THE INCAPABLES.

In two months more this incapable do-nothing congress will have vanished from the earth, and the country may hope never to see another like it.

Two months of hard work—and the present house has not shown itself capable of working hard at any time—would not suffice to accomplish all that ought to be done.

The submission question is being discussed by the senators and within a few days a canvass will be taken, so we will then know just who are the friends of submission and who are its enemies.

CALLED BACK.

When the great republican victory of November last was achieved, the individuals now representing the United States government at foreign courts, were practically called back, and after the 4th of March they will no longer be allowed to linger upon the diplomatic horizon.

SEAL PIRACY.

It begins to look as though the horrible stories of the atrocities of the Alaska company were the invention of the British and Canadian seal pirates in order to throw dust into the eyes of congress and prevent the renewal of the company's contract.

The submission question is being discussed by the senators and within a few days a canvass will be taken, so we will then know just who are the friends of submission and who are its enemies.

The Burden of Womanhood.

Thousands of women are silently suffering untold misery, simply because they shrink from consulting a physician in those numerous complaints arising from functional irregularities and disorders.

Smuggling Luce in a Coffin.

A Brussels lace merchant had received from a Belgian, residing in Paris, an order for a large quantity of Malines lace.

Paying Dearly.

In a small village of New England, a few years ago, some of the young girls acquired habits of eating starch, coffee, cloves and the like, to improve their complexions.

A Telling Argument.

It is now noted that the abolition of the car stove will make a clear gain of the space in each car which the heater occupies, and that each train of seven or eight cars will thereby be enabled to carry twenty-five or thirty more passengers.

WRITING BY TELEGRAPH.

Elisba Gray's Invention for Sending Letters by Wire.

Electricity is the good genius of this century. Those who know most about it say that what we have done with it in the past is but a trifle compared with what we may hope to do with it in the future.

These things may all come. At present we get along with an intermittent and exasperating repetition of the voice over the wire, having no means of determining the identity of our interlocutor, no certainty of getting his words accurately and no record of what he says.

Elisba Gray, the well known Illinois inventor, recently patented a device to insure accuracy and accountability over the electric wire.

Mr. Gray's device consists of two current interrupters at the sending end and a pair of electro-motors at the receiving end.

The teleautograph, as Mr. Gray calls his invention, therefore not only carries accuracy, but it so exactly copies the sender's handwriting as to hold him accountable for what he has written, while he retains for his own guidance the original of the message transmitted.

The Pine Tree State.

The assertion has frequently been made that the title "Pine Tree State" has become a misnomer for Maine, and although there are lots of pine trees still standing in the northern part of the state, there is some ground for objection to the old time sobriquet.

A Palm with a History.

John M. Coring, of Wappinger's Falls, Dutchess county, has a sage palm with quite a history, which, added to its great age—150 years—makes it a valuable plant.

Things Have Changed.

In the old days, when Washington was but a big village, the post of minister to the United States was the least liked of all the chief diplomatic appointments.

A Border Drama in Earnest.

During the presentation of a border drama at Sandusky, O., by a traveling company, three Indians engaged in a quarrel in the dressing room.
