Some people never take books to the country with them. They either feel no need for the strength or relaxation they might gain from reading, or they rely upon chance for their mental pabulum. Few are the readers who carry with them anything but the lightest of summer novels-books that can be thrown

away without regret when finished. Perhaps it is too much to ask that any one not a student should expend much energy in hot weather upon mental improvement. Yet it does seem as though something better might be read than the merely ephemeral novelette. How many merely ephemeral novelette. How many of the rising generation are really familiar with the novels of Scott, of Dickens. iar with the novels of Scott, of Dickens, of Thackeray, of Cooper, of George Eliot, of Miss Mulock, or with the

In purchasing an outfit for the summer vacation the hammock books should no more be overlooked than the hammock itself, but let both be of a kind that will stand wear. Trashy reading provokes a mental dyspepsia akin to the physical malaise produced by a diet of torpid liver, piles, constrpation. Une sweetmeats unaccompanied by substantials. Such a course of treatment unfits either mind or body to do the winter's work, for which strength should be accumulated during a summer vacation .-Harper's Bazar.

The Edelweiss in London.

It may be interesting to some to hear that the Edelweiss can be cultivated in disease is being revolutionized, and London. Last August a friend who many unexpected cures effected. It lives near Belfast gave me a small plant soon relieves short breath flutter with one bloom, raised by himself from ing, pains in side, arm, shoulder seed. The directions given with it were: | weak and hungry spells, opposes "Leave it in the corner of your garden | sion, swelling of ankles, smothering it requires no special care."

Unhappily, London gardens are the hunting grounds for innumerable cats, so I placed my treasure, for such I G. Fricke & Co, also his Restorative deemed it, on the sill of my drawing Nervine for headache, fits, sprees, room window, aspect southeast, and hot flashes, nervous chills, opium there, through the dismal sunless win- habit, etc. dow, now buried deep in snow, now frozen hard, the Alpine stranger remained, always reported dead by all who saw it, but toward the end of March life showed itself, and now it is a large healthy plant, with five lovely blooms, the admiration of all who see it.

Surely, if this fair Nower from the lovely mountain air of Switzerland can thrive in the smoky, sooty atmosphere of London, our climate is not so bad as some would say.-Cor. London Stand-
