Our Clubing List.

THE YOUNG GIANT, DAKOTA.

Some of the democratic leaders seem to have heard from the people. Mr. Springer, who has distinguished himself for years by using the influence of his position as chairman of the house committee on territories to keep Dakota out lible throughout the United States. In of the union, is now reported as saying Nebraska the spectacle will be visible bethat the bill admitted Washington. Montana, Dakota ane New Mexico will oe passed as soon as possible, but he still insists upon taking in Dakota as one state, and intimates that the desire of the and the part that ill health often plays senate to see the territory divided may in heart-wreek is too great for computamake trouble.

In fact, the injustice of the exclusion of Dakot; has become so glaring that not even the democratic leaders can persist in it any longer. The latest report of the governor, just issued, showed that the total of lands newly filed on and purchased by immigrants for settlement for the year ending on the 30th of June last closely approximates 2,500,000 acres, or 3,900, square miles -twice the area of Delaware. That is the rate at which this young giant is adding to its stature year by year, and still it is denied representation. It may be worth while to go back a little and trace its astonishing growth. The census of 1860 showed a population was 14,181. The period of its developpopulation was shown to be 135,177, or counterfeits and imitations. The genan addition of 850 per cent to the population under the previous census. That | Sold by W. J. Warrick. taken in 1885 showed a population of 315,610, a gain of more than 200 per cent in five years. Since that time there has been no official enumeration, but estibasis the population was estimated in and prevents consumption. 1886 to be 500,000; in 1887; 568,477; and inhabitants of the numerous Indian and \$1.25. military reservations, which occupy onefifth of the entire territory, and the total number of inhabitants approaches closely to 700,000. But without these classes the population is sufficient to entitle them to four seats in the house of representatives.

In every department of enterprise the development of the Territory continues | bear inspection at any time; if it is not at so rapid a rate that the figures grow white and furred, it is rough, at all old before they can be made public. During the last year 716 miles of completed track were added to its railway order and diarrhea or constipation may system, making the total milage 4,207. Only thirteen states in the Union have a larger railway mileage. But it is in the agricultural development of the Territory that the most astonishing results are seen. In 1860 less than 1,000 bushels of wheat were raised there, and in 1870 the erop had mounted only to 170,662 bushels, but in 1880 it has increased to 2,830,- house can be purchased at H. Boeck's. 289 bushels, and in 1885 to 38,166,413 bushels. As to the crop of 1887 there is a difference of opinion. The statistician store. of the national department of agriculture estimates 52,406,000 bushels, while the territory statistician claims 62,553,-499. Either estimate gives Dakota a much larger production of wheat than any state of the Union. Something like the same development is seen in the corn crop, which has increased in two years disease from the system, from 7,800,598 bushels in 1885 to 24,511,-726 bushels in 1887-a larger crop than that of Minnesota or Michigan .- New Main street. Inquire of J. l. Uaruh. tf York Tribune.

THE great Panama canal, connecting the two great oceans, will be completed. So says an American engineer who has looked over the work. The United States must control this great highway and prevent any European government from possessing it. The prevailing belief to g t your beautiful parlor and bed that the canal would never be finished has been dissipated and the national importance of preventing France or England from controlling it becomes apparent. A republican administration Remember that he who sells most can assures the nation of a successful solution | sell cheapest. of the problem .- Express.

American Enterpriss.

No invention of the nmeteenth century has worked a greater revolution in household economy or conferred more of a benefit on humanity than the sewing

The first productions were crude and uncouth in the extreme, and it was reserved for American skill and ingenuity to bring forth a machine of any practical

In order to appreciate the great ad vancement which has taken place it is only necessary to compare one of the machines built during the infancy of the invention with one of the latest improved "Light-Running New Home."

All the really good points contained in other machines have been utilized in its construction. Many new improvements and devices have also been added, the result of which is a machine as nearly perfect as it is possible to make one.

For simplicity, durability, ease of management and capacity for work, the 'Light-Running New Home" has no ri val, and the happy possessor of one may rest assured that he or she has the very best the world affords. SEE ADVERTISE-MENT ON ANOTHER PAGE OF THIS PAPER.

THE FALL OF THE BASTILE.

What an Anarchist Says About the Anniversary of That Event, July 14.

An Anarchist of this city, who shaves his beard so as to leave only a mustache on his face, was interviewed by a Sun reporter in regard to the pre-diction of Capt. Ponfield, of Chicago, that there will be a widespread Anarchist uprising on the 14th of next July, and that in Paris, where their operations are to begin, the centenary of the fall of the Bastile is then to be celebrated. "It is true," the New York Anarchist said, "that there will be a big time in Paris on July 14 next at the Eastile celebration, and it is also true that they had a big time there on the same date in last July, and likewise on that date of every year since the establishment of the French republes. \$1.25. lic. The 14th of July in France is like the 4th of July in the United States. It is the national annual holiday, when all France, including the French government and army, unites in celebrating the most memorable event in French history. The day is also celebrated in this country, mainly by Frenchmen, and it will be

celebrated here next year, as Inspector Bonfield, of Chicago, says. But there is no need of being alarmed about the celebration of next year, any more than there was about that of last year, or of the year before. The celebration is not anarchistic, but republican, and signalizes the downfall of monarchy. As the Americans in France and other countries celebrate the Fourth of July, so the Frenchmen in America and other countries celebrate the 14th of July; and the sympathizers with French liberty who live in France join hands with the people there, just as the foreign sympathizers with American liberty who live here join hands with the natives on Independence day. That is all the ground there is for the apprehensions of Inspector Bonfield, of Chicago, who probably never was in France. There is no the slightest danger in this country any more than there is in France, of the Anarchists raising any rumpus on the coming French centenary. They are BUSINES; DIRECTORY. a hundred times stronger in France than they are here, but the French government takes no heed of them. It is too bad that Capt. Bonfield should

A Lifetime Crowded Into a Moment. The question of the duration of dreams has recently been discussed in Germany, among others by Dr. F. Scholz, who has given some striking examples from his own experience and observation. It is not possible to give directions are strictly complied with, a definite answer, and probably They are purely yegetable, and never enough dreams vary much in point of duration, just as they vary in force containing 30 sugar coated pills, 25c. and vividness. At one time the figures of a dream, whether they emerge from the horn or the ivory gate, are as real uine manufactured only by John O. We as in life; the sorrow is even more in-& Co., 862 W. Madison St. Chicago, and | tense, the happiness more realistic. At another time they seem to live only in a pale moonlight, and we watch the scenes rather than participate in them. It is very certain, however, that the majority of dreams are only of momentary duration, though extended occasionally to the length of a

In proof of this Dr. Scholz tells the following story from his experience: After excessive bodily fatigue and e day of mental strain, of a not disagree able kind, I betook myself to bed aft I had wound my watch and placed on the night table. Then I lay do beside a burning lamp. Soon I fou: myself on the high sea on board a we known ship. I was again young a stood on the lookout. I heard the recof the water and golden clouds floated around me. How long I stood so did not know, but it seemed a ver long time. Then the scene changed I was in the country and my long dead parents came to greet me; they took me to church, where the loud organ sounded. I was delighted, but at the same time wondered to see my wife and children there. The mounted the pulpit and preached, but I could not understand what he said for the sound of the organ, which continued to play. I took my son by the hand, and with him ascended the church tower, but again the scene was changed. Instead of being near my son I stood near an early known but long dead officer-I ought to explain that I was an army surgeon during the maneuvers. I was wondering why the major should look so young, when quite close in my ears a cannon sounded. Terrified, I was hurrying off, when I woke up and noticed that the supposed cannon shot had its cause in the opening of the bedroom door through some one entering. It was as if I had lived through an eternity in my dream, but when I looked at my watch I saw that since I had fallen asleep not more than one minute had elapsed-a much shorter time than it takes to relate the occurrence." Dr. Scholz has collected many other

examples of a similar kind.-London

The Death Watch Beetle.

As most people know, the death watch is a small beetle which frequents decayed rotton wood and is of lonely and retiring habits. It is one of the smallest of the vagipennia, of a dark brown, with irregular bright brown spots, the helmet turned up and the upper lip hard and shining. It produces the ticking sound by pecking at the wood with a small, hard proboscis, when in the act of securing food.

The writer once chased down a death watch through a pile of old pa-pers in a cigar box and was fortunate pers in a cigar box and was fortunate enough at last to see it at work. The ticking was quite as loud as that of an old fashioned watch while the insect was not much larger than the head of a black pin.—San Francisco Chronicle.
