after several years' service, he becomes more sober and business like in his bearing, the responsibilities of his position being sufficient to effect this change; but he generally retains his sympathies with his old associates who have become subordinates. His duties are to keep the record of the train, the time, numbers of cars, etc.; to see that the brakemen regulate the speed when necessary, and to keep a general watch. The calculations necessary to make a seventy-five mile trip and get over the line without wasting time are often considerable, and an inexperienced conductor can easily keep himself in a worry for the whole trip Often he cannot go more than ten miles after making way for a passenger train before another overtakes him, so that he must spend a good share of his time sitting in his caboose with the time table in one hand and his watch in the other. calculating where and when to side

track the train. On single track roads perplexities of this kind are generally more numerous than on double lines, because trains both in front and behind must be guarded against, and because the regulations are frequently modified by telegraphic instructions from headquarters. A mis-take in reading these instructions, which are written in pencil, often by a slovenly penman, and on tissue paper, may, and occasionally does, cause a disastrous collision, These duties of conductors are especially characteristic of trains that must keep out of the way of passenger trains, so that in this particular line it will be seen that the passenger conductor has much the easier berth. The freight and "work train" conductor must really be a better calculator, in many ways than the wearer of gilt badges and but-tons, though the latter receives the higher pay.—B. B. Adams, Jr., in Scrib-ner's Magazine.

### Time Reckoning at Puget Sound.

According to Mr. M. Eells' account of "The Indians of Puget Sound," in The American Antiquarian, the Nisquallies divide the year into thirteen moons, for each of which they have separate names: also for the waxing and waning of the moon. The daytime is divided into dawn, sunrise, forenoon, noon, after-noon, sunset and dusk, while the night has the single division of midnight. These Indians obtained the idea of Sunday from another tribe, before the English came, and after that met on Sunday, sang, danced, prayed and tried to purify themselves and throw away their bad and make their hearts good. They also married wives on that day. Among the Twanas Sunday means holy day, and the other days are day past, two days past, etc., except Satur-day, which means "alongside," that is, day, which means "alongside," that is, of Sunday. March is "getting warm;" August, "the deer sheds its horns;" October, "the grass dies," and November, "the grass goes into the ground." The people are generally in debt to one another, with obligations of many years' standing. The debts are seldom heard of, except when trouble arises about something else, and then there is a general turning up of old scores for the eral turning up of old scores for ten or fifteen years back, and of the debts of relatives and wife's relatives.—Pc:pular Science Monthly.

Culinary Education for Girls.

Philadelphia has followed Boston and some other cities in introducing culinary education for girls as a part of the public school course. Thirteen classes of twenty pupils each have been formed to begin with, and those interested believe that it with, and those interested believe that the will prove a great success. As way the case in that city when the introduction of sewing classes was proposed, the cooking classes have met with objections from a few, on the ground that other studies would be interfered with But the great success of the sewing classes, which now compasse about 30,000 children, fully answers this objection.
When will New York show like enterprise? It took a living? They need it even worse than the boys. And what are public schools good for if not to be of practical benefit?

The public was told recently that Greek had been added to the studie—in the Normal school. Man are being imported at salaries of \$10,000 a year to cook in this city, while the city is paying to teach girls Greek and refusing them instruction in sewing and cooling them instruction in sewing and cooling. This is not right. Nearly 2,600 girls are receiving instruction in the public schools of Boston in the science of cooking. It is an invaluable science. More people is an invaluable science. are injured by bad cooking than from any other cause. In Germany cooking schools are maintained for the wealthy and aristocratic. In New York they are needed for rich and poor.-New York

### WHAT ON EARTH

Is the reason people will not, can not, or do not see any difference in cheap nostrums put up by Cheap John houses or irresponsible parties at enormous profits, rather than take a medicine of world wide reputuation and one that is giving universal satisfaction at equal price?
